

CAMBRIDGE INTERNATIONAL EXAMINATIONS
International General Certificate of Secondary Education

MARK SCHEME for the May/June 2013 series

0460 GEOGRAPHY

0460/22

Paper 2, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Page 2	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2013	0460	22

- 1 (a) (i) 10m [1]
- (ii) 1 km² [1]
more than one answer = 0
- (b) (i) A/Main A/A3 [1]
- (ii) embankment [1]
- (iii) cultivation/plantation [1]
- (iv) marsh/swamp [1]
- (v) water tank [1]
- (vi) bridge [1]
- (vii) district (boundary) [1]
more than one answer = 0

(c)

	Pte Moyenne (8495)	La Mecque (8694)	Both these areas	Neither of these areas
coral	✓			
a river or watercourse			✓	
a populated area		✓		
forest				✓
gentle slopes			✓	

more than one tick per row = 0

- (d) hilly/hill/high/mountain/upland (don't extract from place name)
steep
cliffs (steep cliffs = 1)
any height between 400m and 630m (allow 446m as highest point)
ridge/spur
col/saddle/pass
concave slope
V-shaped valley
flatter/gentle in south/in 8991/9091/9191/at poultry farm/at sugar plantation
(As alternative to this line allow "steeper in the north".) [3]
- (e) (i) 2500 – 2650 (metres) [1]
- (ii) N/NNE/NE [1]

Page 3	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2013	0460	22

- (f) 1 in 2/1 in 2.3/1 in 2.33
1:2/1:2.3/1:2.33
50%/43%/42.9%/42.85%

Don't allow other expression e.g. "2.3" [1]

- 2 (a) (i) 8 middle order settlements plotted
ignore position, width and shading of bar [1]

- (ii) 40
more than 1 tick = 0 [1]

- (b) (i) sphere of influence to include the nearby village but not touch any of the other towns
(ignore other villages and other sphere of influence) [1]

- (ii) other nearby settlements/village/town (but not city) to provide services
low order services/few services/no high(er) order services
services have small range/people won't travel far for services
poor transport links
allow "goods" or "functions" for "services" [1]

- (c) (i) frequent use/everyday needs
no need to travel far/they are close/less than 1km/little travel time/cost [1]

- (ii) population is small/small settlement/not enough customers
these services have a large(r) threshold population/high(er) order services/
middle order services [1]

- (iii) furniture store
airport [1]

- (iv) easier transport to Z/poorer transport to A
better quality at Z/poorer quality at A
more choice/larger store at Z/poorer choice/smaller store at A
cheaper prices at Z/more expensive prices at A
other services available at Z
better reputation at Z/poorer reputation at A
doesn't need to be comparative – could be solely on X or A
accept best point [1]

Page 4	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2013	0460	22

- 3 (a) Erosion: waterfall
notch/V cut by stream/path cut by stream (allow other expressions)
plunge pool
undercut
stepped profile (allow terraced)
valley at top of photo
exposed rocks/lack of soil/lack of vegetation
- Weathering: harder layers stand out/bedding planes opened/cracks wide(ened)
vegetation growing in cracks/in rocks/on cliff (not just on rocks)/
vegetation shows biological/chemical weathering
fallen/disturbed/loose blocks/boulders/rocks/stones/slabs/layers
- reserve one mark for each section
no transfer between sections [4]
- (b) (i) boulders/large rocks/large stones
different sizes/large and small
rounded/smooth
red/orange/colour variation/coloured altered (but not black)
joints/cracks
layers peel/onion skin effect
- don't allow points clearly linked to erosion [3]
- (iii) exfoliation
freeze-thaw/frost shattering
- any chemical process spoils the answer [1]
- 4 (a) (i) there are active volcanoes in Africa, Asia, Europe, North America and South America [1]
- (ii) there are active volcanoes close to most coastlines of the Pacific Ocean [1]
- (iii) most active volcanoes are close to plate boundaries [1]
- (b) Laki: plates diverge/constructive margin
hotspot/hot area within mantle
melting/rising magma/magma escapes
- All others: plates converge/destructive margin
subduction (allow if it is the wrong plate)
melting/rising magma/magma escapes
- If volcano chosen not from Fig. 6 MAX 1 – don't allow the first point [2]

Page 5	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2013	0460	22

- (c) eruption of Tambora/Laki/volcano 1/volcano 3/Iceland/Indonesia
produced ash cloud
blocked sun/solar radiation
cooling/prevented heading of Earth/atmosphere/land (not just areas)
worldwide/affected large area
long term/affected whole area [3]
- 5 (a) Iron ore mines: in south
in east/north-east/near Bay of Bengal
Coal mines: in centre/inland
in east/north-east/near Bay of Bengal
Allow “near Jamshedpur/steel works” once for either section
reserve one mark for each section [3]
- (b) (i) iron ore from East Singhbhum/Sundargarh/Keonjhar/Durg/1/2/3/4
coal from Jhana/Raniganj/Bokara/Talcher/Bisrampur/Korba 1/2/3/4/5/6
iron ore and coal nearby/within 250km/in north east of country/
surrounded by iron and coal mines [2]
- (ii) lake/river/Subamarekha River/Kharkai River [1]
- (iii) railway/train [1]
- (iv) vehicles/earth moving equipment/metal sheets/cables/pipes/
wire industries 1–5
other industries/local industries [1]
- 6 (a) large sector $100 - 102^\circ = 2$ (independent of key)
large sector $98 - 104^\circ = 1$ (independent of key)
correct use of key = 1 [3]
- (b) strong winds [1]
- (c) correct option and explanation required in each case
only one correct option in (i), (ii) and (iii) but either option possible in (iv)
reference to wind action = 0
answer could be by giving a positive reason for the choice or by stating why the
alternative was rejected
- (i) Leave strips of vegetation between the plots
vegetation will intercept/trap/absorb/protect from rain/water
vegetation will prevent water from flowing/runoff
vegetation will trap/bind/hold/stabilise/keep soil together [1]

Page 6	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2013	0460	22

- (ii) Plough horizontally across the slope of the hillside
prevent water from flowing/prevent runoff/allow water to sink in [1]
- (iii) Grow a different crop on each plot for the first three years
retain/replace soil nutrients/minerals
different crops use minerals
maintain soil structure/humus/organic content [1]
- (iv) Fence the land and keep animals away
will prevent animals grazing until soil is bare/prevent overgrazing
prevent removal of protective vegetation
animals trample/hooves/movement/damage roots
old crop will maintain soil structure/minerals/humus/organic content [1]
- (v) Allow cattle to graze on the remains of the crop after harvest
dung will maintain the soil structure/humus/organic content
dung will replace minerals/nutrients
(for “soil structure” allow phrases like “keeps soil together”) [1]
