33. Arrange the stages of general anaesthesia observed in barbiturate anaesthetic agents in progressive order. (Use correct codes)
- Stage of surgical anaesthesia.
  - Stage of analgesia or voluntary movement.
  - Stage of involuntary movement.
  - Stage of medullary paralysis.

Codes :

	Stage - I	Stage - II	Stage - III	Stage - IV
(1)	(a)	(b)	(c)	(d)
(2)	(b)	(c)	(a)	(d)
(3)	(d)	(a)	(c)	(b)
(4)	(c)	(d)	(a)	(b)

34. Consider the following statements :

- Severely affected cattle and buffaloes with acidic/alkaline indigestion may require rumenotomy.
- Acidic indigestion in ruminants occurs due to over feeding of protein and urea whereas alkaline indigestion occurs due to over feeding of carbohydrates.

Now state whether :

- Neither of the statements is correct.
- The first statement is correct not the second.
- Both the statements are correct and second is the explanation of the first.
- Both the statements are correct and second is not the explanation of the first.

35. Match the following terms with the state of the patient and nervous tissue depression. (Use correct codes)

List - 1 (Terms)

List - 2 (State)

- |                     |  |
|---------------------|--|
| (a) Hypnosis        | (i) Is a state of deep sleep accompanied by analgesia  |
| (b) Tranquilization | (ii) Is an artificially induced sleep and results from moderate depression of CNS.                     |
| (c) Narcosis        | (iii) Is a state of mild degree central depression when the patient is awake but calm.                 |
| (d) Sedation        | (iv) Is a state of behavioural change in which patient is relaxed but unconcerned of his surroundings. |

Codes :

	(a)	(b)	(c)	(d)
(1)	(i)	(iv)	(iii)	(ii)
(2)	(iv)	(iii)	(i)	(ii)
(3)	(iii)	(i)	(iv)	(ii)
(4)	(ii)	(iv)	(i)	(iii)

36. Match the terminology used for hernia with its contents. (Use correct codes)

Hernia	Contents
(a) Epiplocele	(i) Intestine
(b) Enterocoele	(ii) Uterus
(c) Vesicocele	(iii) Omentum
(d) Hysterocele	(iv) Urinary bladder

Codes :

	(a)	(b)	(c)	(d)
(1)	(i)	(iv)	(iii)	(ii)
(2)	(iv)	(iii)	(i)	(ii)
(3)	(i)	(iii)	(iv)	(ii)
(4)	(iii)	(i)	(iv)	(ii)

37. Indicate which of the following is present in radiographic developing solution ?

(a) Sodium thiosulphate	(b) Sodium Carbonate
(c) Salt of aluminium or alum	(d) Acetic acid
(1) (a) and (c)	(2) (d)
(3) (b)	(4) None of the above

38. For the ideal qualities of sutures, which is **not** correct ?

(a) Cause minimum tissue reaction	(b) More capillary in action
(c) Be knotable	(d) Have sufficient functional strength
(1) (b)	(2) (d)
(3) (c)	(4) (a)

39. Consider the following steps associated with Bovine Embryo Transfer Technology and arrange them in correct chronological order.

(a) Artificial insemination	(b) Superovulation
(c) Transfer of embryos	(d) Recovery of embryos

Answer options :

(1) (b), (a), (d), (c)	(2) (a), (b), (d), (c)	(3) (b), (a), (c), (d)	(4) (a), (b), (c), (d)
------------------------	------------------------	------------------------	------------------------

40. Indicate which of the following is **not** the obstetrical term related with fetal dystocia.  
 (a) Presentation (b) Position (c) Prevention (d) Posture

**Answer options :**

- (1) (a) and (b) (2) (c) only (3) (d) only (4) (b) and (c)

41. Indicate which of the following statements is **incorrect** with respect to synchronization of estrous cycle in bovine.

- (a) It is used to bring a group of females in estrous at predetermined time with reasonable accuracy.  
 (b) It cannot be used in cycling animals.  
 (c) It reduces the time required for detection of estrous.

**Answer options :**

- (1) (a) and (c) (2) (b) and (c) (3) (b) only (4) (c) only

42. Name the abnormal condition found in farm animals described below.

- (a) It is sterile condition and characterized by fetal death and failure of abortion.  
 (b) Placental fluids are resorbed and fetus along with its membranes get dehydrated.  
 (c) Uterus tightly wrapped around the fetus and corpus luteum persists on the ovary.  
 (d) It is suspected only when gestation period is prolonged.

