READ THESE INSTRUCTIONS FIRST

Make sure that your **Centre number**, **candidate number** and **name** are written at the top of this page and are clearly visible on every printout, before it is sent to the printer. Printouts with handwritten information will **not** be marked.

DO **NOT** WRITE IN ANY BARCODES.

Carry out **every** instruction in each step.

Steps are numbered on the left hand side of the page. On the right hand side of the page for each step, you will find a box which you can tick (✓) when you have completed it; this will help you track your progress through the test.

At the end of the exam put this **Question Paper** and **all** your printouts into the Assessment Record Folder.

If you have produced rough copies of printouts, these should be neatly crossed through to indicate that they are **not** the copy to be marked.

This document consists of 7 printed pages and 1 blank page.

You work for a company called *Hothouse Design*. You are going to perform some clerical tasks for this company.

to

Never over estimate your own ability.

- 27 Insert a table with five columns and five rows after the text *Here are some courses we have on offer:*
- 28 Enter the following data into the table:

- 34 Save the document.

You are going to prepare some reports for the company

- 35 Using a suitable database package, import the file **N10EKS.CSV**

Assign the following data types to the fields.

Make	Text
Model	Text
Size	Numeric / 1 decimal place
Price	Currency / 2 decimal places
Skill level	Text
Wind condition	Text
Use	Text
Number	Numeric / Integer
Stock item	Boolean / Logical

Make sure that you use these field names. You may add another field as a primary key field if your software requires this.

Save a screen shot showing the field names and data types used. Print a copy of this screen shot. Make sure that your name, Centre number and candidate number are included on this printout.

- 36 Insert the following three records:

<i>Make</i>	<i>Model</i>	<i>Size</i>	<i>Price</i>	<i>Skill level</i>	<i>Wind condition</i>	<i>Use</i>	<i>Number</i>	<i>Stock item</i>

Check your data entry for errors.

- 37 Save the data.

38 Produce a report which:

- contains a new field called **Order** which is calculated at run-time. This field will calculate the *Price* multiplied by 3
- has the *Order* field set as currency with 2 decimal places
- shows only the records where *Number* is less than 2 and *Stock item* is *Yes*
- shows all the fields and their labels in full
- fits on a single page wide
- has a page orientation of landscape
- sorts the data into ascending order of *Make* (with *Airush* at the top)
- calculates the total value of kites to be ordered and
 - shows this total value at the bottom of the *Order* column
 - formats this total value to currency with no decimal places
 - has the label **Total order value** for the total value
- includes the heading **Kites we need to restock** at the top of the page

39 Save and print this report.

- have your name, Centre number and candidate number at the bottom of each label.

The page layout may look like this

41 Save and print these labels.

42 Produce an extract from all the data which:

- selects only
 - small kites of less than size 3
 - those suitable for beginners
- shows only the fields *Make*, *Model*, *Size* and *Price*
- sorts the kites into ascending order of price.

43 Save this data in a form which can be imported into the document that you saved in step 34.

44 Import this data into your document as a table after the paragraph which ends: *Here are some small kites suitable for a beginner, some of which will still be suitable as you progress to intermediate skills:*

Make sure that all required fields and their labels are fully visible and that there is one blank line above and below the table.

45 Search the website address specified in the body of the e-mail from step 2 for a file that contains information on **EKS adventure trips**. Save this file in your work area.

46 Insert this text, as a table, into your document after the line *Here are details of planned trips:*

47 Format the table to match that of the table you created in steps 27 to 32.

48 Spell-check and proof-read the document.

Place page breaks, if necessary, to ensure that:

- tables do not overlap two columns or pages
- bulleted lists do not overlap two columns or pages
- there are no widows
- there are no orphans

49 Save the document.

Print the document.

50 Prepare an e-mail message:
