MARK SCHEME for the October/November 2010 question paper

for the guidance of teachers

0652 PHYSICAL SCIENCE

0652/03

Paper 3 (Extended), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

| | Page 2 | | | Mark Scheme: Teachers' version | Syllabus | Paper | |
|---|--|------|------------------------|--|--------------------|-------------|--|
| | | | | IGCSE – October/November 2010 | 0652 | 03 | |
| 1 | (a) | (i) | any | value below 7 ; | | [1] | |
| | | (ii) | pH r to at | ises ; (ecf from (i)) pove 7 / stated value above 7 ; | | [2] | |
| | (iii) us | | use | the universal indicator / pH meter ; (not litmus or just | t indicator) | [1] | |
| | (iv) H ₂ S0 (one | | H₂S0 (one | O_4 + 2NaOH \rightarrow Na ₂ SO ₄ + 2H ₂ O ;; e mark for all formulae correct, one mark for balance if formulae correct) | | | |
| | (b) proton source is (sulfuric) acid ; | | | | | | |
| | base is H⁺ / H io | | H ion | I ion & OH^-/O ion form $H_2O/water$; | | | |
| | | | | | | [Total: 9] | |
| 2 | (a) | (i) | wave | elength marked correctly; | | [1] | |
| | | (ii) | dept so sj | h decreases ; peed reduces ; | | [2] | |
| | (b) use <i>F</i> = | | of <i>v</i> : 7.5 ⊦ | = fλ ; Iz ; | | [2] | |
| | (c) | (i) | ray f trace | rom lamp to boy's eye reflecting off water, i = r ; ed back to the lamp ; | | [2] | |
| | | (ii) | ray o seco expla | drawn from lamp to boy's eye, $\mathbf{i} \neq \mathbf{r}$; and ray drawn from lamp to boy's eye, $\mathbf{i} \neq \mathbf{r}$; anation such as diffuse reflection*; | | | |
| | | | (°an 2 ma | arks if only 1 mark is scored in the diagram) | standing, could so | core [3] | |
| | | | | | | [Total: 10] | |

|--------|--|--|---------------------------------|---|--|-------------|--|
| | | | | IGCSE – October/November 2010 | 0652 | 03 | |
| 3 | (a) | a) (i) sugar / named carbohydrate source e.g. grapes / starch / bread ; mixed with yeast ; kept warm / at 35 °C at correct temperature ; (ii) C₆H₁₂O₆ → 2C₂H₅OH + 2CO₂ ;; (one mark for all formulae correct, one mark for balance if formulae correct) | | | | | |
| | (b) | (b) C₂H₅OH = 46 ;; 0.8/46 ; = 417 (accept 420/417.3/417.4) ; (c) any three from: long chain hydrocarbons/alkanes broken down ; to form short chain hydrocarbons/alkanes and alkenes ; using heat ; and a catalyst ; | | | | | |
| | (c) | | | | | | |
| | (if distillation is discussed zero marks are scored) | | | | | [max 3] | |
| | | | | | | [Total: 12] | |
| 4 | (a) | (i) | char throu curre (reje | rge moves from A to B /or electrons move from B ugh B ; ent is a movement of charge/current to Earth throug ect current in the first part) | 3 to A / A discha | rges [2] | |
| | | (ii) | elect goes and (any | trical (potential) energy ; s to thermal / heat energy / light energy ; sound energy ; r mention of kinetic energy only the first mark can be | e scored) | [3] | |
| | (b) | (i) | <u>use</u> 60 m | of V = <i>IR</i> = (0.0012 × 10 ⁻³ × 50 000) ; nV, 0.060 V ; | | [2] | |
| | | (ii) | <u>use</u> 1.8 > | of <i>q</i> = <i>It</i> (= 0.0012 × 10 ⁻³ × 1.5 × 10 ⁻³ ; × 10 ⁻⁹ C ; | | [2] | |
| | | (iii) | <u>use</u> 1.08 | of $E = VQ$ or VIt (= 0.0012 × 10 ⁻³ × 1.5 × 10 ⁻³ × 0.06 × 10 ⁻¹⁰ J; | 6); | [2] | |
| | | | | | | [Total: 11] | |

