UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2012 question paper for the guidance of teachers

0445 DESIGN AND TECHNOLOGY

0445/32

Paper 3 (Resistant Materials), maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2012	0445	32

Section A

1	(a)	Greater freedom without cord, ease of use, use it anywhere, easily moved around	, portab	le [1]
	(b)	Not as powerful, needs recharging, can run flat, needs batteries		[1]
2	(a)	Flat/hand Half round/ed Round/ed or Rat tail Square/d 4 square	(4x1)	[4]
	(b)	Check to make sure that the handle is not loose, handle fixed firmly/securely, safe it	handle	on [1]
3	(a)	Vernier callipers. Accept vernier gauge, vernier		[1]
	(b)	Accurate measuring of internal/external diameters/depth, thickness		[1]
4	(a)	Even drying out of timber, produce high quality wood, does not need/use energy		[1]
	(b)	Faster than open air seasoning, can be controlled		[1]
5	(a)	ABS, polycarbonate, polypropylene, polyimide [nylon]		[1]
	(b)	Stainless steel, aluminium, copper		[1]
6	Cor	rect labels: mortise tenon shoulder haunch	(4x1)	[4]
7	Two	o ways include: plane to middle, stop, [plane from other end] position scrap wood at end of grain		
		use a shooting board clamping the edge during planing	(2x1)	[2]
8		mpleted drawing of 'foot' shown against edge of metal mpleted drawing of spur making the mark	(1) (1)	[2]
9		wing of blockboard to show top and bottom plies wing of blockboard to show strips running along length	(1) (1)	[2]
10		o benefits: positive grip, good leverage, easy to undo, fits exactly into hole, strongly on key doesn't take up much room, no slippage, ensures screw is tight	tighten (2x1)	ed, [2]

Section B

11 (a)		Award 1 mark for ref. to human measurements. Award 1 mark for ref. to tray design Anthropometric data includes: height of tray, width of tray is dependent on reach / access by person using it. Reference to hands/arms.						
		•	² 2 marks there must be reference to the tray sizes in relation to the person.		[2]			
	(b)	Sor	Allow modification to original construction Some form of pivot: metal or wooden pegs or metal hinge shown Additional notes and details: e.g. name of hinge/screws, important sizes					
	(c)	(i)	2 ways to prepare dowel include: chamfer saw cut across end	(1) (1)	[2]			
		(ii)	sash cramp shown clearly across clamping legs correct position over dowel	(0-2) (1)	[3]			
		(iii)	Adhesive: accept trade names such as EvoStik Resin W, Cascamite or gene such as synthetic resin or PVA	ric term	[1]			
			Drying time must correspond to named adhesive: for example: PVA 1-3 hours, Cascamite 6 hours, Aerolite 6 hours.		[1]			
	(d)	Must be a sketch for 2 marks. Notes only award 1 mark. Lipping to edges of tray, some sort of hand holds, holes or recesses for cups, use of plasurface, legs redesigned for comfort, replace dowel with rectangular rail						
		AW	ard 0-2 for each improvement.	(2x2)	[4]			
	(e)	(i)	polyurethane varnish suitable: protects, hardwearing, tough, durable, resistar heat/moisture, attractive finish, smoother surface	nt to	[2]			
		(ii)	Preparation only: apply medium grade of glasspaper, wipe down, repeat with finer grade of glasspaper,	(0.4)	.			
			wipe down.	(3x1)	[3]			
	(f)		dvantages: more durable / resistant to marks, can be attractive appearance, ea be down and remove marks, no finish needed, more attractive than wood	asier to	[2]			
12	(a)		perties: relatively cheap, durable, easy to shape, high tensile strength, malleat rk with, easy to bend, hard, tough, strong enough to hold tools	ole, easy	to [2]			
	(b)	2 p too	ieces of information: type of tools to be stored, how many, where, sizes of tools	s weight	of [2]			
	(c)		t out shape [radiused ends not necessary] le positions [centres marked or holes drawn]	(1) (1)	[2]			

Page 4		ı	Mark Scheme: Teachers' version Syllabus		Paper			
				IGCSE – May/June 2012	0445	32		
	(d)	(i)		tre punch provides location for drill, drill will not slip,	prevents distorte	d hole,		
			accu	urate, hole is drilled accurately			[1]	
		(ii)	 2 safety precautions: clamp work piece down, scrap material underneath, correct speed, remove chuck key, drill secure, guard in position 					
			Acce	ept references to personal safety: goggles, hair tied	back, jewellery re	emoved.	[2]	
	(e)		ason k out	s: speed, repetitive accuracy, avoids individual marl	king and measuri	ng, easier to	[2]	
	(f)	(i)	steel cut v limite accu	ing the mild steel: I held in vice or hand or clamped with tin snips or cold chisel sketched ed use of shears/hacksaw 1 only uracy of named tools rences to CAM must be supported with detailed acc	urate information	(1) (0–2) (1)	[4]	
		(ii)	sketo being and	ding the mild steel: ch showing steel held in a vice g shaped around a former/round rod hit with a wooden mallet/hammer and scrap wood uracy of named tools		(1) (1) (1) (1)	[4]	
	(g) (i) 2 reasons: protect the steel, preserve material, improve appearance, cover scratche(ii) Prepared for painting: accept reference to file /filing, wire brush, steel wool, wet an						[2]	
			dry, clean and degrease metal, medium grade and fine grades of emery cloth, support/set up work for painting				[2]	
	(h)	Nar	ned r	f round head screw ound head screw ept raised head screw		(1) (1)	[2]	
13	(a)	Ergonomics considered: clear layout of paints, finger 'dips' for ease of access to paints, overall size for carrying. (Quality of explanation 0–2)					[2]	
	(b)	(i)	Acce	ctical solution includes some sort of applied bead/co ept sitting on its own base. itional notes: reference to any one of materials, size		(0-2) g (0-1)	[3]	
		**-*		·		. ,		
		(ii) 2 advantages of using vacuum formed tray: paints fit individually, lightweight for carryin easier to clean, no sharp corners, easily removed and replaced, paints fit better [ing, [2]

Syllabus

Paper

[1]

Page 4

(c) (i) butt hinge

	(ii)	marking knife, try square, marking gauge		[2]
ı	(iii)	Use of mallet and chisel to cut out recess Method described	(0-2) (0-1)	[3]
(d)		etch showing use of rebate, groove or applied bead. ditional explanatory notes	(0–2) (0–1)	[3]
(e)	Acc Use	-manufactured fitting: hasp and staple, catches, clips and locks curacy of recognised fitting of unrecognised/improvised fitting award maximum 2 marks. Block drawn without hasp and staple award 0 mark.	(0-3)	[3]
(f)	Bris Det Incl	ntbrushes stored securely stles protected ails of materials and fittings uding: vacuum forming, strips/blocks of wood, use of compliant materials such I rubber bands	(0–2) (0–2) (0–2) as leath	[6] ner
