### **Note to teachers and students on the use of published marking schemes**

Marking schemes published by the State Examinations Commission are not intended to be standalone documents. They are an essential resource for examiners who receive training in the correct interpretation and application of the scheme. This training involves, among other things, marking samples of student work and discussing the marks awarded, so as to clarify the correct application of the scheme. The work of examiners is subsequently monitored by Advising Examiners to ensure consistent and accurate application of the marking scheme. This process is overseen by the Chief Examiner, usually assisted by a Chief Advising Examiner. The Chief Examiner is the final authority regarding whether or not the marking scheme has been correctly applied to any piece of candidate work.

Marking schemes are working documents. While a draft marking scheme is prepared in advance of the examination, the scheme is not finalised until examiners have applied it to candidates' work and the feedback from all examiners has been collated and considered in light of the full range of responses of candidates, the overall level of difficulty of the examination and the need to maintain consistency in standards from year to year. This published document contains the finalised scheme, as it was applied to all candidates' work.

In the case of marking schemes that include model solutions or answers, it should be noted that these are not intended to be exhaustive. Variations and alternatives may also be acceptable. Examiners must consider all answers on their merits, and will have consulted with their Advising Examiners when in doubt.

### **Future Marking Schemes**

Assumptions about future marking schemes on the basis of past schemes should be avoided. While the underlying assessment principles remain the same, the details of the marking of a particular type of question may change in the context of the contribution of that question to the overall examination in a given year. The Chief Examiner in any given year has the responsibility to determine how best to ensure the fair and accurate assessment of candidates' work and to ensure consistency in the standard of the assessment from year to year. Accordingly, aspects of the structure, detail and application of the marking scheme for a particular examination are subject to change from one year to the next without notice.

## SECTION A - Core - Answer any three of the questions on this A3 sheet.

- A-1.** The 3D graphic below shows an image of a calculator. The plan and partially completed elevation and end view are also shown.

- (a) Complete the elevation of the calculator.  
 (b) Complete the end view of the calculator.

- A-3.** The 3D graphic below shows a widescreen plasma TV on a rectangular stand.

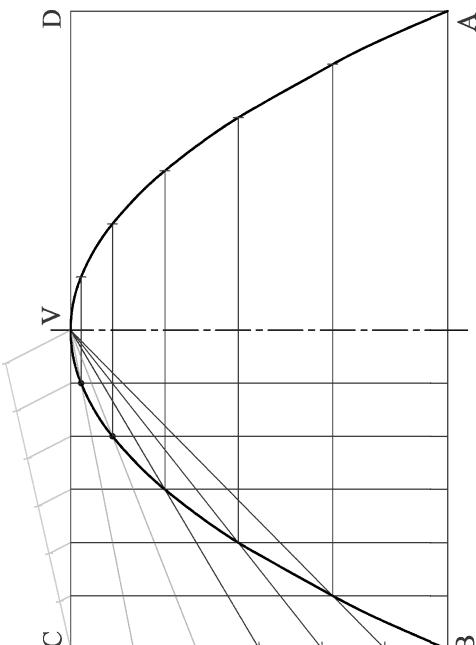

The drawing on the right shows the plan and a partially completed perspective drawing of the TV.

Complete the perspective drawing of the TV and stand.

- A-2.** The graphic on the right shows an image from the 'Angry Birds' computer game. The curve is in the shape of a parabola. The drawing below shows a portion of a parabola inscribed in a rectangle ABCD. V is the vertex of the parabola.

