UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2009 question paper for the guidance of teachers

0652 PHYSICAL SCIENCE

0652/06

Paper 6 (Alternative to Practical), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 2	2	Mark Scheme: Teachers' version	Syllabus	Paper	
			IGCSE – October/November 2009	0652	06	
1	` '		/- 0.1 V (1) /- 0.05 A (1)		[2]	
	(b) (i)	b) (i) R = V/I				
	(ii)	(ii) 11.9/0.72 = 16.5 ohms (ecf from (a) and (b)(i))				
	(iii)	ılation wrong,	[1]			
			ent melted/fused OWTTE (1) the voltage was too high/resistance too low/current	t too great (1)	[2]	
	(d) (i)	curre	was too high	[1]		
	(ii)	(ii) 11.5 × 1.55 = power in watts (1) = 17.8 W (1) (ecf)				
2	(a) (i)	use	the same volume (amount) of solution each time		[1]	
	(ii)	(ii) shake/stir/mix			[1]	
	(iii)	the r	mixture becomes colourless/colour changes		[1]	
	(iv)	solut	tion B		[1]	
	pla	ce in t	pette more than once and deliver into the measuring the cylinder enough liquid to be measured OWTTE olume by the number of drops (1)		[2]	
	(c) (i)	white	e/cloudy/milky/(precipitate)		[1]	
	(ii)	(ligh	t) green (precipitate)		[1]	
	(d) (i)	,	(III) hydroxide/ferric hydroxide w mark for correct formula Fe(OH) ₃)		[1]	
	(ii)	(ii) iron(II) is oxidised/oxidation number increased/ changed to iron(III)/loses an electron			[1]	
					[Total: 10]	

		IGCSE – October/November 2009	0652	06		
(a) (i	(a) (i) correct path drawn showing three <u>straight</u> lines, meeting at the boundaries of the glass block					
(ii) line		at right angle to block where line AB meets glass		[1]		
(iii	,			[1]		
(iv	(iv) 30 degrees (1), 20 degrees (1) +/- 2 degrees (give marks for any labelled angles correctly measured)			[2]		
) p						
(-	(–1 mark if axes reversed)					
	(c) line or point shown on graph (1) 42° +/– 1 degree (depends on candidate's graph) (1)					
				[2] [Total: 10]		
(a) (i	•	• • • • • • • • • • • • • • • • • • • •	E (1)	[2]		
(ii				[2]		
(b) (i	i) melt	s/liquefies		[1]		
(ii	i) deco	omposes		[1]		
	a glowing splint (1) rekindles OWTTE (1)					
			plete combustion/			
	to burn efficiently OWTTE (1) so more heat (energy) is given out OWTTE (1)					
	(iii (iii (iv (iv (c) (a) (iii (iii (iii (iii (iii (iii (iii	(ii) line (iii) i and (ever (iv) 30 d (give (i	 (a) (i) correct path drawn showing three straight lines, meeting at the boundaries of the glass block (ii) line at right angle to block where line AB meets glass (iii) i and r labelled correctly at change of direction of line (even if diagram not correct) (iv) 30 degrees (1), 20 degrees (1) +/- 2 degrees (give marks for any labelled angles correctly measured) (b) axes labelled and sensible scale chosen (1) points correctly plotted (allow one error) (1) smooth line drawn (1) (-1 mark if axes reversed) (c) line or point shown on graph (1) 42° +/- 1 degree (depends on candidate's graph) (1) (a) (i) the black deposit is carbon (1) not enough oxygen/air for complete combustion OWTTI (ii) the centre of the flame contains gas that is not burning but the outside ring of the flame scorches the paper OV (b) (i) melts/liquefies (ii) decomposes (c) a glowing splint (1) rekindles OWTTE (1) (d) there is enough air (oxygen) mixing with the butane for comto burn efficiently OWTTE (1) 	 (a) (i) correct path drawn showing three straight lines, meeting at the boundaries of the glass block (ii) line at right angle to block where line AB meets glass (iii) i and r labelled correctly at change of direction of line (even if diagram not correct) (iv) 30 degrees (1), 20 degrees (1) +/- 2 degrees (give marks for any labelled angles correctly measured) (b) axes labelled and sensible scale chosen (1) points correctly plotted (allow one error) (1) smooth line drawn (1) (-1 mark if axes reversed) (c) line or point shown on graph (1) 42° +/- 1 degree (depends on candidate's graph) (1) (a) (i) the black deposit is carbon (1) not enough oxygen/air for complete combustion OWTTE (1) (ii) the centre of the flame contains gas that is not burning (1) but the outside ring of the flame scorches the paper OWTTE (1) (b) (i) melts/liquefies (ii) decomposes (c) a glowing splint (1) rekindles OWTTE (1) (d) there is enough air (oxygen) mixing with the butane for complete combustion/ to burn efficiently OWTTE (1)
