UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the June 2005 question paper

0680 ENVIRONMENTAL MANAGEMENT

0680/01 Paper 1 (Alternative to Coursework), maximum mark 60

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

 CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the June 2005 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Grade thresholds for Syllabus 0680 (Environmental Management) in the June 2005 examination.

	maximum	minimum mark required for grade:				
	mark available	А	С	E	F	
Component 1	60	43	26	19	15	

The threshold (minimum mark) for B is set halfway between those for Grades A and C.

The threshold (minimum mark) for D is set halfway between those for Grades C and E.

The threshold (minimum mark) for G is set as many marks below the F threshold as the E threshold is above it.

Grade A* does not exist at the level of an individual component.

IGCSE

MARK SCHEME

MAXIMUM MARK: 60

SYLLABUS/COMPONENT: 0680/01

ENVIRONMENTAL MANAGEMENT (Alternative to Coursework)

		IGCSE – JUNE 2005	0680	1	
1 (a)	(i)	Two countries correctly plotted; 2 x 1 = Allow a little leeway esp on income.	, , , , , , , , , , , , , ,		
	(ii)	The higher the income per head, the higher the energy consumption; higher domestic use of energy/higher industrial use; (development) because of (e.g.) more domestic machinery/greater industrial output owtte.			
		Allow answers that refer to developed and undeveloped 2 distinct groupings on the graph, usually for just 1 m	•	s as [3]	
(b)		Advantage: Very little natural resource/uranium needed (relatively) abundant)/waste limited/waste easily disp (air) pollution/; ® cheap, but acc. Cheap to run.	(allow reso posed of/little		
		<u>Disadvantage:</u> Waste around for a long time/risk of major disaster to set up/nor safe; ® cause a lot of pollution.	(owtte)/expen	sive [2]	
(c)		Increased efficiency in use; insulation/recycling/pominimise use in transport by walking/cycling/car shaetc.			
		and/or			
		new technology/renewable/alternative; wind/tidal/wa 3 marks, they must mention at least 2 ways, bu strategies is ok.			
		® just decrease use without how, vague ref. to laws	to stop use.	[3]	
				[Total: 10]	
2 (a)	(i)	Because the pollution can be trapped in the valley, o	wtte.	[1]	
	(ii)	Soil erosion/mudslides down the valley sides; becatrees to hold the soil together increased floor off/reduced farming opportunity.			
(b)	(i)	Disease spreads/eutrophication (stated or explained water poisoned.)/death of fish	/® [1]	
	(ii)	Laws to prevent pollution/fines on pollution, owtte; before disposal; water treatment after disposal; educuse; filter water; chlorinate water.			
(c)		Landscaping/restoration/reclamation/waste manage Allow development marks, so that one well-explaine get all 3 marks. Such points as afforestation/growitopsoil/neutralise soil/liming of fresh water.	ed strategy c	ould	
				[Total: 10]

			IGCSE – JUNE 2005	0680	1	
3	(a)	(i)	Correct way round (warm then cold).			
		(ii)	Two systems of circulation; one (system) in the North Atlantic and one in the South Atlantic; named currents within the circulation; Give one, or two marks for a description of correct details.			
			Circular/clockwise/anticlockwise.			
		(iii)	Reduce temperatures in (summer); reduce precipitation from winds coming from over the sea; may cause coastal fog; examples.			
	(b)	(i)	Fish a body of water so extensively as to exhaust the supply of fish/more than they should owtte ® catch more feed than needed etc.			
		(ii)	Fishermen stand to lose out in the short term if there are restrictions, so they will be unwilling to comply; if they are controlled in coastal waters, they are likely to go further into international waters; where			
			international action is the only solution.		[3]	
					[Total: 10]	
4	(a)	(i)	The heavy rain.		[1]	
(ii) De		(ii)	Deaths much higher in Bangladesh/or give figures.			
	(iii) Homelessness/house destroyed/large area flooded/ ® disease		® diseases.	[1]		
country USA is people Bangla Revers (c) Helps frice/Th			Basically, the difference between a developed and a developing country: USA can afford better flood defences; (credit examples); USA is likely to have better flood warnings; means of evacuating people when warnings are given; population more dense/higher in Bangladesh. Better medical/infrastructure.			
			Reverse arguments can be credited.		[3]	
)	Helps farming by either flooding the land when you rice/The floods may deposit fertile silt/water washes chance to build better house eq	•	•	
	(d)		Accept yes or no answers; though 'no' is more I reasons only:	ikely. Marks	; for	
			Yes ; is about enabling people to have longer to get flood warning is given well in advance	out of the way	≀ if a	
			<u>Or</u>			
			No , is largely about the fact that in a developing conneed better infrastructure (roads; communication) if evacuated. People in poor country may ignore warn because need to carry on farming for life.	people are to	o be	
		Credit arguments which give both reasons for yes and no.		[3]		
	[Tot		[Total: 10]

	<u> </u>		IGCSE – JUNE 2005	0680	1
5	(a)	(i)	Introduction of high yielding/hybrid varieties of rice and/or wheat; into developing countries; use of pesticides/herbicides; improved management; increased use		
			of mechanisation/machinery/modernisation of farming.		
		(ii)	One mark for correctly drawn axes; two marks for correctly plotted figures. One major mistake loses one mark. If axes wrong way round still credit correct plotting with axes candidate has drawn. Can be either bar chart or line graph.		
		(iii)	General upward trend; drop between 1931 and 1961/slow increase at first/doubled.		
	(b)		Yes : good because then the full benefits of increased yields can be felt; many plots of land far too small; to be efficient		
			And/or		
			No : unemployment; less technology; bad because poorer farmers may lose their land; thus all the benefits of land ownership; such as secured food for family/profits for own use.		
			Allow credit for answers which give arguments for bot	h yes and no	o. [3]
					[Total: 10]
6	(a)	(i)	Algae/mosquito larvae/crayfish/raccoon/female mosquess 1; arrows not drawn or drawn in wrong direction in		ror [3]
		(ii)	The sun/light owtte.		[1]
	(b)	(i)	Any suitable strategy plus development. For the two: e.g.		
			pour oil on water; kill larvae owtte;		
			drain ponds etc.; remove mosquito habitatpesticides; kill adults		
			introduce natural enemies (e.g. increase frog nos. by introductions; eat adults)	I	
	(A) use of chemicals that kill but not just chemicals.			[2]	
	(ii)		Loss of mosquitoes leads to effects on other orgaliscussed for two, 2 marks each discussion. e.g. Raccoon nos. go down; loss of larvae as foo down; reduction in crayfish; frog nos. go down mosquitoes as food small fish go up; more algae to each any species in the web would be affected, for mark correct direction with suitable explanation. Accept exas nos. go down.	d hawk nos ; loss of r at etc. k effect mus	. go male t be
			Allow credit for discussion of food chain effect.		[4]
	[Total			[Total: 10]
