UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2010 question paper for the guidance of teachers

0620 CHEMISTRY

0620/61

Paper 6 (Alternative to Practical), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

1 (a) ethanol and aluminium	October/November 2010 oxide boxes correctly labelled arrow towards solid (1)	0620	61 [1]				
	·		[1]				
(b) arrow towards wool (1)	arrow towards solid (1)						
	arrow towards wool (1) arrow towards solid (1)						
	to prevent suck back or description of suck back owtte (1) effect of suck back e.g. crack tube (1)						
2 (a) to speed up the reaction	ו		[1]				
(b) solid visible owtte	e.g. no more solid will dissolve		[1]				
(c) filtration / centrifuge	not decant		[1]				
` '	sure water (of crystallisation) is not lost / stop dehydration / s do not turn into powder / does not decompose not crystals break						
carbonates react with a	needed / not necessary to warm acid (1) es react with acid at room temperature (1) es would indicate that carbonate is in excess (1)						
			[Total: 6]				
3 (a) idea of fair test / only or	idea of fair test / only one variable						
(b) nitric acid	nitric acid						
(c) (i) points plotted (3), – smooth curve (1)	-1 for each incorrect		[4]				
(ii) value from graph 1	8 s (1) indication on graph (1)		[2]				
(,							
(d) times would be less / re	action quicker (1) ergy / increased collisions (1)		[2]

4	10, tem	11, 12, 1	of water 3, 14 boxes co	boxes c	orrectly co	ompleted (1)	, 30		[5]
	(a)			rectly (4), –1 for e	ach incorr	rect			[6]
	(b)	clear liqu	uid forme	ed / no se	olid visible	owtte				[1]
	(c)	value from graph for 9 cm ³ of water, around 72 °C (1) extrapolation of straight line shown (1)						[2]		
	(d)	temperatures at which crystals appear lower (1) solution more dilute in same volume of water / less saturated owtte (1)					(1)	[2]		
	(e)	sketch g	raph bel	ow line (1) label (1)				[2]
	(f)	do not re	e a beak emove th	er of colo	d water to ter from th	ne solutior		tals /		
		different loss of s observin average		eat loss nermome ion of fir	eter / st crystals		1			
		mean more accurate / increases reliability not just accurate						[2]		
										[Total: 20]
5	(a)	(i) blue	e (1)							[1]
			e (1) pre		1)					[2]
		(iii) blue dee		` '	solution	(1) or pre	cipitate disso	lves		[3]
	(c)	sulfuric a	acid (2)	acid or	sulfate on	ly (1)				[2]

[Total: 8]

	r age -		Mark Scheme: reachers version Synabus					i apei		
			IGCSE -	October/No	vember 2010	0620	0	61		
6	(a)	bubbles / fizzing / effervescence						[1]		
	(b)	alkali formed						[1]		
	(c)) (i) chlorine						[1]		
		(ii) indicator bleached / decolourised allow yellow						[1]		
								[Total: 4]		
7	(a)		niversal indicator / pH paper (1) not litmus H of 4–6 / yellow / orange (1) not red							
	(b)	sodium hydroxide / carbonate / oxide						[1]		
	(c)	marks can be obtained from diagram chromatography (1) description of applying E110 to paper (1) use of solvent (1) results / number of spots (1)						[4]		
								[Total: 7]
