

**Coimisiún na Scrúduithe Stáit
State Examinations Commission
*Leaving Certificate Applied 2008***

**Vocational Specialism - Technology
(240 Marks)**

Wednesday 11th June, Afternoon 2.00 pm to 4.00 pm

For the superintendent only

Centre Stamp

General Directions

1. Write your examination number in this space:

2. There are two sections in this paper.

Section 1– Answer **all three** questions.

- 90 marks

Q1. - Short answer questions

Q2. - Graphical Communication

Q3. - Health and Safety

Section 2– Five questions, answer **any three**

- 150 marks

Q1. - Introducing Technology

Q2. - Design and Manufacture

Q3. - Water Technology

Q4. - Electrical Understanding and Basic Electronics

Q5. - Tools and Equipment

3. Write your answers in the spaces provided and include sketches (in pencil) as appropriate.

Section 1

Compulsory

90 marks

Question 1

(40 marks)

1. Answer any **TEN** of the following **FIFTEEN** short questions

- (a) The picture shows a set of taps with a chrome-plated finish.
List **two** advantages of using this finish.

Advantage 1 _____

Advantage 2 _____

- (b) The picture of a 7.2 Mega-pixel digital camera is shown.
What does the description “7.2 Mega-pixel” tell us about this camera?

Answer: _____

- (c) The picture shows a set of HSS drill bits. What type of material would you drill with these bits and what does the abbreviation HSS stand for?

Material _____

HSS _____

- (d) The picture shows a latching push-switch.
Explain the term “latching”.

Latching _____

- (e) List **two** advantages of using CFL light bulbs.

Advantage 1 _____

- (f) List **two** alternative energy sources that can be used to heat our homes.

1. _____

2. _____

- (g) Name the type of screw shown and name the material for which it is mostly used.

Type of screw _____

Material _____

- (h) A pair of MCBs is shown. What does MCB stand for and what is its function?

MCB

Function

- (i) Name the measuring tool shown and give **one** example of what it can be used to measure.

Name

Example

- (j) The lamp shown has a built-in magnifying lens. Suggest a use for this particular type of lamp.

Use

- (k) Determine the power of this toaster if the current is 0.5Amps and the voltage is 240 Volts.

- (l) Identify this tool and explain what it is used for.

Name _____

Use _____

- (m) List **three** electrical quantities that can be measured with a multimeter.

1 _____

2 _____

3 _____

- (n) Name the machine shown and give one use for it.

Name _____

Use _____

- (o) Using the first three colours on the resistor below and the colour code opposite, determine the resistance of this resistor.