**Answer options :**

- (1) Fetal anasarca (2) Fetal mummification  
 (3) Superfetation (4) Fetal maceration

43. For producing good quality of frozen semen from cow bulls, following parameters are observed critically at Frozen Semen laboratories.

Match these parameters with their respective minimum acceptable values.

(Use correct codes)

List - 1	List - 2
Parameters	Minimum acceptable values
(a) Initial Progressive motility	(i) 500 million/ml
(b) Mass motility	(ii) 50%
(c) Sperm Concentration	(iii) 3
(d) Post thaw progressive motility	(iv) 70%

**Codes :**

- |     | (a)  | (b)   | (c)   | (d)  |
|-----|------|-------|-------|------|
| (1) | (iv) | (i)   | (iii) | (ii) |
| (2) | (ii) | (iii) | (i)   | (iv) |
| (3) | (ii) | (i)   | (iii) | (iv) |
| (4) | (iv) | (iii) | (i)   | (ii) |

44. Select the correct statement with respect to testicular degeneration in male animals.
- It occurs due to increased intra-testicular temperature, toxins, endocrine disturbances and infection.
  - Semen volume is usually affected.
  - Sperm concentration is reduced and sperm abnormalities are increased.
  - In more severe cases permanent loss of seminiferous tubules occurs.

**Answer options :**

- |                      |                      |
|----------------------|----------------------|
| (1) (a), (c) and (d) | (2) (b), (c) and (d) |
| (3) (a), (b) and (d) | (4) All of these     |

45. Match the hormones with their principal functions in female reproduction.

(Use correct codes)

**List - 1 (Hormones)**

**List - 2 (Principal functions)**

- |                         |                               |
|-------------------------|-------------------------------|
| (a) Progesterone        | (i) Sexual behaviour          |
| (b) Melatonin           | (ii) Ovulation                |
| (c) Estrogen            | (iii) Seasonal breeding       |
| (d) Luteinizing hormone | (iv) Maintenance of pregnancy |

**Codes :**

- |     |       |       |       |      |
|-----|-------|-------|-------|------|
|     | (a)   | (b)   | (c)   | (d)  |
| (1) | (iii) | (ii)  | (iv)  | (i)  |
| (2) | (iv)  | (iii) | (i)   | (ii) |
| (3) | (ii)  | (iv)  | (iii) | (i)  |
| (4) | (iv)  | (i)   | (iii) | (ii) |

46. Turkey egg kidney and button ulcers in colon are the characteristic lesions of :

- |                      |                         |
|----------------------|-------------------------|
| (1) Swine erysipelas | (2) Swine influenza     |
| (3) Swine fever      | (4) Vesicular exanthema |

47. Accumulation of blood in the pericardial sac with the blood clot completely surrounding the heart is :

- |                       |                                 |
|-----------------------|---------------------------------|
| (1) Cardiac tamponade | (2) Hemothrox                   |
| (3) Pneumothrox       | (4) Haemorrhages on pericardium |

51. Match the scientists with their research area (use correct codes)

**List I**  
(Scientists)

- (a) Jenner  
(b) Pasteur  
(c) Salmon  
(d) Van Behring

**List II**  
(Research areas)

- (i) Bacterial vaccine  
(ii) Variolation  
(iii) Toxoid of *C. tetani*  
(iv) Fowl cholera

**Codes :**

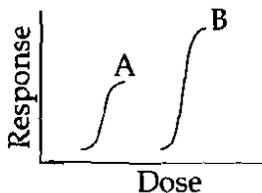

- |     | (a)   | (b)   | (c)   | (d)   |
|-----|-------|-------|-------|-------|
| (1) | (i)   | (ii)  | (iii) | (iv)  |
| (2) | (iii) | (iv)  | (i)   | (ii)  |
| (3) | (ii)  | (iv)  | (i)   | (iii) |
| (4) | (iv)  | (iii) | (ii)  | (i)   |

52. Consider the following statements :

- (a) In ruminants, pigs and horses, the chorionic epithelium is in direct contact with the uterine epithelium that prevents the transplacental passage of immunoglobulins.  
(b) The newborn are entirely dependant on antibodies received through the colostrum.  
Now state whether :

- (1) Both the statements are correct and the second is the correct explanation of the first.  
(2) Neither of the statements is correct.  
(3) Both the statements are correct, but the second is not the correct explanation of the first.  
(4) The first statement is correct, but not the second.