|--------|-----|---|--|---|--|--------------------------|--|
| | | | | IGCSE – October/November 2010 | 0652 | 03 | |
| 5 | (a) | group number is the same as the number of electrons in the outer shell ; | | | | | |
| | (b) | changes from metallic to non-metallic / metallic to covalent ; | | | | [1] | |
| | (c) | (i) | Li₂O | ; | | [1] | |
| | | (ii) | elec from from (acc (refe | tron(s) transferred ; a (outer shell of) lithium atom to (outer shell) of oxyg a two lithium atoms transfer one electron each to one ept a clearly labelled diagram) erence to covalent bonding no marks) | en atom ; e oxygen atom ; | [3] | |
| | (d) |) diagram showing two nitrogen atoms with at least one shared pair of electrons ; three shared pairs of electrons in total, with no other electrons in outer shell ; inner shell with two electrons ; | | | | | |
| | | | | | | [Total: 9] | |
| 6 | (a) |) use of tongs / forceps / protective clothing / gloves / lead shielding / not point source ; (reject exposure time / goggles / storing in lead) | | | | ce ; [max 1] | |
| | (b) | background radiation or very clear source ; | | | | | |
| | (c) | (i) | rand | lom variation of emissions ; | | [1] | |
| | | (ii) | alph alph beta gam (the expl corre | a ✓ beta × gamma ✓ ; a – significant change with thin card ; – no significant change with aluminium ; ma – significant penetration through lead / reading a answer must refer to the experiment not genera anation cannot be given the mark unless the p ect) | above background al properties and presence/absenc | d; ∣the æis [4] | |
| | (d) | (i) | very high | highly ionising ; chance of collision with cancerous cells ; | | [2] | |
| | | (ii) | alph wou | a very short range ; ld not reach tumour / would damage healthy cells or | the way ; | [2] | |
| | | | | | | [Total: 11] | |

|--|-----|---|--|--|----------------------------------|-------------------------|--|
| | | | | IGCSE – October/November 2010 | 0652 | 03 | |
| 7 | (a) | (i) (ii) | carb carb (one $C + CO_2$ (one | oon / coke is burned to make carbon dioxide ; oon dioxide is reduced by more carbon / coke to carb e mark only for carbon / coke reacts with oxygen to for $O_2 \rightarrow CO_2$; $+ CO \rightarrow 2CO$; e mark only for 2C + $O_2 \rightarrow 2CO$) | on monoxide ; m carbon monoxi | de) [2] [2] | |
| | (b) | (b) 112 (tonnes iron produced) or 160 tonnes iron(III) oxide ; 160/112 or 60 000/112 ; = 85 714 tonnes ; (treat use of wrong formula as an arithmetic error so first mark only is lost) | | | | | |
| | (c) | c) (i) by using additives / by adding other metals / by adding other elements ; | | | | | |
| | | (ii) | to cł | nange/improve properties/to make harder/to preve | ent rusting/strong | jer ; [1] | |
| | (d) | alur | niniui | m is more reactive than carbon / carbon will not redu | ice aluminium oxi | de ; [1] [Total: 10] | |
| 8 | (a) | (i) | bala mea | nce (accept scale(s)/measuring scales) ; isuring cylinder (reject beaker) ; | | [2] | |
| | | (ii) | volu mas | me of water in cylinder (v_1) AND volume of water plus of stone (m); | us stone (v_2) ; | [2] | |
| | | (iii) | v ₂ – divid | v_1 ; de mass by volume ; | | [2] | |
| (b) <u>use of</u> density = mass / volume = 1.12 = 280 / v; 250 (cm ³); | | | | | | | |
| | | | | | | [Total: 8] | |