Resistance _____

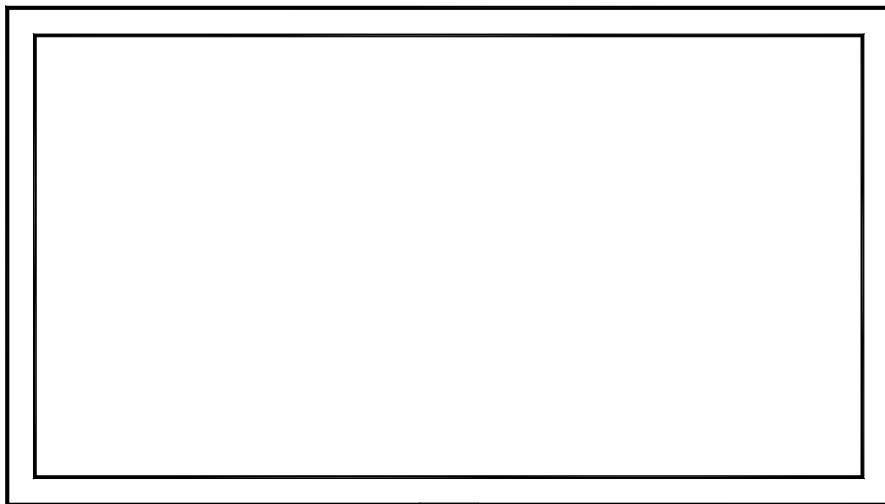

Black	0
Brown	1
Red	2
Yellow	3
Green	4
Blue	5
Magenta	6
Grey	7
White	8
	9

Compulsory

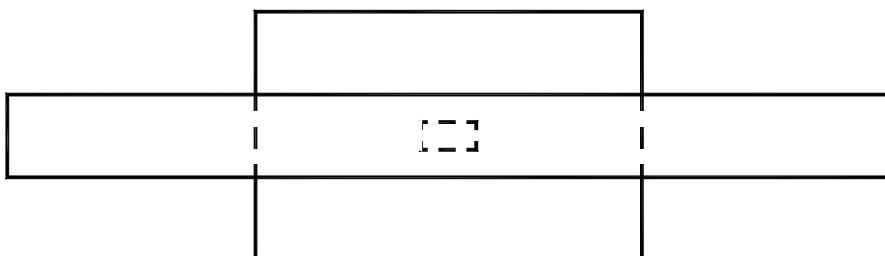

2. Graphical Communication

The plan and elevation of a flat screen television is shown.

