## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

**International General Certificate of Secondary Education** 

## MARK SCHEME for the May/June 2007 question paper

## 0418 INFORMATION TECHNOLOGY

**0418/01** Paper 1 (Written), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2007 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Question Number	Answer	Part mark
1	A Microphone B Light pen	1 each
	C Remote control D Memory stick	
	E Numeric keypad	
2	Plotter	1
	Robot arm	1
3 (a)	an OMR sheet	1
(b)	A bank cheque	1
(c)	a CD RW	1
(d)	a dot matrix printer	1
4	False	1
	True	1
	False	1
	False	1
	False	1
5	memory stick	1
	DVD R	1
	fixed hard disk drive	1
6	Right 90	
	Forward 75	
	Right 90	
	Forward 75	
	Penup	
	Forward 85	
	Pendown	
	Forward 65	
	Right 90	
	Forward 75	
	Right 90	
	Penup	
	Forward 40	
	Pendown	
	Forward 35	
	1 mark for each group of 3 statements	5
	i mant is sash group or a diatomonia	•

Page 3	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2007	0418	01

Question Number	Answer	Part mark
7 (a)	Three from:	IIIaiK
<i>i</i> (a)	Temperature	
	Moisture	
	Humidity	
	Light	
	pH	
	Gas sensor (O2, CO2)	3
(b)	Three from:	
	Name + what variable is changed.	
	water sprinkler/humidifier - humidity	
	heater/cooler/air con temperature	
	light bulb – light intensity/level	
	motor for opening/closing windows - temperature	
	fan – temperature	3
(c)	Five max. from:	
	temperature is compared with preset value	
	if lower microprocessor switches on heater	
	if lower microprocessor shuts windows	
	if higher microprocessor switches heater off	
	if higher microprocessor switches fan on	
	if higher microprocessor opens windows	
	moisture sensor constantly monitors moisture content of soil	
	humidity is compared with preset value	
	moisture level is compared with preset value	
	if lower microprocessor switches on sprinkler	
	if higher microprocessor switches off sprinkler	
	light is compared with preset value	
	if lower microprocessor switches on light bulb	
	if higher microprocessor switches off light bulb	5
(d)	Three explanations from:	
	Computers are more accurate than human beings	
	Computers can work continuously without taking a break	
	Computers do not forget to take readings	
	Computers can take readings more frequently	
	Computers can respond quicker to changes than human beings	3
8	three from:	
	Real thing may be:	
	Too dangerous	
	Too expensive	
	Too large a time scale required	
	Wasteful of materials	
	Too vast a scale	3

Page 4	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2007	0418	01

Question	Answer	Part
Number		mark
9 (a)	Problem – Headaches	
	Prevention – Use anti-glare screen/Take regular breaks	
	Problem – Eyestrain	
	Prevention – Use anti-glare screen/Take regular breaks	
	Problem – RSI	
	Prevention – Use ergonometric keyboard / wrist rests/Take regular breaks	
	Problem – Backache	
	Prevention – Use straight backed chair/Take regular breaks	
	1mark for each problem (2 max)	
	1 mark for each prevention (2 max)	4
(b)	Problem -electrocution	
	Prevention – RCB installed	
	Problem – trailing cables	
	Prevention – create ducts/cover cables with carpets etc.	
	Problem – heavy equipment falling	
	Prevention – sturdy tables	
	Problem – fire	
	Prevention – extinguisher	
	1mark for each problem (2 max)	
40 ( )	1 mark for each prevention (2 max)	4
10 (a)	three descriptions from:	
	observation	
	questionnaires	
	interviews	
	collecting documents	3
(b)	He could find details of a book more quickly	1
	He would save space in his bookshop	1
(c)	Maximum 5 from:	
	Title	1
	Author's name	1
	Reference number/ISBN/Publisher/Picture of cover/ Dewey number/	2 marks
	genre/ fiction or non-fiction/target age group/picture of author/date published/	for 4
	summary of contents/no. of copies/cost price/selling price/number of pages	items, 1
		for 3
		items
	Le di cii di AND i la la c	else 0
	Information fills the page AND is clearly a screen form	1
	Appropriate spacing for each field	1 1
(d)	typing in the data twice and comparing them	1
	visually comparing the typed in data with the original	1

