

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

CANDIDATE NAME			
CENTRE NUMBER		CANDIDATE NUMBER	
COMBINED SC	IENCE	0653/	02
Paper 2 (Core)		October/November 20	07
		1 hour 15 minut	es
Candidates answer on the Question Paper.			
No Additional Materials are required.			

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in. Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs, tables or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

A copy of the Periodic Table is printed on page 20.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Exam	iner's Use

This document consists of ${\bf 19}$ printed pages and ${\bf 1}$ blank page.

1 Fig. 1.1 shows a plant, and also a cell from part of the plant.

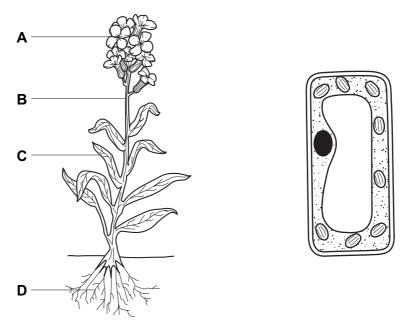

Fig. 1.1

- (a) From which part of the plant, A, B, C or D, does the cell come?
- (b) On the diagram of the cell in Fig. 1.1, label the following structures.Use label lines and the appropriate letters.
 - P a partially permeable membrane
 - **Q** the part of the cell that contains DNA
 - R a structure where energy from sunlight is absorbed [3]

(c)	Describe how you would test a leaf from the plant for starch.	For Examiner's Use
	[3]	
(d)	Complete these sentences about part A of the plant shown in Fig. 1.1. Use some of these words.	
	anthers asexual ovules petals sepals sexual stigma	
	Flowers are responsible forreproduction.	
	Themake pollen, which contains the male gametes.	
	The female gametes are found inside the[3]	

2 Fig. 2.1 shows the inside of a refrigerator.

For Examiner's Use

		Fig. 2.1
(a)	(i)	Draw arrows on Fig. 2.1 to show what happens to the air cooled by the freezing compartment. [1]
	(ii)	Name this method of heat transfer.
		[1]
	(iii)	Use the idea of density to explain why this happens.
		[2]
(b)		e refrigerator has a lamp inside. The supply voltage is 240 V and the current passing bugh the lamp when lit is 0.04 A.
	Cal	culate the resistance of the lamp.
	Sta	te the formula that you use and show your working.
		formula used
		working
		Ω [2]

(c) The refrigerator walls are insulated using both expanded polystyrene and aluminium foil.

For Examiner's Use

temperature inside the refrigerator.	
	[3]

Explain how the structure of the refrigerator wall will help to maintain a lower

3

Hydrogen peroxide, H₂O₂, is a colourless liquid.
Hydrogen peroxide slowly decomposes into simpler substances. The equation for the decomposition reaction is shown below.
hydrogen peroxide → water + oxygen
(a) How many atoms are there in one molecule of hydrogen peroxide?
[1]
(b) (i) The decomposition of hydrogen peroxide is usually carried out in the presence of a catalyst.
State the purpose of adding a catalyst to a reaction mixture.
[1]
(ii) The solid compound manganese dioxide, MnO₂, is used as a catalyst in the reaction above. Manganese is a metal in the fourth period of the Periodic Table.
What name is given to the family of metals which contains manganese?

(c) (i) Hydrogen peroxide contains two non-metallic elements bonded together.
	Name the type of chemical bonding in hydrogen peroxide molecules.
	[1]
(i) Oxygen molecules, O ₂ , are made of two oxygen atoms joined by a double bond.
	Suggest the displayed formula of an oxygen molecule.
	[1]
	[1]
(iii) The symbolic equation for the decomposition of hydrogen peroxide is shown below. The equation is not balanced.
	Balance the equation.
	$H_2O_2 \longrightarrowH_2O + O_2$
	[1]