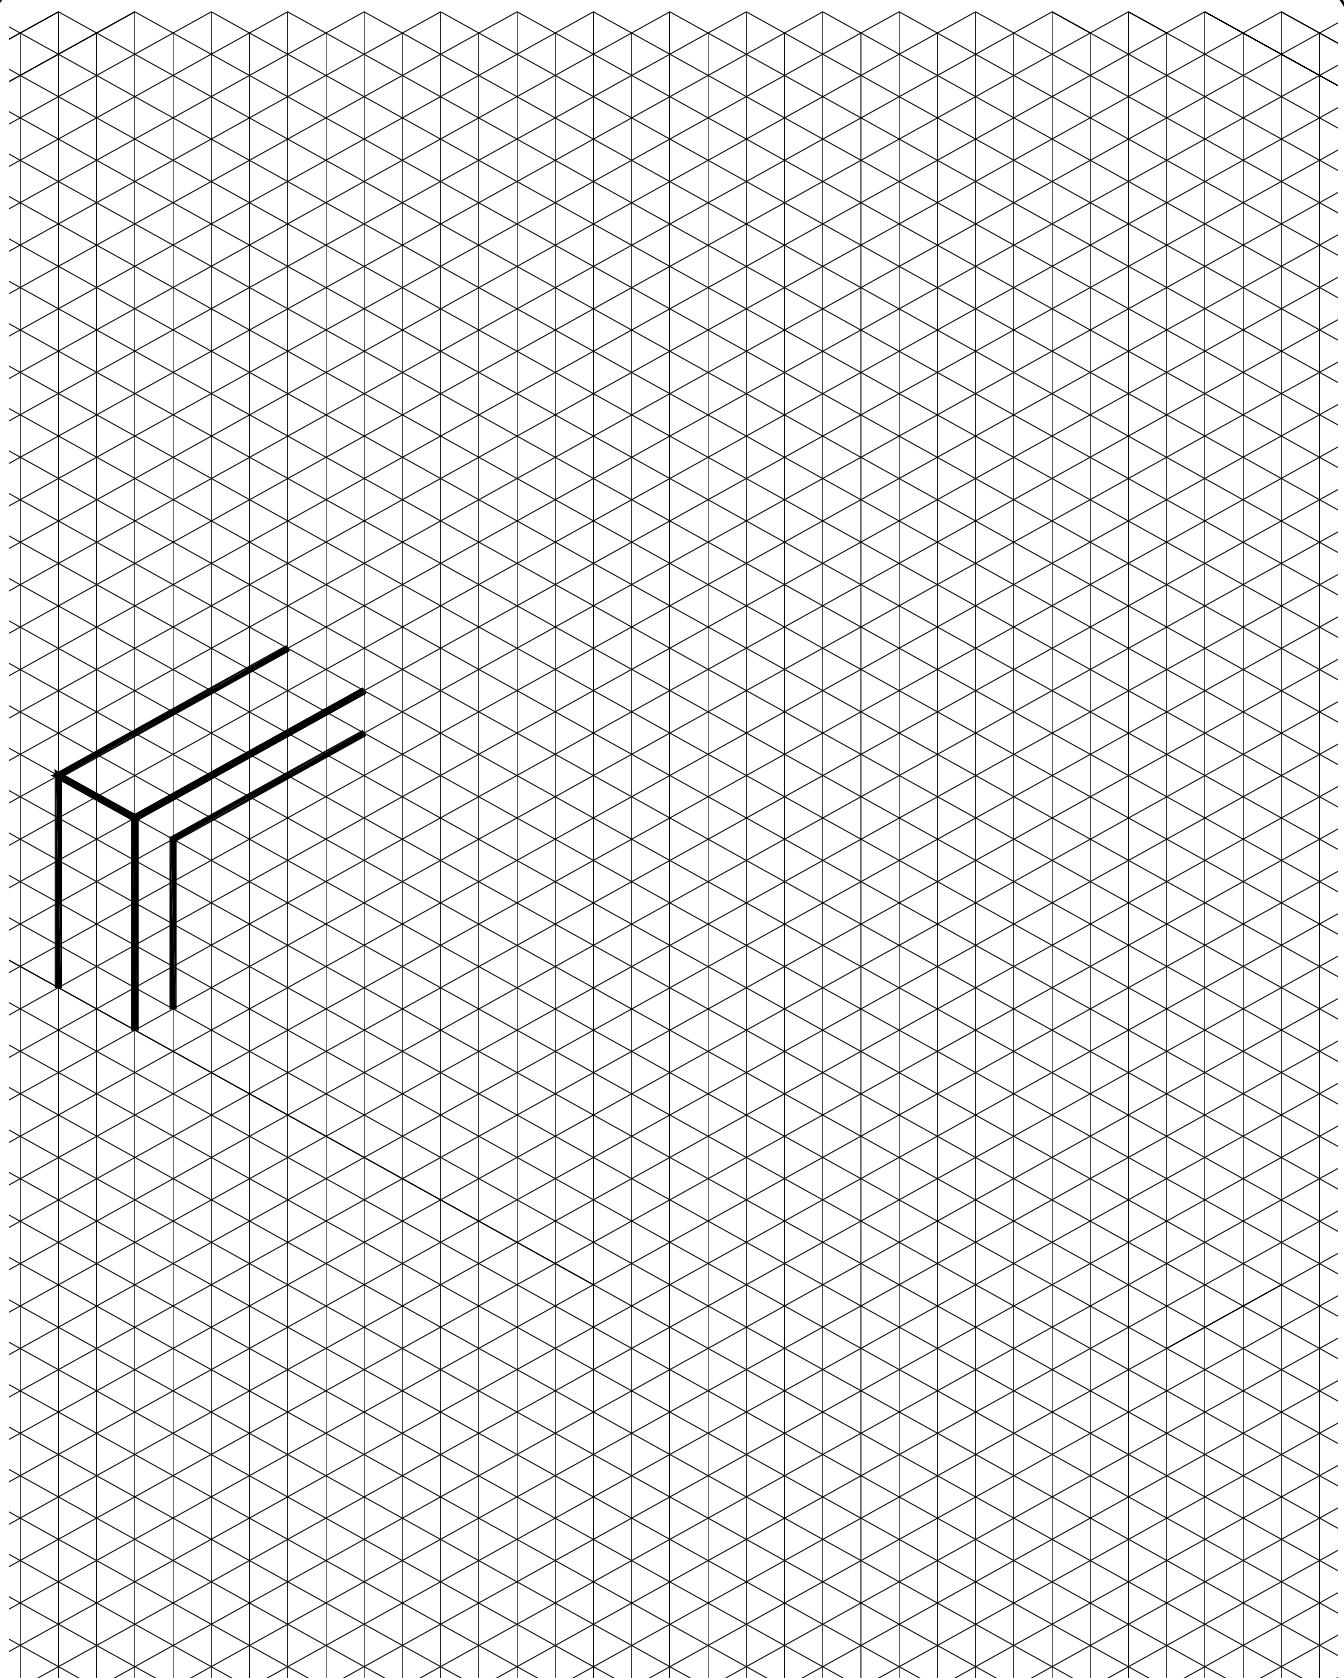

- (a) Complete the isometric drawing of the television on the grid opposite.
Maintain the proportions of the television in the isometric drawing.

