

Letter

Michael is writing a letter to his friend Maria, telling her about three of his hobbies.

20, long Street,

Rabat.

15th May 2003

Dear Maria,

In your last letter you asked me to tell you about my three hobbies which are fishing, using the computer, and drawing on stained glass.

I like fishing as I live in a fishing village and we have a small boat. In Summer, especially on Sundays, we go fishing as well as swimming. Sometimes we go with the fishing rod and at other times we use the nets.

My second hobby is using the computer, which my father bought me as a Christmas present. It was a very big surprise when he brought it home. I use the computer for school-work, and at times I use it to make cards, invitations and other things. My brother too uses the computer, largely to play games.

Unfortunately, to date we don't have the Internet but we are going to buy some hours very as soon.

My third hobby is drawing on stained glass. I learnt how to do it last

Summer when I attended lessons organised by the local branch of the MUSEUM Organisation. Last week I made very interesting drawings on a plain piece of glass, on a plate and on a drinking glass. For Mother's Day I made a painting for mum.

Maria, now you know what I do while I am relaxing, I really would like to know something about your hobbies. So please write back soon.

Your friend

Michael
