UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2010 question paper for the guidance of teachers

0654 CO-ORDINATED SCIENCES

0654/52

Paper 52 (Practical), maximum raw mark 45

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2010	0654	52
	urements entered correctly; learly in mm;		[2]
` '	ct method for calculating average; ct answer according to candidate's data;		[2]
. , . ,	orrect numbers of leaves in each range according learly;	to candidate's ow	n data entered [2]
C	orrect scales; orrect plotting; orrect drawing of bars (should be even width);		[3]
(d) range	calculated correctly according to student's data;		[1]
corre	ct number of complete squares; ct number of greater-than-half incomplete squares; ct calculation of area;		[3]
e.g. variat	uitable factor + explanation ion in light intensity/carbon dioxide; different rates of photosynthesis;		
•	so have different water/mineral availability		[2]
			[Total: 15]
(a) mass	of can to nearest gram;		[1]
(b) record	ded to nearest 0.5 °C;		[1]
(c) (i) s	ensible temperature measured to 0.5 °C;		[1]
(ii) s	ensible volume of water;		[1]
(iii) n	nass of water correctly calculated;		[1]
(d) each	correctly calculated;;		[2]

				IGCSE – May/June 2010	0654	52
((e)	.,	rearı corre	ect substitution; ranging the equation; ect calculation; parison with supervisor +/- 1 J;		[4]
		(ii)	corre	ect conversion to J kg ⁻¹ °C ⁻¹ ;		[1]
((f)	mas powe time		[3]		
						[Total: 15]
3 ((a)			ngs for 5 experiments;; k if any space in the timing columns		[2]
((b)			cross table increase; own each column decrease;		[2]
((c)	corre	ect c	ompletion of third column in table;		[1]
((d)	plott	sible ing c	rect; scale; correct; curve drawn;		[4]
((e)			eases with concentration; s at any given time with the 2 M;		[2]
((f)	gas	still b	peing released;		[1]
((g)	amo	unt c	experiment using powder Mg, must use same mass of gas at each time will be greater; surface area is the reason;	of Mg;	[3]

[Total: 15]