ELEVATION

PLAN

- (b) Estimate and show 4 measurements on your completed drawing.

Compulsory

3. Health and Safety

- (a) (1) A pair of safety glasses is shown. Identify **three** processes in technology where it is necessary to wear safety glasses.

1

2

3

Safety glasses

- (2) Suggest **two** reasons why dust extraction is very important in the workshop.

1

2

Dust extractor

- (3) Explain why it is so important to have a cover over the chuck of a lathe.

Explanation:

Lathe chuck shield

- (b) (1) Name **two** machines other than a lathe that require the use of a clear guard over the moving parts.

1 _____

2 _____

- (2) Make a sketch to illustrate the position of the cover on **one** of these machines.

- (c) (1) Where in your school would you find an emergency stop button and give **two** examples of when it could be used.

Location _____

Example 1 _____

Example 2 _____

Emergency stop button

- (2) Some glues used in the workshop are very strong smelling. Name **one** such glue and describe **two** safety precautions which should be taken when using this glue.

Name _____

1 _____

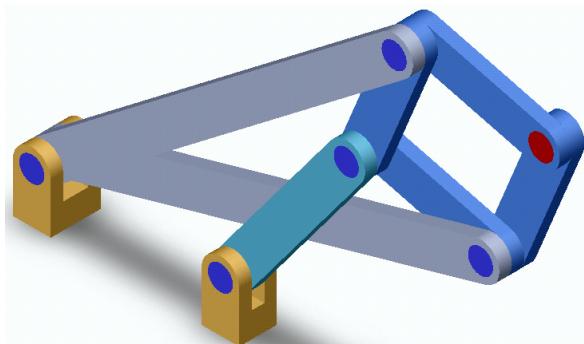

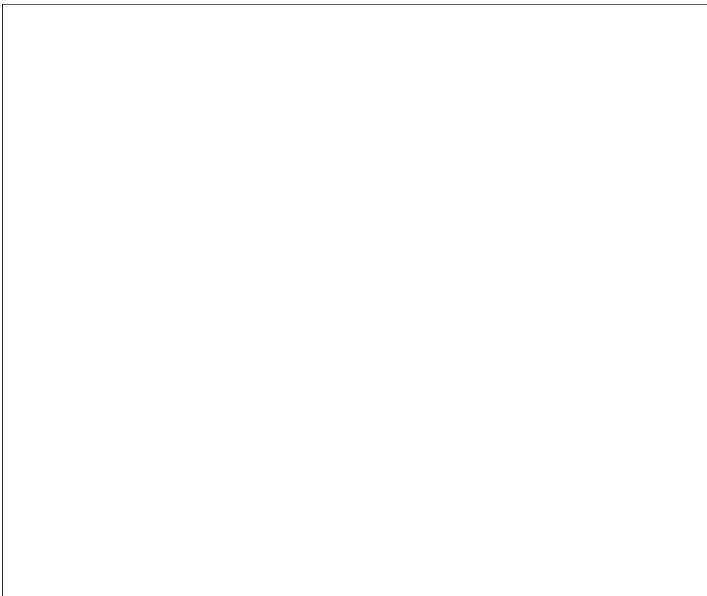

2 _____

Answer ANY THREE Questions from this section

1. Introducing Technology

(50 marks)

- (a) A solid model of a structural framework is shown. Sketch an elevation of the framework in the space provided.

Structural Framework

- (b) The playing of electronic media has changed dramatically in recent years.

- (1) How has the playing of music and video changed?

Apple iPod

- (2) Suggest **three** design features which Apple considered in the design of the iPod.

1

2

3

(c) Injection moulding is used widely in plastic product manufacturing.

(1) Briefly explain the process of injection moulding.

(2) Name **two** other products besides the plastic chair shown which are injection moulded.

Injection moulded plastic chair

- 1 _____
2 _____

(d) An alloy wheel is shown opposite.

(1) Explain the term “alloy”.