4 Fig. 4.1 shows part of the carbon cycle.

For Examiner's Use

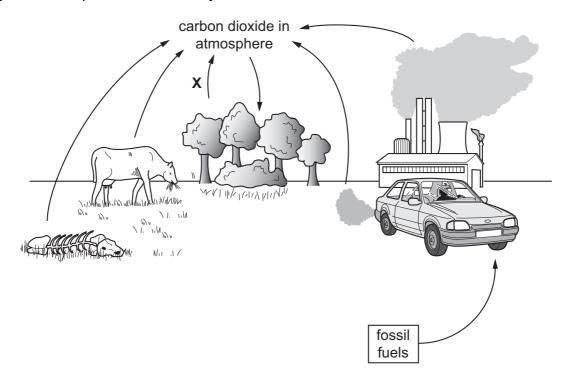

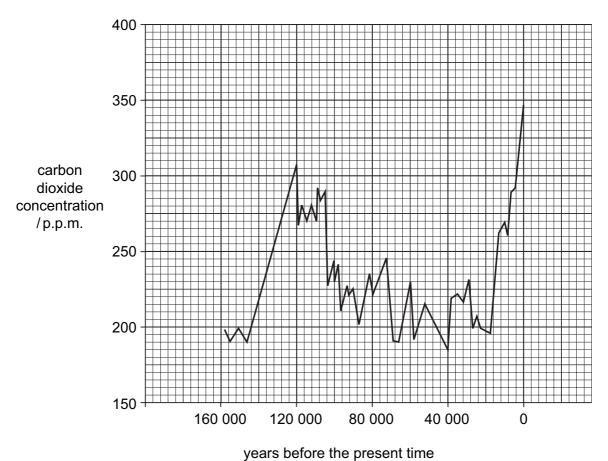

Fig. 4.1

(a)	Name the process labelled X on Fig. 4.1.	
		[1]
(b)	Explain how carbon dioxide is returned to the air from the bodies of dead organisms.	
		[2]
		<u>.</u> —j
(c)	Describe how fossil fuels are formed.	
		••••
		[2]

(d) Fig. 4.2 shows changes in the concentration of carbon dioxide in the atmosphere in the last 160 000 years.

For Examiner's Use

·

Fig. 4.2

(i)	Suggest one human activity that is causing the current increase in carbon dioxide concentration in the atmosphere.
	[1]
(ii)	Explain how the information in Fig. 4.2 suggests that human activities are not entirely to blame for increases in the concentration of carbon dioxide in the atmosphere.
	[1]
iii)	Explain why many people are worried about this increase in carbon dioxide concentration.
	rol
	[2]

5 A space rocket is launched to the Moon.

For Examiner's Use

(a) After launch, the empty fuel tanks are released and fall back to Earth. As a tank falls, two forces act on it as shown in Fig. 5.1.

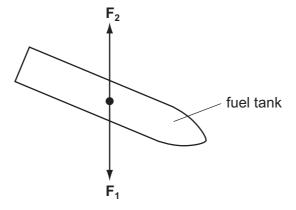

Fig. 5.1

(i)	Name forces F ₁ and F ₂ .	
	F ₁	
	F ₂	[2]
(ii)	As it falls, the tank accelerates. What does this tell you about the two forces?	
		[1]

(b) The rocket travels 400 000 km to the Moon in 80 hours.

Calculate the average speed of the rocket.

State the formula that you use and show your working.

formula used

working

km/h [2]

(c)	One of the astronauts on the rocket has a mass of 90 kg. The gravitational field strength of the Moon is about one-sixth that of the Earth.		
	Sta	ate the differences, if any, between	
	(i)	the mass of the astronaut on the Earth and on the Moon,	
			1]
	(ii)	the weight of the astronaut on the Earth and on the Moon.	
			1]
(d)	the	ere is no atmosphere and there are no fossil fuel deposits on the Moon. To provide energy needed to use his equipment on the Moon, the astronaut needs to us newable energy resources.	
	Sug	ggest one renewable energy resource which is naturally available on the Moon.	
		1	11

6 The apparatus in Fig. 6.1 can be used to study the reaction between potassium and oxygen.

For Examiner's Use

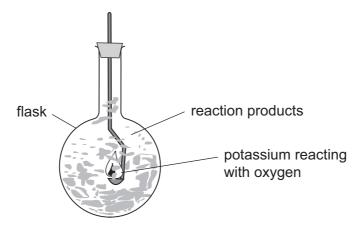

Fig. 6.1

(a)	Sug	gest why the flask becomes warm during the reaction.	
			 [1]
	******		ניו
(b)	One	e of the compounds formed in this reaction is potassium oxide.	
	The	chemical formula of potassium oxide is K ₂ O.	
	(i)	Explain the meaning of this formula.	
			[1]
	(ii)	Potassium oxide is made of positive and negative ions.	
		Explain, in terms of protons and electrons, the difference between a positive is and a neutral atom.	on
			••••
			[2]

