UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2006 question paper

0455 ECONOMICS

0455/04

Paper 4, maximum raw mark 80

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

The grade thresholds for various grades are published in the report on the examination for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2006 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

|---|--------|---|--|-----------------------|--------------|
| | | | IGCSE - OCT/NOV 2006 | 0455 | 4 |
| 1 | (a) | boost to e by encour introducin improved any other 1 mark ea | effects (do not expect this term) | | [4] |
| | (b) | increased required t Identificat | of the idea of specialisation and opening markets worldwide, produced efficiency, more competition, wider choice, lower prices. Note: to know about specialisation at international level but not about cation up to 3 marks. Explanation up to 3 marks. Ites only deal with the first sentence, maximum of 4 marks. | core candidates ar | е |
| | (c) | manufact | be unemployment if clothing manufacture ceases (1), but this coure of pharmaceuticals (1), boost exports (1), the great advantagetion was much cheaper than other countries (1). Straight copying | e that B has, was tl | nat |
| | (d) | One industry is very labour intensive, the other is not. 50,000 currently in medicines, 1.8m currently in clothing. | | | |
| | | Occupation | onal immobility of labour. e.g. lack of skills. | | |
| | | | onal companies may be wary of locating in Bangladesh, due to p re do not expect candidates to demonstrate a detailed knowledge | | [6] |
| 2 | (a) | Equilibrium: 1 Demand = Supply; 1 no tendency to change; 1 diagram: up to 3 marks. Disequilibrium: 1 Demand does not equal Supply; 1 excess Supply; 1 excess Demand; 1 diagram; up to 3 marks. [4 (Note – candidates do not have to include a diagram.) | | | gram; [4] |
| | (b) | | d demand because, for example, of an increase in incomes. 2 diam 1, shift 1); 2 explanation. Maximum of 4 marks. | agram (labels and | |
| | | Increased supply because, for example, cost reduction. 2 diagram (labels and equilibrium 1, shift 1), 2 explanation. Maximum of 4 marks. [6] (Note – if candidates include 2 diagrams, credit the labelling once only.) | | | , |
| | (c) | | nition either in terms of formula or in words; 3 for suggested factors, proportion of income. (May get all 3 for one point if sufficiently | | ty of [5] |
| | (d) | therefore but sales 2 conclus | ge of price elasticity would enable the company to anticipate the end on its revenue and profit if it changed its price; e.g. if it raised its revenue and profit would rise if demand were inelastic. 3 explantion. Inaximum of 3 marks if no reference to holiday towns.) | price, sales would | fall, |
| 3 | (a) | | t of any four factors. e.g. Working conditions, holiday entitlemen ons, travel time, career prospects, fringe benefits. | t, lack of appropriat | te [4] |
| | (b) | | on of the sectors. 3 marks. Description of the changes that migl the primary, secondary and tertiary sectors. 3 marks | nt occur in the balar | nce [6] |
| | (c) | | on of the meaning of the term – employees, similar trade/service onditions of employees. | , aim of improving | [3] |
| | (d) | | naximum of 5 marks for a descriptive account of the relative stren 2 marks can be awarded for either the theoretical context or appl ons. | | s. [7] |

| of the meaning of these. Full employment, economic growth, redistribution of income, balan payments stability. 1 identification, 1 explanation in each case. (c) Candidates could explain cost-push inflation or discuss it as a direct consumer price increase (d) Increased direct taxes, increased interest rates, reduce government expenditure etc. Up to for one action thoroughly discussed. 5 (a) Explanation of meaning of resources (up to 2 marks), and the conservation of those resource rather than their use. (up to 2 marks.) (b) Beneficiaries could be the developers, the people who will use the development – it might be shopping precinct, new commercial premises or a housing estate. Employment should incre neighbouring businesses might benefit, transport providers should benefit. Who would be the beneficiaries up to 3 marks, why they would benefit and particular situations up to 3 marks. (c) Explanation of regulations, licences, taxes. (Note – not all three are required; one or two, if 6 well, could gain all 3 marks.) (d) Answer could mention externalities from the development, visual intrusion, noise, pollution, destruction of homes, communities, or possible loss of profits to existing businesses from ne competition. 6 (a) 3 marks for each pair. (Examples of each pair, 1 mark.) (b) Comment on the need to raise revenue and the uses to which the government puts the reve Taxes can also be used to redistribute the income/wealth. Correction of market failure, pron of macro aims. 1 for identification and up to 2 marks for development per point. Maximum 4 marks for list of points. (c) Effect on prices, growth, employment, exports, imports, migration, incentives, government re and spending, saving and investment. Identification alone up to 4 marks. 7 (a) Fixed 1, Variable 1, Average 1, Total 1. (b) Discussion of effect on costs, fixed will increase, if labour is classed as variable it will decrease because of efficiency. Classification of costs 2 marks, consideration of efficiency of factors 2 conclusion 2 marks. | | | 10001 001/1101 2000 | - | |