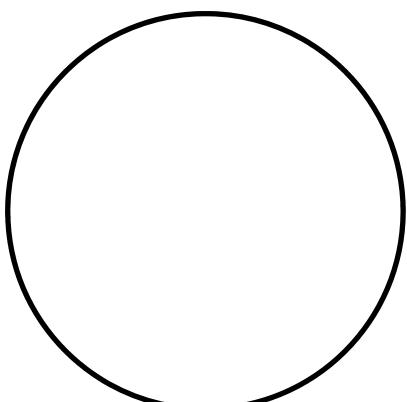

(2) Identify **two** other uses for alloys.

- 1 _____
2 _____

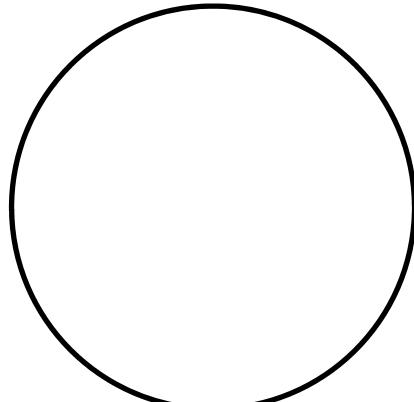

Typical alloy wheel

(3) Using the wheel outlines opposite, sketch your designs for **two** different alloy wheels. Use pencil and shade where appropriate.

Design A

Design B

2. Design and Manufacture

(50 marks)

- (a) A picture of a bicycle with a wooden frame is shown.

- (1) Name a suitable manufactured board from which to make Part A.

Answer _____

- (2) Name a suitable hardwood from which to make the seat and list **three** tools/machines used in its manufacture.

Suitable hardwood _____

1 _____

2 _____

3 _____

Part A

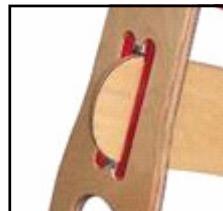

Wooden bicycle

- (3) In the space below sketch details of how the wheel is attached to the front fork of the bicycle. The assembly must be free moving and secure.

Wheel assembly

- (4) In the space below sketch details of how the front fork is attached to the bicycle frame.

