

2007. S56

**Coimisiún na Scrúduithe Stáit
State Examinations Commission**

JUNIOR CERTIFICATE EXAMINATION, 2007

MATERIALS AND TECHNOLOGY

METALWORK - ORDINARY LEVEL

100 Marks

Tuesday, 19 June, Afternoon, 2.00 to 3.30

Marking Scheme
&
Sample Solutions

INSTRUCTIONS

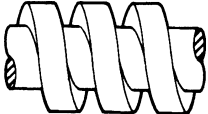

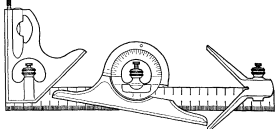

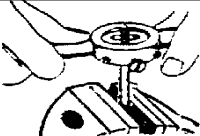

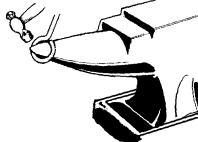

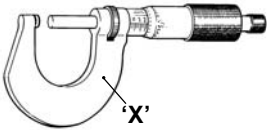

1. Answer question 1, sections A and B, and any **three** other questions.
2. Write your answers in the spaces provided or tick the appropriate box.

1.

SECTION A - 20 MARKS
ANSWER ANY TEN QUESTIONS FROM THIS SECTION

(10 x 2)

40 Marks

| | | | | | | | | | | | |
|--|---|--|-------------------|---|--------------------|---|------------------|---|--------------------|---|----------|
| <p>(a)</p>  | <p><i>This thread form is a(n):</i></p> | <table border="1"> <tr><td>Buttress Thread</td><td></td></tr> <tr><td>Acme Thread</td><td></td></tr> <tr><td>Square Thread</td><td>✓</td></tr> <tr><td>ISO Metric Thread</td><td></td></tr> </table> | Buttress Thread | | Acme Thread | | Square Thread | ✓ | ISO Metric Thread | | <p>②</p> |
| Buttress Thread | | | | | | | | | | | |
| Acme Thread | | | | | | | | | | | |
| Square Thread | ✓ | | | | | | | | | | |
| ISO Metric Thread | | | | | | | | | | | |
| <p>(b)</p>  | <p><i>This tool is a(n):</i></p> | <table border="1"> <tr><td>Tap Wrench</td><td></td></tr> <tr><td>Adjustable Spanner</td><td></td></tr> <tr><td>Box Spanner</td><td></td></tr> <tr><td>Ring Spanner</td><td>✓</td></tr> </table> | Tap Wrench | | Adjustable Spanner | | Box Spanner | | Ring Spanner | ✓ | <p>②</p> |
| Tap Wrench | | | | | | | | | | | |
| Adjustable Spanner | | | | | | | | | | | |
| Box Spanner | | | | | | | | | | | |

| Parallel Turning | | | | | | | | | | | |
| Taper Turning | ✓ | | | | | | | | | | |
| Knurling | | | | | | | | | | | |
| Facing | | | | | | | | | | | |

SECTION B - 20 MARKS
ANSWER ALL QUESTIONS FROM THIS SECTION

(m)

(i) Give **three** reasons why the blades of this wind generator should be made from a plastic material.

- | | |
|------------------------|----------|
| 1. They don't corrode. | 3 |
| 2. Strong | |
| 3. Light | |

(ii) Name **three** plastic materials.

- | | |
|------------|----------|
| 1. Nylon | 3 |
| 2. Acrylic | |
| 3. PVC | |

(n)

(i) Why is copper used in the manufacture of solar panels?

- | | |
|--------------------------------|----------|
| It does not corrode | 2 |
| It is a good conductor of heat | |
| | |
| | |

(ii) List **two** other common uses of copper.

- | | |
|--------------------|----------|
| 1. Water cylinders | 2 |
| 2. Electrical wire | |

(o) The use of energy saving bulbs saves electricity. List **four** other ways to save energy in the home.

- | | |
|---|----------|
| 1. Double glazing | 4 |
| 2. Insulation | |
| 3. Switch off appliances when not in use | |
| 4. Keeping doors and windows closed when heating is on. | |

(p) (i) Filament bulbs produce light by heating a(n):

| | | |
|----------------|---|----------|
| Ceramic Coil | | 1 |
| Tungsten Coil | ✓ | |
| Brass Coil | | |
| Aluminium Coil | | |

(ii) How would you conserve energy in the school workshop?