Page 5	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2007	0418	01

Question Number	Answer	Part mark
11 (a)	two from:	
	computer works in digital	
	phone lines carry sound/analogue signal	
	need to convert digital to analogue/analogue to digital	2
(b)	Two from:	
	user id/account number	
	password	
	memorable name	2
(c)	Three from:	
	Causes data to be scrambled/encoded	
	Requires an encryption key/software to encrypt	
	Requires a decryption key/encryption software to decrypt	
	Results in data which is not understandable/readable	
	protects sensitive data	
	from being understood if falls in to the wrong hands.	3
(d)	Disadvantages to bank – <b>two</b> from:	
	Lose older customers who don't like change	
	Initial set up costs of equipment/ Initial outlay on computers expensive	
	Need to employ highly paid technical experts to maintain system	
	Initial large redundancy payments	
	Upset/Lose customers due to lack of personal touch	
	Greater risk of fraud so lose money/description of effects of phishing	
	Need to retrain staff	2
(e)	Disadvantages to customer – <b>two</b> from:	
	Lack of socialising/ social contacts	
	Identity theft/misuse of personal data	
	Customers must have a computer/Internet access/(basic) computer skills	
	Hackers may intercept data and defraud customer	
	Deprived of personal touch	
	Easier for customers to mismanage accounts	
	Phone bills can increase	
	Without broadband other family members cannot use the phone	
	Cannot deposit/withdraw cash/money	
	More vulnerable to phishing	2
(f)	three from:	
• •	cheques are collected together	
	during the course of the day	
	cheques are then processed all at once	
	cheques are processed overnight	
	bank accounts updated following morning	3
12	RAM	
	ROM	
	ROM	3

Page 6	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2007	0418	01

Question	Answer	Part
Number	4	mark
13 (a)	Dor code	1
(b)	Bar code	1
(c)	5027200190653	1
(d)	Producer/food type	1
(e)	Check digit	1
	two from:	
	A single digit	
	is calculated using the other digits	
	and added on to the end of the number	
(6)	recalculated at a later stage to ensure validity of data entry	2
(f)	Three from:	
	The bar code field in the data file is read	
	Record by record	
	Until a match is found with the bar code entered	
	The corresponding number in stock is read	
	One is subtracted from this number	
	Written back to file.	3
(g)	Two from:	
	PIN is entered	
	PIN is read from chip	
	Numbers compared	
	If identical, transaction is authorised	
	If not identical transaction refused	2
(h)	Four from:	
	Details from customer's card read	
	Bank code allows shop computer to contact bank's computer	
	Card details checked for not stolen	
	Account checked for sufficient funds	
	If card stolen or insufficient funds then transaction is rejected	
	If card not stolen and sufficient funds then transaction is authorised	
	Amount deducted from customer's bank account	
	Amount credited to shop's bank account	
	Itemised receipt printed out	4
14 (a)	webcams/small video cameras	1
	microphones	1
(b)	three from:	
	saves travelling time	
	Do not have to pay for conference room.	
	Do not have to hire transport.	
	Conferences can be called at short notice.	
	Don't have to carry bulky documents to conference	_
	Disabled students do not have to travel	3

Page 7	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2007	0418	01

Question Number	Answer	Part mark
15 (a) (i)	the old and the new system run side by side If the new system breaks down you still have the old system as a backup	1
	It can be a slow process/all tasks have to be performed twice/have to pay two sets of wages	1
(ii)		1
	saves money in wages/very fast method of implementation if anything goes wrong you don't have the old system to fall back on	1
(b)	Technical – <b>three</b> from:	
	Program listing Programming language	
	Flowchart/algorithm Samuel Flowchart/algorithm Samuel Flowchart/algorithm Flowchart/algorithm Samuel Flowchart/algorithm Samuel Flowchart/algorithm Flowchart/Algorith	
	List of variables	
	File structure	
	Purpose of the system/program	
	Input format or example Output format or example	
	Hardware requirements	
	Software requirements	
	Sample runs	
	Known bugs	
	Validation rules	3 max
	User – <b>three</b> from:	
	How to load software/ run software.	
	How to save a file.	
	How to search How to sort	
	How to print	
	How to add records	
	How to delete/edit records	
	Purpose of the system/program (only if not mentioned in technical	
	documentation)	
	Input format or example (only if not mentioned in technical documentation)	
	Output format or example (only if not mentioned in technical documentation)	
	Hardware requirements (only if not mentioned in technical documentation)	
	Software requirements (only if not mentioned in technical documentation)	
	Sample runs (only if not mentioned in technical documentation)  Error handling	
	Troubleshooting guide/Contact details/help line/FAQ	3 max
(c)	three from:	O max
(-)	comparing the solution with the original task requirements;	
	identifying any limitations to the system;	
	identifying any necessary improvements	
	evaluating the users' responses to using the system	
	Comparing test results of new system with old system results	
	Comparing the performance of the new system with performance of the old.	3

Page 8	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2007	0418	01

Question Number	Answer	Part mark
16	Six from:	
	Interactive user screen appears	
	Questions about geological profile are asked	
	Answers to questions/geological profile are typed in	
	Inference engine searches	
	Searches the Knowledge base	
	using the Rules (base)	
	Suggested probabilities of finding oil are output using	
	Probable depth of likely deposit	
	Predictions of geological deposits above oil	
	Detailed Output format	6
