

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

	International General Certificate of Secondary Education	
CANDIDATE NAME		
CENTRE NUMBER	CANDIDATE NUMBER	
COMPUTER S	TUDIES	0420/11
Paper 1		May/June 2011
		2 hours 30 minutes
Candidates an	swer on the Question Paper.	
No Additional N	Materials are required.	
READ THESE	INSTRUCTIONS FIRST	
•	tre number, candidate number and name on all the work you hand in.	

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use

This document consists of 24 printed pages.

[Turn over

1	Giv	e three tasks carried out by an operating system.
	1.	
		[3]
2	A u	ser decides to use an Internet search engine to help locate a hotel.
	(a)	What is a search engine?
		[1]
	(b)	Give two possible problems the user might encounter when using a search engine.
		1
		2
		[2]

(c)	The search engine found the website of a suitable hotel.		
	Give three features you would expect to see on a hotel website.		
	1		
	0		
	2		
	3		

3

	orker at a company has to go through a logon procedure to gain access to her computer tem.
(a)	The first thing she has to do is type in a user name and a password.
	Why is this done?
	[1]
(b)	The <i>password</i> is typed in twice.
	Why is this done?
	[1]
A m	nenu then appears on her screen. She chooses to connect to the Internet.
(c)	Describe two ways her computer system is protected against loss or corruption of files once the computer system is connected to the Internet.
	1
	2
	[2]

(d)	The	ne worker leaves her computer system for a 10-minute break.		
	(i)	From a health and safety aspect, why does she need to take a regular break?		
	(ii)	Apart from switching off her machine, how could she ensure her computer system was secure whilst taking her regular break?		
		[2]		

4 The following diagram shows a typical expert system.

[2]

(a) Name the missing labels W to Z using the following list of possible options.

		Inference Engine	Expert System Shell	
		Knowledge Base	User Interface	
	w			
	X			
			[4]	
(b)	Name one of the co	omponents that makes up the	knowledge base.	
			[1]	
(c)	Give one advantag	e and one disadvantage of us	ing expert systems.	
	Advantage:			
	Disadvantage:			

)	Name two examples of the use of expert systems.
	1
	2
	[2]

5 Study the following flowchart very carefully:

START count = 1total = 0X = 0**INPUT** number Yes Is number > 0? total = total + number X = X + 1No count = count + 1Yes Is count <= 10 ? No average = total/X **OUTPUT** average **STOP**

For Examiner's Use

(a) Complete the trace table for the following data set:

15,	-2,	0.	8,	0,	21,	-8,	-12,	1,	25
. •,	-,	Ξ,	•,	•,	— · ,	Ξ,	· —,	٠,	

For
Examiner's
Use

count	number	total	X	average	OUTPUT

_	4	7
L	/1	1
ı.	7	. 1

(b)	What is the purpose of this flowchart?

[1]

6	Describe the role of computer software and hardware when producing animation effects in the television and film industry.					
	•••••					
	•••••					
	•••••					
	•••••	•••••				[3]
7	A s	pread	dsheet has been set u	p to compare the cos	sts of types of fruit juid	ce sold by a shop.
			Α	В	С	D
		1	NAME OF FRUIT JUICE	NORMAL PRICE PER BOTTLE (\$)	VOLUME OF BOTTLE (LITRES)	COST PER LITRE (\$)
		2	Apple	3.50	1.0	3.50
		3	Orange	2.80	1.0	2.80
		4	Pomegranate	4.55	0.7	6.50
		5	Caju	2.00	2.0	1.00
	-	6	Mango	1.05	0.7	1.50
		7	Iviarigo	1.03	Average cost:	3.06
	(a)	(ii)	What formula is in cel What formula is in cel litre?			
						[2]
	(b)	Wha	at validation check cou	uld be carried out on	the data in cells B2 to) B6?
						[1]

(c) Three extra columns are to be added to this spreadsheet:

Column E will show a percent discount on the normal price of a bottle of fruit juice (as shown in column B);

Column F will show this discount in dollars (\$);

Column G will show the price of a bottle of fruit juice after discount.

Complete the spreadsheet by showing the **formulas** that need to be placed in cells F2 to F6 and G2 to G6.

	Е	F	G
1	Percentage discount (%)	Discount amount (\$)	Discounted price per bottle (\$)
2	10		
3	20		
4	15		
5	10		
6	5		

[4]

For

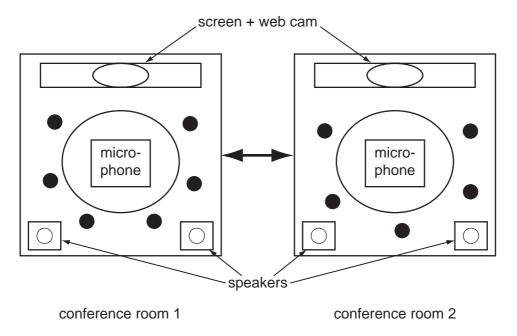

Examiner's Use

	ny computer-controlled systems use sensors to gather physical data. For example, perature sensors are used in the control of central heating systems.							
(a)	a) Name three other sensors and give a different application for each named sensor.							
	Sensor 1:							
	Application:							
	Sensor 2:							
	Application:							
	Sensor 3:							
	Application:							
	[6]							

(b)	systems.		sensors	are	used	in	computer-controlled	central	heating
		•••••	 		••••••				[31

9 An international company uses video-conferencing. The system is set up as follows:

For Examiner's Use

(represents a person at the meeting)

(a) Describe how the video-conferencing system works.