- | | |
|---|----------|
| Switching off appliances such as soldering irons and strip heaters when not in use. | 1 |
|---|----------|

(q) (i) The current supplied by a battery is called:

| | | |
|---------------------|---|----------|
| Direct Current | ✓ | 2 |
| Alternating Current | | |
| Electrical Energy | | |

(ii) Name each terminal:

| | | |
|---|---------|----------|
| L | Live | 2 |
| N | Neutral | |
| E | Earth | |

(8 x 1)

(a)

(i) Dead mild steel contains the following amount of carbon:

| | |
|---------------|-------------------------------------|
| 0.05% - 0.15% | <input checked="" type="checkbox"/> |
| 0.25% - 0.35% | <input type="checkbox"/> |
| 0.45% - 0.55% | <input type="checkbox"/> |

(v) A material is said to be ductile when it can be easily:

| | |
|-----------|-------------------------------------|
| Stretched | <input checked="" type="checkbox"/> |
| Fractured | <input type="checkbox"/> |
| Melted | <input type="checkbox"/> |

(ii) High carbon steel is sometimes called:

| | |
|--------------|-------------------------------------|
| Silver Steel | <input type="checkbox"/> |
| Cast Steel | <input checked="" type="checkbox"/> |
| Alloy Steel | <input type="checkbox"/> |

(vi) Plastic glazing is made from:

| | |
|-----------------|-------------------------------------|
| Phenolic Resins | <input type="checkbox"/> |
| Nylon | <input type="checkbox"/> |
| Acrylic | <input checked="" type="checkbox"/> |

(iii) Tin is a(n):

| | |
|-------------------|-------------------------------------|
| Ferrous Metal | <input type="checkbox"/> |
| Non-Ferrous Metal | <input checked="" type="checkbox"/> |
| Alloy | <input type="checkbox"/> |

(vii) Do thermosetting plastics soften when heated?

| | |
|-----------|-------------------------------------|
| Always | <input type="checkbox"/> |
| Never | <input checked="" type="checkbox"/> |
| Sometimes | <input type="checkbox"/> |

(iv) Brass is an alloy of:

| | |
|---------------|-------------------------------------|
| Copper & Tin | <input type="checkbox"/> |
| Copper & Zinc | <input checked="" type="checkbox"/> |
| Copper & Lead | <input type="checkbox"/> |

(viii) Galvanised iron is coated with:

| | |
|------|-------------------------------------|
| Tin | <input type="checkbox"/> |
| Zinc | <input checked="" type="checkbox"/> |
| Lead | <input type="checkbox"/> |

(b) The diagram shows a Blast Furnace. Name **any three** of the parts labelled.

⑥

| Part | Name |
|------|-------------------|
| A | Charging bells |
| B | Bustle pipe |
| C | Slag hole |
| D | Tap hole |
| E | Fire brick lining |

(c) Complete the chart by listing a tool for each task.

6 x 1)

| Task | Tool |
|--|---------------|
| To draw a circle on a piece of metal. | Dividers |
| To draw a line at right angles to a straight edge. | Tri square |
| To locate the centre of a round bar. | Centre square |
| To hold a tap while cutting a thread. | Tap wrench |
| To accurately measure the diameter of a round bar. | Micrometer |
| To hold small sheet metal parts while drilling. | Hand vice |
| To remove large drills from a drilling machine. | Drill drift |

3.

20 Marks

(a) (i) Match the number to the correct mechanism part. (6 x 1)

| Mechanism Part | No. |
|----------------|-----|
| Pulley | 6 |
| Rack | 5 |
| Sprocket | 4 |
| Ball Bearing | 2 |
| Spur Gear | 1 |
| Bevel Gear | 3 |

(ii) What is a set of meshing gears called?

Gear train ①

(b) (i) Complete the chart by listing devices that use the following mechanisms: (4 x 1)

| Mechanism | Device |
|--------------|--------------------|
| Ratchet | Micrometer |
| Screw Thread | Vice |
| Crankshaft | Two-stroke engine |
| Cam | Four-stroke engine |

(ii) If gear 'A' rotates at 150 RPM how fast will gear 'B' rotate? (A = 12 Teeth, B = 12 Teeth.)

| | |
|---------|---|
| 200 RPM | |
| 100 RPM | |
| 150 RPM | ✓ |
| 50 RPM | |

(iii) Can gears be made from nylon?

Yes ①

(c) (i) When pulled in the direction of the arrows the spring will be in:

| | |
|-------------|---|
| Tension | ✓ |
| Compression | |
| Torsion | |
| Shear | |

(ii) A linkage is made up of several:

| | |
|------------|---|
| Levers | ✓ |
| Struts | |
| Ties | |
| Mechanisms | |

(iii) Name gear 'X'.

Idler gear ②

Details of a windshield used in the manufacture of a model vintage car are shown.

