

***Leaving Certificate Examination, 2014***

# ***Technology***

## ***Higher Level***

***Friday, 20 June***  
***Afternoon, 2:00 - 4:30***

There are **three** Sections in this paper. Attempt **all three** Sections.

**Section A:** Core - Short-answer questions.

**Section B:** Core - Long-answer questions.

**Section C:** Options - Long-answer questions.

### ***Section A - Core (72 marks)***

#### ***Instructions:***

- (a) Answer **any twelve** questions in the spaces provided.  
All questions in Section A carry 6 marks.
- (b) Draw all sketches in pencil.
- (c) Hand up this booklet at the end of the examination.
- (d) Write your examination number in the box provided  
and on all other pages used.

***Examination Number:***

Centre Number

Section	Mark

## **Section A.** Answer **any twelve** questions. All questions carry 6 marks.

- 1.** In June 2011, An Bord Pleanála refused planning permission for a €160 million twin-incinerator project at Ringaskiddy, Co. Cork.

(i) Outline **one** advantage of incineration.

---

(ii) Outline **one** disadvantage of incineration.

---

- 2.** ‘GORE-TEX®’ is classified as a *smart fabric* and is used extensively for all-weather outdoor clothing.

(i) Explain what is meant by a smart fabric.

---

---

(ii) Give **one** other example of a smart material.

---

---

- 3.** Many plastic products have the logo shown embossed or printed on them.

(i) Explain the meaning of the term **HDPE**.

---

(ii) Outline the main difference between *thermoplastic* and *thermosetting* plastic materials.

---

---

---

4. The sprocket on the engine of a scooter has 75 teeth and the sprocket on the back wheel has 150 teeth.

- (i) If the engine sprocket revolves at 1500 rpm, what is the rpm of the sprocket on the back wheel?

Calculation:

- (ii) Give **two** reasons why lubrication is used for this sprocket system.

---

---

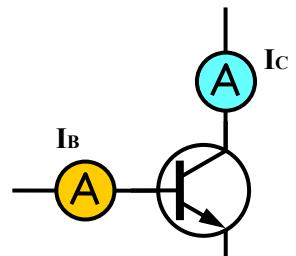

5. Part of a transistor testing circuit which includes two ammeters is shown.

- (i) Give **two** main functions of a transistor.

- (ii) Calculate the gain ( $h_{FE}$ ) of the transistor shown if the ammeter readings at  $I_B = 250\mu A$  and  $I_C = 50mA$ . **Note:**  $h_{FE} = I_c / I_b$

Calculation:

6. A *node* used in the construction of a *critical path diagram* is shown below. These diagrams are used to ensure that projects are completed within the specified time.

- (i) Explain the terms EST and LST.

EST \_\_\_\_\_

LST \_\_\_\_\_

- (ii) Identify the missing terms at X and at Y.

X \_\_\_\_\_

Y \_\_\_\_\_

EST		
Activity Name		Duration
LST		

X

Y

7. An *ergonomic* laptop stand is shown in the graphic.

- (i) Explain the term ergonomic.

---

---

- (ii) Outline **two** reasons why laptop stands are now commonly used in the workplace.

---

---

8. Product development can involve learning from other designs which have features similar to those required by the new product.

- (i) Outline **one** method used to analyse an existing product.

---

---

---

- (ii) Explain the purpose of a Quality Control (QC) system in product manufacture.

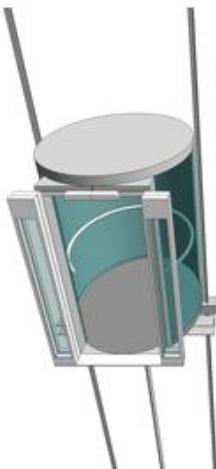

---

---

---

9. A hotel elevator has a load carrying capacity of 8 persons (average weight 80 kg). The elevator has a factor of safety of 4. Calculate the design load of the elevator.

Calculation:

- 10.** *Rapid prototyping* is used in the development of new products.

- (i) Name **one** rapid prototyping method.

---

---

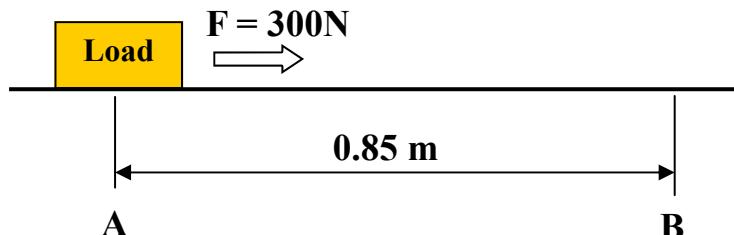

- (ii) Outline **two** reasons for manufacturing a prototype of a new product before full production commences.

---

---

---

- 11.** Calculate the **power** required to move the load shown in the graphic below from position **A** to position **B** in three seconds.

Calculation:

- 12.** The European Union aims to generate 20% of its energy from renewable sources by 2020. (*Renewables Directive 2009/28/EC*)

(i) List **three** sources of renewable energy.

---

---

---

(ii) Outline **two** factors which contribute to a worldwide increase in the demand for energy.

---

---

---

---

- 13.** Make well-proportioned freehand sketches of **two** principal orthographic views of the printer shown.

- 14.** Social networking sites play a significant role in the lives of many people.

Describe the impact of *on-line advertising* and *real-time reporting* as features of social networking.

On-line advertising:

---

---

---

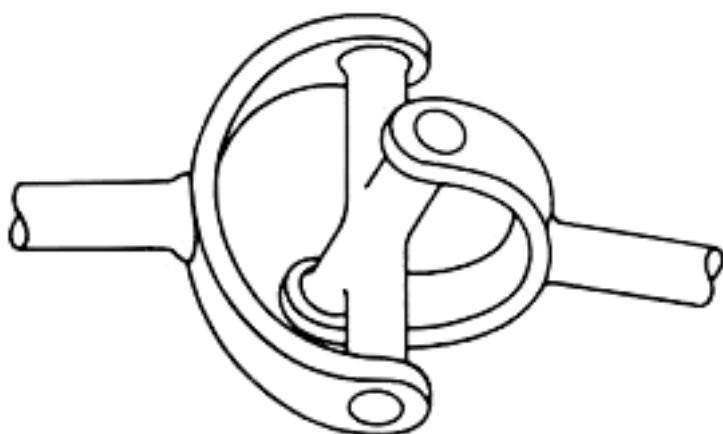

Real-time reporting:

---

---

---

- 15.** Use **two** graphic techniques to enhance the representation of the universal joint shown.

**Blank Page**
