## Marking Scheme and Support Notes for use with the Marking Scheme

In considering this marking scheme the following points should be noted:
The support notes presented are not exclusive or definitive and alternative answers may be acceptable if deemed valid;

They are support notes and not model or suggested answers;
The bookkeeping layout as presented in the support notes may be accepted as best practice. However, in some bookkeeping questions there can be a number of alternative approaches and formats that can be validly used by candidates;

Further relevant points of information presented by candidates are marked and rewarded on their merits;

The detail required in any answer is determined by the context and the manner in which the question is asked and by the number of marks assigned to the answer on the examination paper. Requirements and mark allocations may therefore vary from year to year.