(c)		en the reaction in Fig. 6.1 had finished, a student added water containing Universal cator to the flask.
	Pre	dict the colour change of the Universal Indicator.
	Exp	lain your prediction.
		[2]
(d)		assium metal reacts with water to form a solution of potassium hydroxide. During reaction a gas is given off.
	(i)	Write the chemical formula of potassium hydroxide.
		[1]
	(ii)	Name the gas which is given off and describe a test for this gas.
		name of gas
		test
		[3]

7 Tuberculosis (TB) is an infectious disease caused by a bacterium. HIV/AIDS is caused by a virus.

Examiner's Use

(a) Table 7.1 shows the percentage of people with TB and HIV/AIDS in four parts of the world in 2005.

Table 7.1

part of the world	percentage of people with TB	percentage of people with HIV/AIDS						
sub-Saharan Africa	0.51	7.2						
Southeast Asia	0.35	1.1						
Americas	0.07	0.7						
Europe	0.06	0.5						

	(i)	In which of these four parts of the world was there the largest percentage of people with TB?
		[1]
	(ii)	Describe any pattern that seems to link the percentages of people with TB and with HIV/AIDS.
		[1]
	(iii)	The virus that causes AIDS infects white blood cells. Explain how this could be responsible for the pattern that you have described in (ii).
		[2]
(b)		e TB bacterium usually infects cells in the lungs. Many of the cells in the alveoli are stroyed.
		plain how this can lead to a person feeling very tired and unable to carry out ergetic exercise.
		[2]

(c)	(1)	that can be transmitted in this way.	ses	For Examiner's Use
		1		
		2	[2]	
	(ii)	How can the spread of these diseases be reduced?		
			[1]	

(a) A dentist checks the student's teeth using a dental mirror. This is shown in Fig. 8.1.

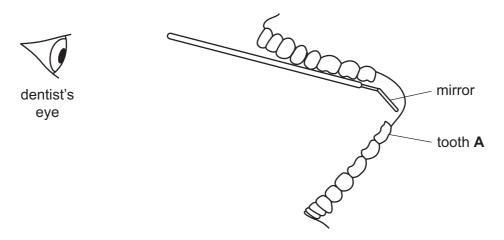

Fig. 8.1

Draw a ray of light from the back of tooth **A** to the dentist's eye to show how the dentist is able to see the back of the tooth.

On the ray, draw arrows showing the direction in which the light travels. [3]

- **(b)** A doctor tests the student's hearing and confirms that the lowest and highest frequencies the student can hear are normal for a young person.
 - (i) Suggest a value for each of these.

	lowest frequency		Hz '''	
	highest frequency		Hz	[2]
(ii)	What is meant by t	the frequency of a wave?		
				[1]
(iii)	Sound is one form	of energy.		
	Name two other fo	rms of energy.		

© UCLES 2007 0653/02/O/N/07

2.

(c) The doctor wants to use a small torch to look down the student's throat. When he switches the torch on, it does not work.

For Examiner's Use

Fig. 8.2 shows the circuit diagram for the torch.

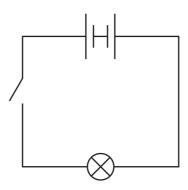

Fig. 8.2

(i)	Explain what is wrong with the torch.	
		••••
		[1]

(ii) Draw the correct circuit diagram.

[1]

9		miniı ustry	um, iron, sodium and chlorine are important elements produced by the chemical .
	(a)		e the copy of the Periodic Table on page 20 to help you to answer this question. te which of the elements above
9		(i)	is not in the same period of the Periodic Table as the other three,
		(ii)	has atoms which contain 11 electrons. [1]
		(,	
			[1]
	(b)		minium is a metal which resists corrosion and has a relatively low density. The ength of aluminium can be improved by making it into an alloy.
		Exp	lain why aluminium alloys are important materials for use in aircraft construction.
		•••••	[3]
	(c)		is produced when iron oxide reacts with carbon monoxide in a blast furnace. st iron is converted into steel.
		(i)	The equation for the reaction between iron oxide and carbon monoxide is shown below.
			iron oxide + carbon monoxide $ ightarrow$ iron + carbon dioxide
			Explain which substance has been reduced in this reaction.
			[2]
		(ii)	State two advantages of steel compared to iron from a blast furnace.
			1.
			2. [2]
	(d)	The	chemical symbol for chlorine is C <i>l</i> .
		Wri	te the chemical formula of a chlorine molecule. [1]
