Location Entry Codes

As part of CIE's continual commitment to maintaining best practice in assessment, CIE uses different variants of some question papers for our most popular assessments with large and widespread candidature. The question papers are closely related and the relationships between them have been thoroughly established using our assessment expertise. All versions of the paper give assessment of equal standard.

The content assessed by the examination papers and the type of questions is unchanged.

This change means that for this component there are now two variant Question Papers, Mark Schemes and Principal Examiner's Reports where previously there was only one. For any individual country, it is intended that only one variant is used. This document contains both variants which will give all Centres access to even more past examination material than is usually the case.

The diagram shows the relationship between the Question Papers, Mark Schemes and Principal Examiners' Reports that are available.

Question Paper	Mark Scheme	Principal Examiner's Report
Introduction	Introduction	Introduction
First variant Question Paper	First variant Mark Scheme	First variant Principal Examiner's Report
Second variant Question Paper	Second variant Mark Scheme	Second variant Principal Examiner's Report

Who can I contact for further information on these changes? Please direct any questions about this to CIE's Customer Services team at: international@cie.org.uk

The titles for the variant items should correspond with the table above, so that at the top of the first page of the relevant part of the document and on the header, it has the words:

• First variant Question Paper / Mark Scheme / Principal Examiner's Report

or

• Second variant Question Paper / Mark Scheme / Principal Examiner's Report

as appropriate.

Paper 1 Multiple Choice

0620/11 May/June 2009

45 Minutes

Multiple Choice Answer Sheet Soft clean eraser Soft pencil (type B or HB is recommended)

READ THESE INSTRUCTIONS FIRST

Write in soft pencil.

177477880

Do not use staples, paper clips, highlighters, glue or correction fluid.

Write your name, Centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you.

There are **forty** questions on this paper. Answer **all** questions. For each question there are four possible answers A, B, C and D.

Choose the **one** you consider correct and record your choice in **soft pencil** on the separate Answer Sheet.

Read the instructions on the Answer Sheet very carefully.

Each correct answer will score one mark. A mark will not be deducted for a wrong answer. Any rough working should be done in this booklet. A copy of the Periodic Table is printed on page 16. You may use a calculator.

This document consists of 15 printed pages and 1 blank page.

1 The diagram shows how the molecules in the exhaust gases diffuse into the air.

Which statement describes what happens to these molecules next?

- **A** The molecules fall to the ground because they are heavier than air molecules.
- **B** The molecules go back together as they cool.
- **C** The molecules spread further into the air.
- **D** The molecules stay where they are.
- **2** A student takes 2 g samples of calcium carbonate and adds them to 20 cm³ samples of dilute hydrochloric acid at different temperatures. She measures how long it takes for the effervescence to stop.

Which apparatus does she use?

- 3 The diagram shows the paper chromatograms of four substances, W, X, Y and Z.

Which two substances are pure?

- **A** W and X **B** W and Y **C** X and Y **D** X and Z
- 4 An element S has the proton number 18. The next element in the Periodic Table is an element T. Which statement is correct?
 - A Element T has one more electron in its outer shell than element S.
 - **B** Element T has one more electron shell than element S.
 - **C** Element T is in the same group of the Periodic Table as element S.
 - **D** Element T is in the same period of the Periodic Table as element S.
- 5 Which numbers are added together to give the nucleon number of an ion?
 - A number of electrons + number of neutrons
 - **B** number of electrons + number of protons
 - **C** number of electrons + number of protons + number of neutrons
 - **D** number of protons + number of neutrons

- 19 Which does not increase the speed of a reaction?
 - A adding a catalyst
 - **B** increasing the concentration of one of the reactants
 - **C** increasing the particle size of one of the reactants
 - **D** increasing the temperature
- **20** Aqueous sodium hydroxide is added to a solution of a salt. A blue precipitate is formed which does not dissolve in excess.

Aluminium foil is added to the mixture and the mixture is warmed. A gas is produced that turns damp red litmus paper blue.

What is the name of the salt?

- A ammonium nitrate
- B ammonium sulfate
- **C** copper(II) nitrate
- **D** copper(II) sulfate
- **21** The graph shows how the pH of soil in a field changed over time.

At which point was the soil neutral?

22 An element E is burned in air. A white solid oxide is formed.

The oxide is tested with damp red litmus paper. The paper turns blue.

What is element E?

- A calcium
- B carbon
- C iodine
- D sulfur

What is this process and what is substance M?

	process	substance M
Α	fractional distillation	paraffin
в	fractional distillation	petrol
С	thermal decomposition	paraffin
D	thermal decomposition	petrol

39 The structures of three compounds are shown.

Why do these substances all belong to the same homologous series?

- A They all contain an even number of carbon atoms.
- **B** They all contain the same functional group.
- **C** They are all hydrocarbons.
- **D** They are all saturated.
- 40 Which bond is not in a molecule of ethanoic acid?

- 37 Which element is **not** added to a fertiliser?
 - **A** aluminium
 - **B** nitrogen
 - C phosphorus
 - D potassium

38 The structures of three compounds are shown.

Why do these substances all belong to the same homologous series?

- A They all contain an even number of carbon atoms.
- **B** They all contain the same functional group.
- **C** They are all hydrocarbons.
- **D** They are all saturated.
- 39 Which bond is not in a molecule of ethanoic acid?

40 The diagram shows an industrial process. Substance M is one of the substances produced by this process and is used as aircraft fuel.

What is this process and what is substance M?

	process	substance M
Α	fractional distillation	paraffin
в	fractional distillation	petrol
С	thermal decomposition	paraffin
D	thermal decomposition	petrol