 	 	 	••
 	 	 	•
 	 	 [4	-]

(b) (Give two reasons why video-conferencing is gaining in popularity.
1	1
2	2
	[2]

10 (a) Two logic gates are the AND gate and the OR gate. Complete the truth tables for these two gates:

For Examiner's Use

AND gate

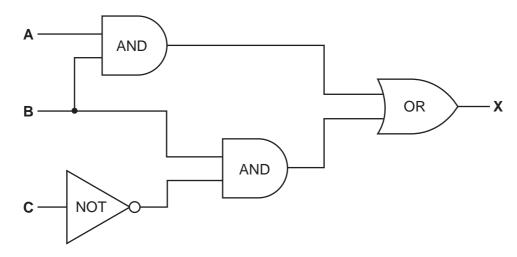

Α	В	X
0	0	
0	1	
1	0	
1	1	

OR gate

Α	В	Х
0	0	
0	1	
1	0	
1	1	

[2]

(b) Complete the truth table for the following logic circuit:

Α	В	С	х
0	0	0	
0	0	1	
0	1	0	
0	1	1	
1	0	0	
1	0	1	
1	1	0	
1	1	1	

[4]

11	(a)	Describe three features you would expect to find in a Computer Aided Design (CAD) package.
		1
		2
		3
		[3]
		[v]
	41.	O: 41
	(b)	Give three different applications where CAD might be used.
	(b)	
	(b)	1
	(b)	1
	(b)	2
	(b)	2

12	Mai time	ny vehicles use Global Positioning Systems (GPS) to know their exact location at all es.
	(a)	How does GPS work?
		[0]
		[3]
	A ta	axi company uses GPS in all its vehicles.
	(b)	One of its taxis is on Main Street and needs to go to Railway Street.
		How is GPS technology used to help the taxi driver get to his new destination?
		rol
		[2]
	(c)	Name one other feature of GPS that could be useful to the driver.
		[1]

	(d)	Give two reasons why the GPS could take the driver to the wrong destination or cause error messages.		
		1		
		2		
		[2]		
13	It ha	as been decided to model the traffic flow at a busy road junction.		
	(a)	Describe how data is gathered for this model.		
		[3]		
	(b)	Give two reasons why a model is used.		
		1		
		2		
		[2]		

14	(a)	Name and draw two common types of network topology.			
		Type 1:			
		[2]			
	(b)	Give two advantages of networking computers.			
		1			
		0			
		2			
		[2]			
		[2]			

15 A database showing the population of world cities has been produced. A section of the database is shown below.

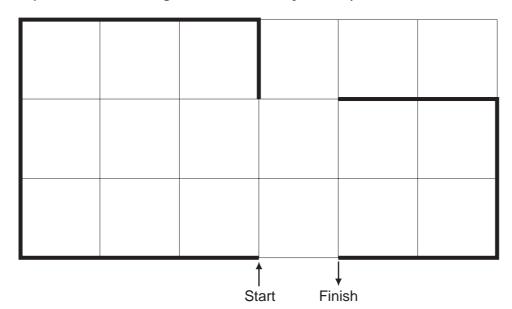

Ref No	Name of City	Country	Area	City Population (m)	Urban Population (m)	Capital
1	Tokyo	Japan	Asia	33.2	34.1	Yes
2	New York	USA	America	17.8	21.9	No
3	Sao Paulo	Brazil	America	17.7	20.2	No
4	Seoul	S Korea	Asia	17.5	22.3	Yes
5	Mexico City	Mexico	America	17.4	22.7	Yes
6	Osaka	Japan	Asia	16.4	16.8	No
7	Manila	Philippines	Asia	14.8	14.9	Yes
8	Mumbai	India	Asia	14.4	19.7	No
9	Jakarta	Indonesia	Asia	14.3	17.2	Yes
10	Calcutta	India	Asia	12.7	15.6	No

(a)	How many records are shown above?	
	T ₂	11
		1]
(b)	Using Ref No only, which records would be found if the following search condition wa typed in	S
	(Country = "India" OR Area = "America") AND (Capital = "No")	
		••
		2]
(c)	Write a search condition to find the cities in Asia with a city population greater than 17 million OR an urban population greater than 20 million.	n
		••
	[2	2]
(d)	Give one advantage of using Y or N rather than Yes or No in the Capital column.	
		••
	[′	1]
		-

16 A floor turtle can use the following instructions:

Instruction	Meaning
FORWARD d	Move d cm forward
BACKWARD d	Move d cm backward
LEFT t	Turn left <i>t</i> degrees
RIGHT t	Turn right <i>t</i> degrees
REPEAT n	Repeat the next set of instructions <i>n</i> times
ENDREPEAT	End of REPEAT loop
PENUP	Raise the pen
PENDOWN	Lower the pen

(Each square in the drawing below is 10 cm by 10 cm.)

Complete the set of instructions to draw the above shape (shown in bold lines).
PENDOWN
LEFT 90
REPEAT

[5]

17 Daniel lives in Italy and travels to Mexico, India and New Zealand. The times differences are:

For Examiner's Use

Country	<u>Hours</u>	<u>Minutes</u>
Mexico	-7	0
India	+4	+30
New Zealand	+11	0

Thus, if it is 10:15 in Italy it will be 14:45 in India.

- (a) Write an algorithm, using pseudocode or otherwise, which:
 - Inputs the name of the country
 - Inputs the time in Italy in hours (H) and minutes (M)

Outputs the country and the time in hours and minutes

- Calculates the time in the country input using the data from the table
- (b) Describe, with examples, two sets of test data you would use to test your algorithm.

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (UCLES) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

University of Cambridge International Examinations is part of the Cambridge Assessment Group. Cambridge Assessment is the brand name of University of Cambridge Local Examinations Syndicate (UCLES), which is itself a department of the University of Cambridge.