(i) List the tools and processes used to make the windshield.

| | | |
|-------------------------|-------------------------------|----------|
| Tools: <i>Rule</i> | Processes: <i>Marking out</i> | 6 |
| <i>Drilling Machine</i> | <i>Drilling</i> | |
| <i>File</i> | <i>Draw filing</i> | |
| <i>Strip heater</i> | <i>Bending</i> | |

(ii) What does R10 refer to in the drawing?

Radius of the curve is 10mm.

(iii) Describe how you would get a smooth finish on the edge of the windshield.

*Use fine grade emery cloth followed by wet and dry paper.
It then can be polished by hand or machine.*

(iv) What safety precautions should be observed when drilling sheet metal?

*Clamp properly and support with wood
Correct drilling speed
Do not apply too much pressure on the feed lever*

(v) Describe how you would safely drill the holes in the axle support.

*Hold the piece securely using a hand vice.
Select the correct speed.
Apply light pressure to the feed lever.
Wear safety goggles.*

(vi) What is the overall length of the axle support?

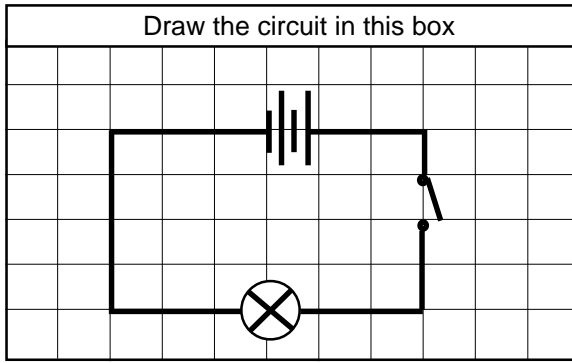

80mm

(vii) What is the overall width of the axle support?

12mm

Axle Support

(a) (i) A design for an illuminated display-stand is shown. The design uses a battery, a bulb and a switch. (The battery and switch are not shown.) Draw the electrical circuit diagram for this design.

4

(ii) Complete the chart:

| | | | |
|--|-----|-------------------------------------|---|
| Resistance can be measured using a multimeter. | Yes | <input checked="" type="checkbox"/> | 1 |
| | No | <input type="checkbox"/> | |
| A fuse is a safety device in an electrical circuit. | Yes | <input checked="" type="checkbox"/> | 1 |
| | No | <input type="checkbox"/> | |
| Aluminium is an insulator. | Yes | <input type="checkbox"/> | 1 |
| | No | <input checked="" type="checkbox"/> | |
| A car battery is made up of a number of cells joined together. | Yes | <input checked="" type="checkbox"/> | 1 |
| | No | <input type="checkbox"/> | |

(b) (i) Briefly describe how a bicycle dynamo works.

As the dynamo wheel rotates it moves the magnet inside the coil. This induces a current in the coil which is conducted to the bulb through the cable.

3

(ii) Name one famous Engineering inventor. Write a brief note about this person's invention.

Inventor's Name: *John P. Holland*

Invention: *He designed the submarine*

3

(c) (i) Name any **three** electronic components.

1. *Light Emitting Diode (LED)*
 2. *Light Dependent Resistor (LDR)*
 3. *Transistor*
- 3

(ii) List **three** devices that use electronic components.

1. *Computer*
 2. *iPod*
 3. *Mobile phone*
- 3

- (i) This drawing shows a bench vice and a pair of vice clamps. Name a metal suitable for making these clamps. Give a reason for your choice.

| |
|---|
| Metal: <i>Aluminium</i> |
| Reason: <i>A soft material which will not damage the workpiece.</i> |

- (ii) The diagram below represents a blank piece of metal to be used to make **one** of the vice clamps. Complete the marking out to show where the bend lines should be located.

- (iii) Using the chart below describe **one** shaping process, **one** finishing process and name the tools used to make the vice clamps.

| | |
|---------------------------------------|-------------------------|
| Shaping Process: <i>Bending</i> | Tools used: |
| | <i>Folding bars</i> |
| | <i>Mallet</i> |
| Finishing Process: <i>Draw filing</i> | Tools used: |
| | <i>Smooth hand file</i> |
| | <i>Emery cloth</i> |

- (iv) List **two** features of a modern lathe that are not to be found in old lathes.

| |
|---------------------------|
| <i>Safety guards</i> |
| <i>Emergency stop bar</i> |
| |
| |

- (v) Match the number to the correct part.

| | | |
|----|----|----|
| 1. | 2. | 3. |
| 4. | 5. | 6. |

| Part | No. |
|--------------------|-----|
| Tool Bit | 1 |
| Tool Holder | 3 |
| Three-Jaw Chuck | 6 |
| Tailstock | 2 |
| Morse Taper Sleeve | 4 |
| Top Slide | 5 |