53. Observe the dose response curves given below of drug 'A' and drug 'B' with similar pharmacodynamics

Now state whether :

- (1) Drug A is more potent but less efficacious than drug B  
(2) Drug B is more potent and more efficacious than drug A  
(3) Drug A is less potent but more efficacious than drug B  
(4) Drug B is more potent but less efficacious than drug A

कच्चा कामासाठी जागा / SPACE FOR ROUGH WORK

P.T.O.

54. Match the clinical indications given in list 2 with drugs given in list 1

List I : Drugs	List II : Clinical Indications
(a) Pimobendan	(i) Autoimmune diseases
(b) Potassium bromide	(ii) Epilepsy
(c) Tacrolimus	(iii) Dilated cardiomyopathy
(d) Domperidone	(iv) Vomiting

Codes :

	(a)	(b)	(c)	(d)
(1)	(iv)	(i)	(ii)	(iii)
(2)	(iii)	(i)	(ii)	(iv)
(3)	(ii)	(i)	(iv)	(iii)
(4)	(iii)	(ii)	(i)	(iv)

55. Name the anaesthetic described below :

- (a) It is an intravenous anaesthetic used for sedation, induction and maintenance of anaesthesia.
- (b) It decreases the rate of GABA dissociation from its receptors.
- (c) It is available as aqueous emulsion.
- (d) It is also indicated for status epilepticus.

Answer options :

- |                   |                      |
|-------------------|----------------------|
| (1) Pentobarbital | (2) Propofol         |
| (3) Ketamine      | (4) Chloral hydrate. |

56. Consider the following statements :

- (a) Fenbendazole and Albendazole have greater anthelmintic potency than Thiabendazole.
- (b) The dissolution rate, passage along gastro-intestinal tract and absorption of Albendazole and Fenbendazole into systemic circulation are markedly slower than those observed for Thiabendazole and this results in extended residence times for active metabolites of benzimidazole methyl carbamates.

Now state whether :

- (1) Both the statements are correct and second is the correct explanation of the first.
- (2) Neither of the statements is correct.
- (3) Both the statements are correct but second is not correct explanation of the first.
- (4) The first statement is correct, not the second.

57. Which of the following drugs does/do **not** need metabolic activation for producing the effect ?

- (a) Enalapril (b) Phenacetin (c) Phenobarbital (d) Procaine

**Answer options :**

- (1) (a) and (b) (2) (c) and (d)  
(3) All (a), (b), (c) and (d) (4) Only (c)

58. Arrange the processes involved in the normal fermentation of milk in a sequence :

- (a) Souring, Neutralization, Germicidal, Putrefaction.  
(b) Neutralization, Souring, Germicidal, Putrefaction.  
(c) Germicidal, Souring, Neutralization Putrefaction  
(d) Putrefaction, Souring, Germicidal, Neutrilation.

**Answer options :**

- (1) (d) (2) (a) (3) (b) (4) (c)

59. Premises approved by and registered by the controlling authority in which animals are slaughtered and dressed for human consumption is termed as :

- (1) Meat parlours (2) Canning plants  
(3) Abattoirs (4) Aquaria

60. The four statements given below are related to milk fat. State which option is the most correct.

- (a) Negatively correlated with production  
(b) Variation is around 10%  
(c) Influenced by stage of lactation  
(d) Present in emulsion state

**Answer options :**

- (1) (a) and (d) (2) (b) and (c)  
(3) All the above (4) (a), (b) and (c)

(a)	(b)	(c)	(d)
(1) (i)	(ii)	(iii)	(iv)
(2) (ii)	(i)	(iv)	(iii)
(3) (iii)	(iv)	(i)	(ii)
(4) (iv)	(i)	(iii)	(ii)

87. Indicate which of the following chemicals are used for disbudding the calves :

(a) KOH	(b) CaOH	(c) Na <sub>2</sub> OH	(d) Na <sub>2</sub> CO <sub>3</sub>
---------	----------	------------------------	-------------------------------------

Answer options :

(1) (b) and (c)	(2) (a) and (b)	(3) (a) and (c)	(4) (a) and (d)
-----------------	-----------------	-----------------	-----------------

88. Consider the following statements :

- (a) Increasing light hours in growers will delay onset of egg production.  
 (b) Increasing light hours in layers will decrease egg production.
- (1) Both the statements are correct.  
 (2) (a) is correct but not (b).  
 (3) Both the statements are incorrect.  
 (4) (b) is correct but not (a).