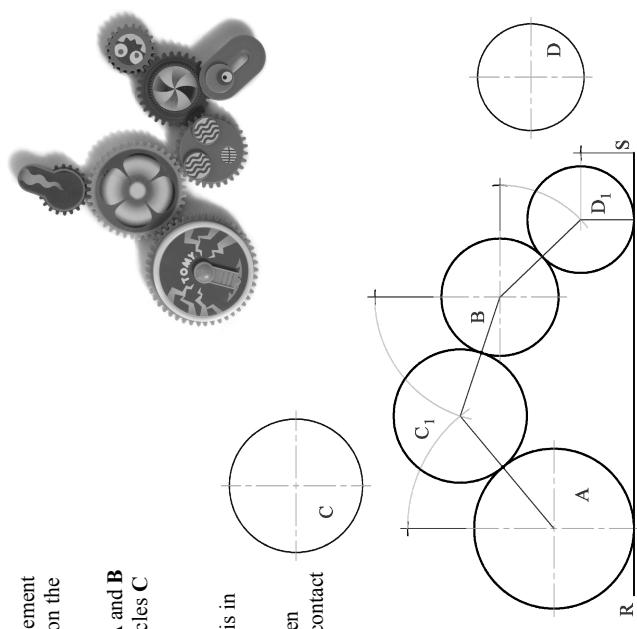

- (a) Locate the remaining points on the parabola.  
 (b) Draw the complete parabola.