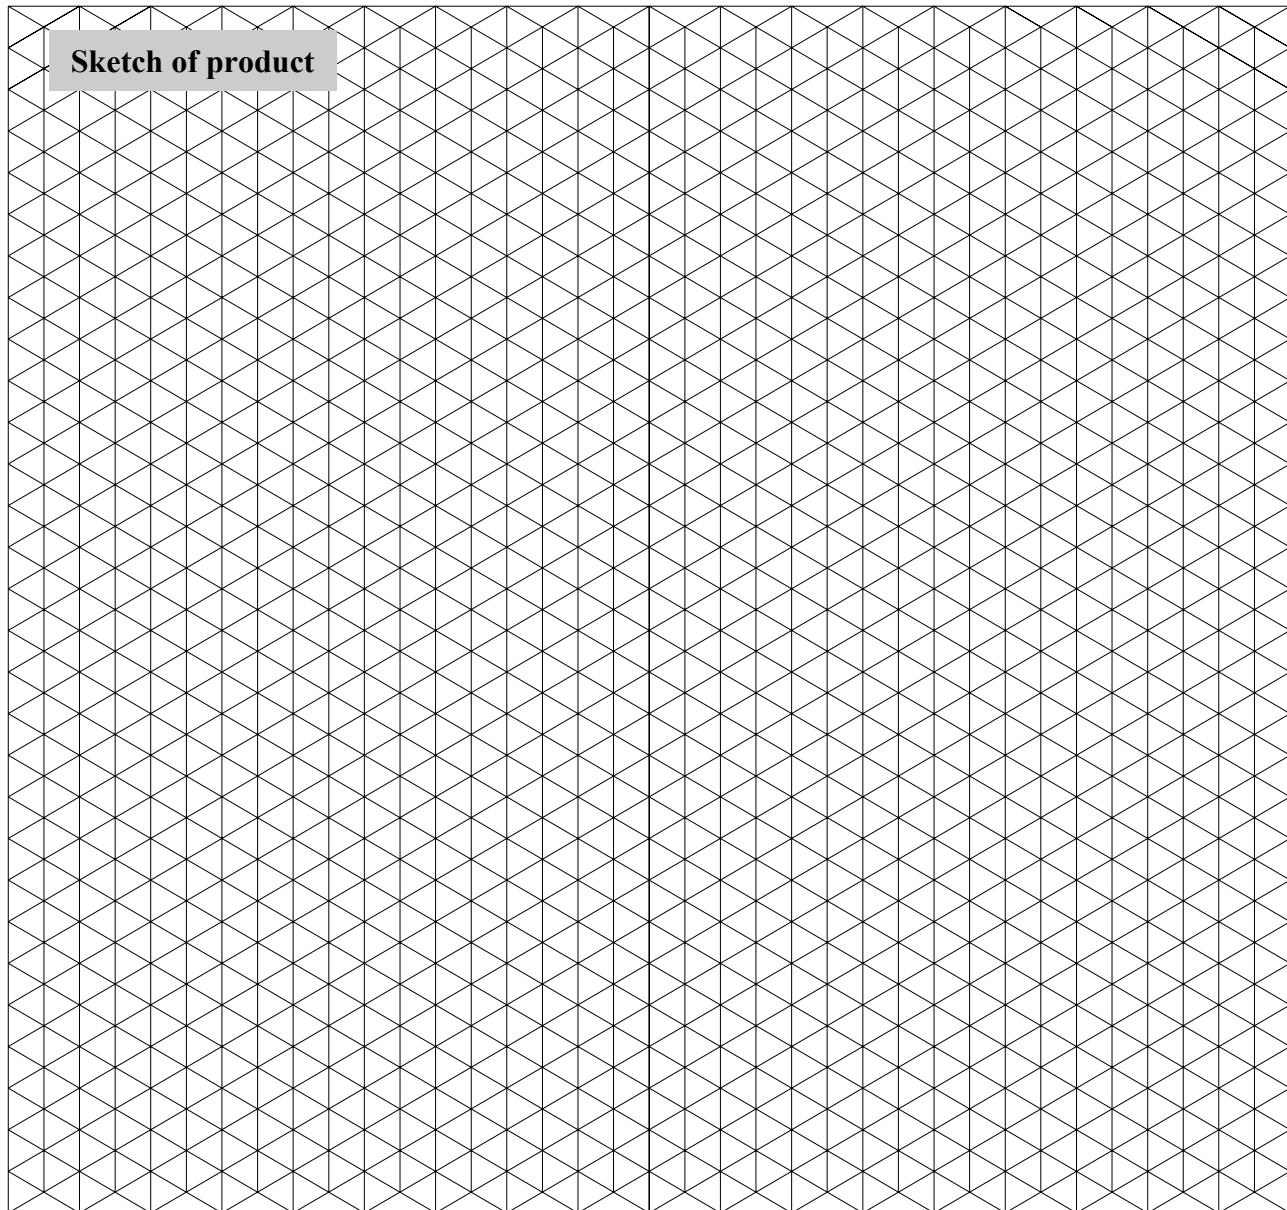

Frame assembly

- (b) (1) In the *Design and Manufacture* module you designed and manufactured a product. Name the product you made and make an isometric sketch of it on the grid below.

Product Name _____

Sketch of product

- (2) State two aims/objectives that you considered before designing the project.

Aim/Objective 1 _____

Aim/Objective 2 _____

3. Water Technology

(50 marks)

- (a) The picture shows a P-trap for waste water.

- (1) Where could this trap be used?

Name another type of trap suitable for this purpose.

- (2) What is the function of a waste water trap?

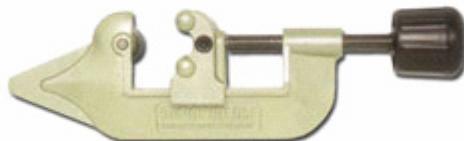

Function _____

Why do waste traps have rubber seals? _____

- (b) (1) Name the tool shown opposite and explain how it is used.

Name _____

How it is used _____

- (2) The pictures show both a compression and a solder fitting as used in plumbing. Explain briefly how each fitting is properly joined to a copper pipe.

Compression fitting _____

Solder fitting _____

- (c) (1) Describe **two** steps which may be taken to check if your tap water is safe to drink.