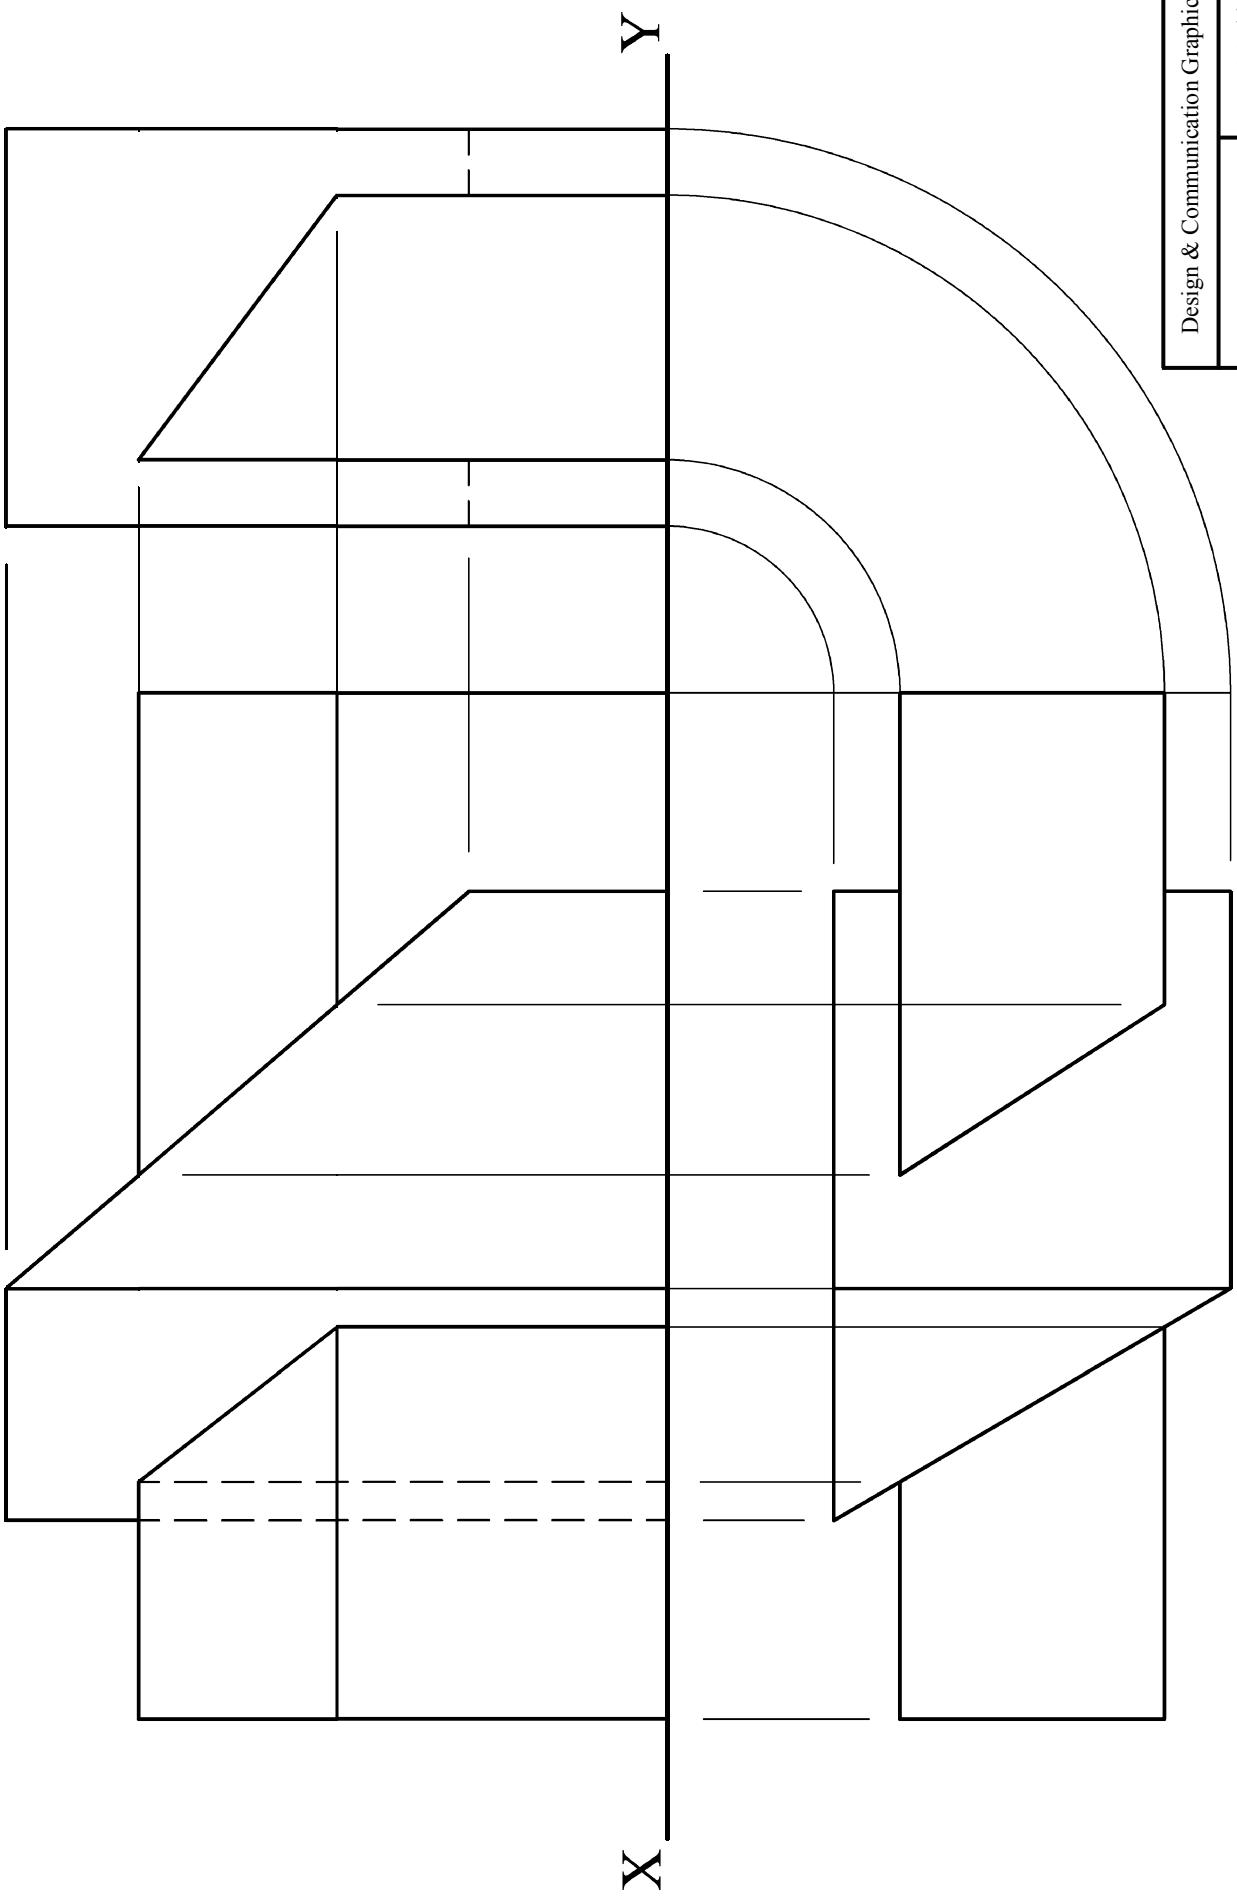

- A-4.** The drawing below shows an arrangement of circles similar to those in the toy on the right.