1 _____

2 _____

- (2) The cold water tap in the kitchen sink is connected directly to the rising main. Explain why this is done.

Drinking water

- (d) The picture opposite shows a solar-powered 12V DC garden water-pump system.

- (1) List **two** advantages of this system compared to an AC mains-powered pump.

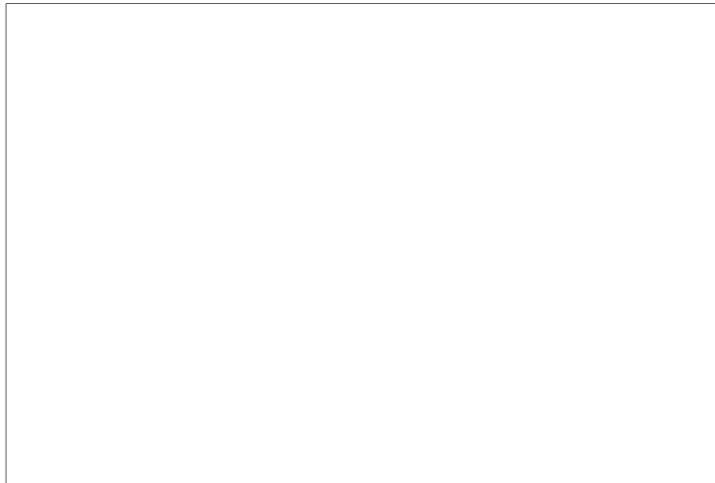

1 _____

2 _____

12V DC Solar-powered water pump

- (2) The pump for a garden water feature is to be driven by the solar cell above. The solar cell is mounted on an aluminium frame at the edge of a pond. In the space opposite, sketch a design for this frame with the solar cell in place.

4. Understanding of Electricity and Electronics

(50 marks)

- (a) State the energy conversion for the following electronic output devices.

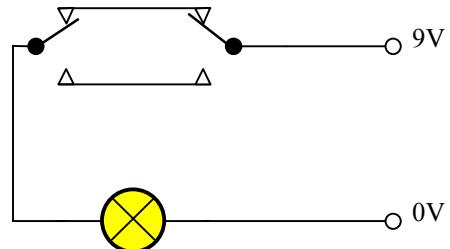

Energy conversion		
Device	From	To
Bulb		
Speaker		
Microphone		
Battery		

- (b) The circuit diagram for the two-way switching of a DC bulb is shown opposite. The components necessary to build this circuit are given below.

- (1) Show the wire connections for these components to correspond with the circuit diagram.

Circuit diagram

- (2) Name the type of switches used in this circuit.

Name _____

- (3) Explain the term “two-way switch”.

- (4) If the current flow through the bulb is 90mA (0.09A) when the voltage is 9V calculate the resistance of the bulb.

Calculation

- (c) (1) The picture opposite shows two different fittings for a table lamp. The electric cable required for the brass fitting is different to that required for the plastic fitting.
Explain what this difference is and why it is different.

Difference _____

Why? _____

Lamp Fittings

- (2) What is the cost of operating the 2kW electric grill shown for 1.5 hrs if one unit of electricity costs 20cent (€0.20)?

Electric Grill

- (3) Calculate the fuse size for a 480W electric hedge trimmer operating at 240V. Select your fuse from the following list: 1A, 5A, 10A or 13A. Note: (Power = Voltage x Current).

Electric hedge trimmer

- (4) Explain the following terms associated with domestic electricity supply:

RCD _____

Bonding _____

kWhr _____

Current _____

5. Tools & Equipment

(50 marks)

- (a) A range of equipment found in workshops is shown.

1.

2.

3.

4.

Name each piece of equipment and give its use.

No.	Name	Use
1		
2		
3		
4		

- (b) Bandsaws require regular maintenance. Describe **four** parts of a bandsaw which should be regularly checked.

- 1 _____
- 2 _____
- 3 _____
- 4 _____

- (c) Sketch **four** of the following tools in the space below.

Wood chisel	Junior hacksaw	Sliding bevel	Spring dividers	Ring spanner

- (d) Identify each piece of electronic equipment shown and discuss its use.

Equipment	Name and use

Blank Page