The horizontal line RS and circles A and B are in fixed positions as shown. Circles C and D are free to move.

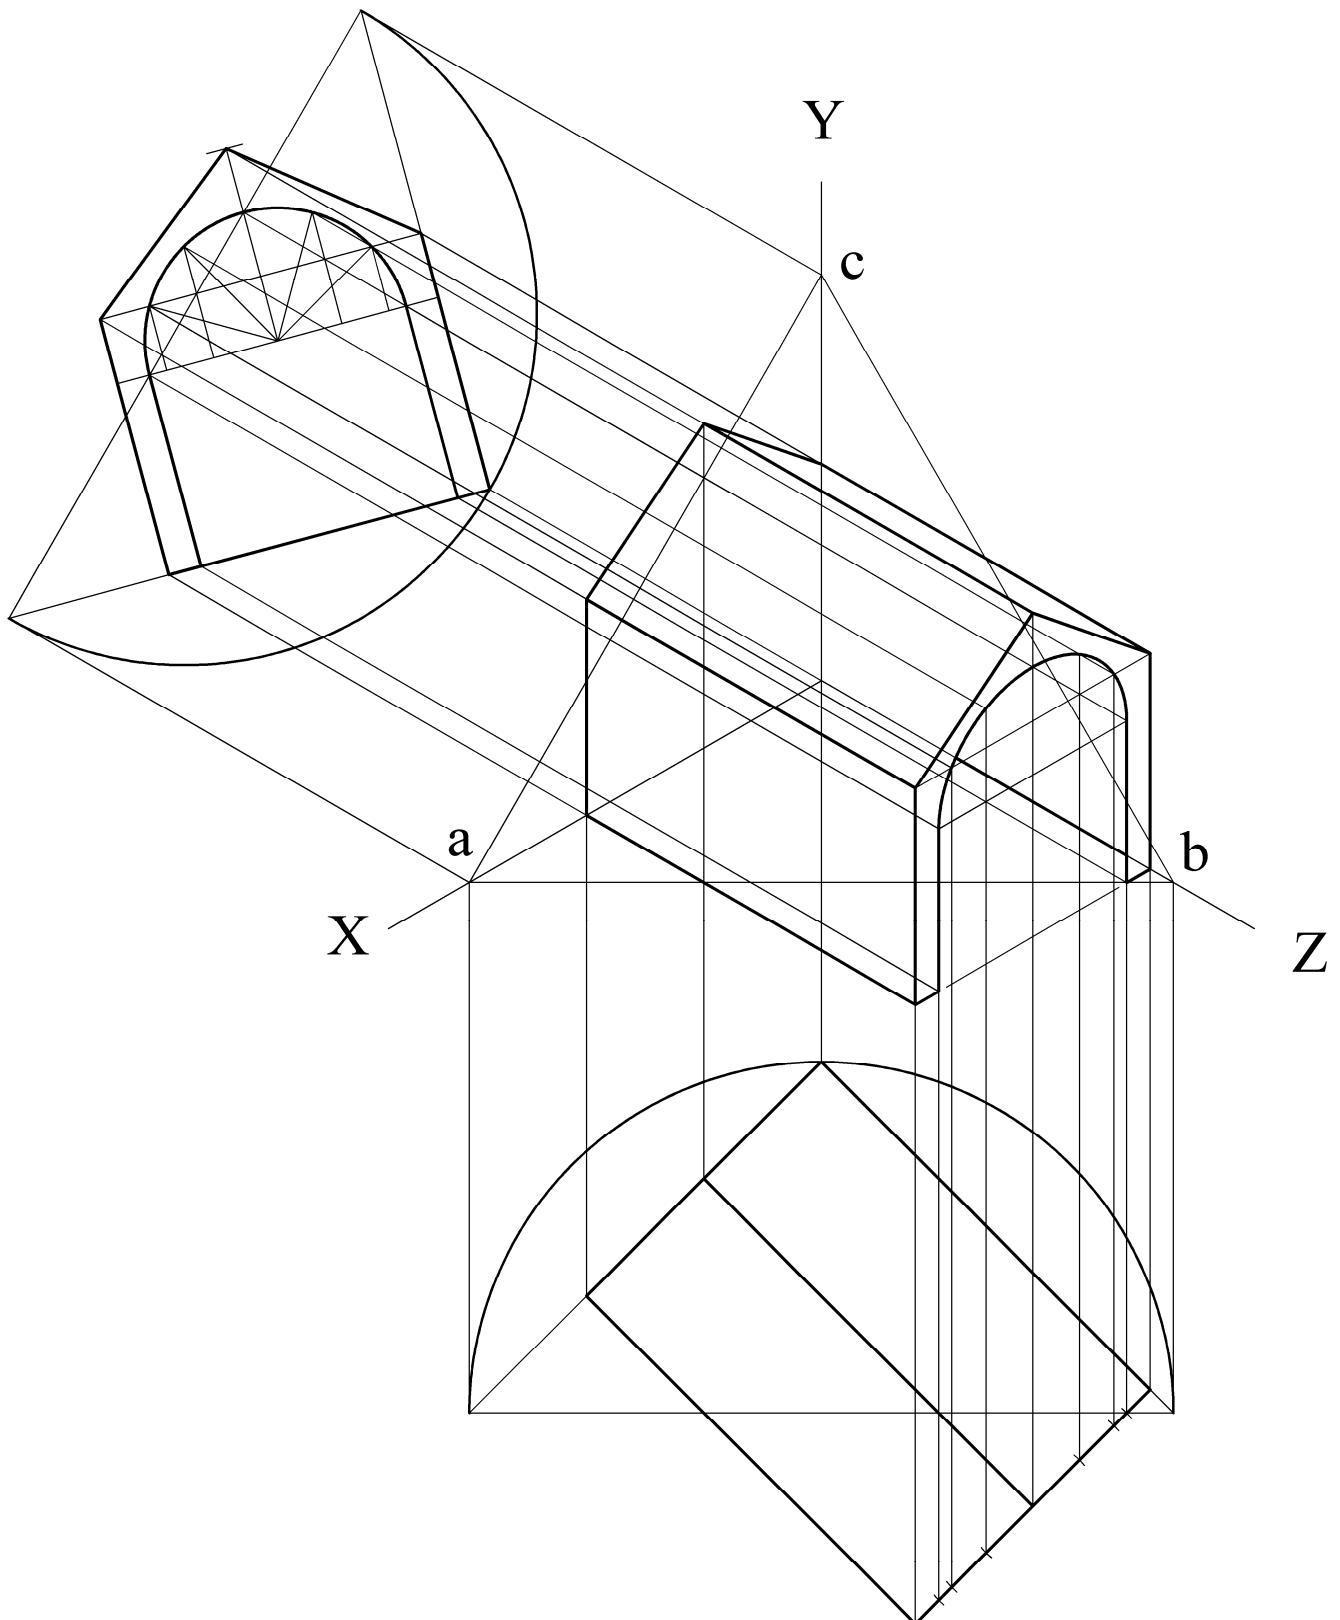

- (a) Redraw circle C when it has been moved to position C<sub>1</sub> and is in contact with circles A and B.  
 (b) Redraw circle D when it has been moved to position D<sub>1</sub> and is in contact with circle B and the line RS.  
 (c) Show all points of contact.

### Assessment Sheet 2015

Candidate Exam No.

Output	Marking criteria	Marks
<b>1</b>	<b>Design Research</b> - Exploration of main design features using primary & secondary research; Selection of appropriate graphics; Effective layout and presentation of information combining images, sketches & annotations	
a)	Extensive range of relevant criteria considered - excellent presentation	13 - 15
b)	Most relevant criteria considered - very good presentation	10 - 12
c)	Some relevant criteria considered - good presentation	7 - 9
d)	Limited criteria considered - fair presentation	4 - 6
e)	At least one criterion considered - poor presentation	0 - 3
<b>2</b>	<b>Design Feature Comparison</b> - Selection of two appropriate images; Main dimensions inserted; Comparison of main design features; Contrasting of main design features; Effective layout and presentation of information combining images, sketches & annotations	
a)	Extensive range of relevant criteria considered - excellent presentation	13 - 15
b)	Most relevant criteria considered - very good presentation	10 - 12
c)	Some relevant criteria considered - good presentation	7 - 9
d)	Limited criteria considered - fair presentation	4 - 6
e)	At least one criterion considered - poor presentation	0 - 3
<b>3</b>	<b>Freehand Graphical Representation</b> – Proportion; Form/Volume; Use of Tone/Line for effective rendering; Detailed communication of main design features to include 3D presentation quality drawing; Layout & presentation	
a)	Extensive range of relevant criteria considered - excellent presentation	17 - 20
b)	Most relevant criteria considered - very good presentation	13 - 16
c)	Some relevant criteria considered - good presentation	9 - 12
d)	Limited criteria considered - fair presentation	5 - 8
e)	At least one criterion considered - poor presentation	0 - 4
<b>4</b>	<b>SolidWorks Parts, Assembly, Drawing and eDrawing files</b>	
	• <b>Adherence to required filing structure</b>	4
	• <b>Creation of a minimum of 3 Part files</b>	6
a)	Part models - Proficiency in Parametric CAD; Selection of most appropriate profile; Sketches fully defined; Features renamed; Appropriate type of extrusions used	12
	• <b>Assembly</b> – Creation of Assembly environment; Accuracy of parts to facilitate correct assembly; Correct mating of parts; Application of appropriate appearances	6
	• <b>Factor of difficulty</b>	3
	• <b>eDrawing of CAD model</b>	2
<b>5</b>	<b>Hardcopy outputs from SolidWorks</b> - Detailed orthographic views of the Assembly; Rendered pictorial view of the Assembly; Exploded view of the CAD model; Inclusion of main dimensions; Scaling, layout and presentation	
a)	Extensive range of relevant criteria considered - excellent presentation	17 - 20
b)	Most relevant criteria considered - very good presentation	13 - 16
c)	Some relevant criteria considered - good presentation	9 - 12
d)	Limited criteria considered - fair presentation	5 - 8
e)	At least one criterion considered - poor presentation	0 - 4
<b>6</b>	<b>Photorealistic Representation</b>	
	Produce photorealistic computer generated images of the artefact	7
<b>7</b>	<b>Graphical exploration of design solutions</b> - Exploration of theme/possible solution(s); Justification of chosen solution(s); Use of appropriate images/graphics; Effective layout and presentation of information combining images, sketches & annotations	
a)	Extensive range of relevant criteria considered - excellent presentation	17 - 20
b)	Most relevant criteria considered - very good presentation	13 - 16
c)	Some relevant criteria considered - good presentation	9 - 12
d)	Limited criteria considered - fair presentation	5 - 8
e)	At least one criterion considered - poor presentation	0 - 4
<b>8</b>	<b>Presentation of Modification/Concept Design</b> – Proportion, Form/Volume, Use of Tone/Line for effective rendering, Detailed communication of modified/concept design features; Layout and presentation	
a)	Extensive range of relevant criteria considered - excellent presentation	9 - 10
b)	Most relevant criteria considered - very good presentation	7 - 8
c)	Some relevant criteria considered - good presentation	5 - 6
d)	Limited criteria considered - fair presentation	3 - 4
e)	At least one criterion considered - poor presentation	0 - 2
<b>9</b>	<b>Hardcopy outputs from SolidWorks</b> - CAD model; Detailed orthographic views of the proposed solution; Rendered pictorial view of the CAD model, Inclusion of main dimensions; Scaling, layout and presentation	
	• <b>Application of CAD skills</b>	5
a)	Extensive range of relevant criteria considered - excellent presentation	13 - 15
b)	Most relevant criteria considered - very good presentation	10 - 12