P.T.O.

89. What is not true about inbreeding ?

- (a) It increases homozygosity
- (b) Used to produce distinct families within a breed
- (c) Used to develop inbred line
- (d) Frequency of desirable recessive genes is increased
- (e) Increases the prepotency

Answer Options :

- (1) (b)                      (2) (c)                      (3) (d)                      (4) (e)
- 

90. The offspring produced by crossing of a male horse (stallion) and female donkey (jennet) is known as :

- (1) Mule                      (2) Hinny                      (3) Jatsamin                      (4) Jatsa
- 

91. Crossing over takes place between homologous chromosomes in :

- (1) Mitosis                      (2) First meiotic division  
(3) Second meiotic division                      (4) All the above
- 

92. Is the mating system when the matings occur among the unrelated individuals of the same breed :

- (1) Cross breeding                      (2) In crossing  
(3) Out crossing                      (4) Line breeding
- 

93. Product of heritability and selection differential gives :

- (1) Selection Intensity                      (2) Selection Pressure  
(3) Response to Selection                      (4) Selection Limit
- 

94. The value of an individual determined by the mean value of its progeny is called :

- (1) Breeding value                      (2) Genotypic value  
(3) Phenotypic value                      (4) Dominant value
- 

कच्च्या कामासाठी जागा / SPACE FOR ROUGH WORK

A

95. Which of the following statements is/are characteristic of very good silage ?
- pH 4.2 - 4.5, ammoniacal nitrogen 10 - 15% of total nitrogen.
  - pH 4 - 5, ammoniacal nitrogen 20% of total nitrogen.
  - pH 3.5 - 4.2, ammoniacal nitrogen less than 10% of total nitrogen.
  - Butyric acid more than 0.2%, ammoniacal nitrogen more than 20% of total nitrogen.

**Options :**

- (a) and (c) are correct
- only (c) is correct
- (c) and (d) are correct
- (a), (b), (c), (d) are correct

96. Match the pairs of (A) and (B) :

(A)	(B)
(a) Albrecht Thaer	(i) Recognise protein, fat and carbohydrate as essential nutrients
(b) Willium Prout	(ii) Hay equivalent
(c) Wolff's standard	(iii) DCP and TDN system
(d) Morrisons feeding standard	(iv) Based on digestible protein, digestible fat and digestible carbohydrate

**Codes :**

- |     | (a)   | (b)   | (c)   | (d)   |
|-----|-------|-------|-------|-------|
| (1) | (ii)  | (i)   | (iv)  | (iii) |
| (2) | (iii) | (iv)  | (i)   | (ii)  |
| (3) | (i)   | (iii) | (ii)  | (iv)  |
| (4) | (iv)  | (ii)  | (iii) | (i)   |

97. Conditions where to supply by pass protein in the diet of ruminants.

- (a) High yielding milch animal yielding more than 15 kg milk/day.
- (b) Rapidly growing calves @ 1 kg/day.
- (c) Animal thriving only on poor quality roughages.
- (d) To meet out the protein requirement from microbial protein synthesis in rumen.

**Options :**

- (1) Only (a) is correct
- (2) (b) and (d) are correct
- (3) Only (c) is correct
- (4) All are correct

98. Flieg Index of silage :

- (a) Determine quality of silage.
- (b) It makes no reference to ammonia produced by proteolytic species.
- (c) It takes into account butyric acid content of silage.
- (d) It is positively correlated with the feeding value of silage.

**Options :**

- (1) (a) and (c) are correct
- (2) (a), (b) and (c) are correct
- (3) Only (a) is correct
- (4) All statements are correct

99. Match the pairs of (A) and (B) :

(A)	(B)
(a) Bacteria number of rumen content	(i) Neocallimastix
(b) pH of rumen liquor	(ii) $10^6$
(c) Prominant rumen fungi	(iii) $10^9 - 10^{10}$
(d) Protozoa count	(iv) 5.5 - 6.5

**Codes :**

- |     | (a)   | (b)   | (c)  | (d)   |
|-----|-------|-------|------|-------|
| (1) | (iii) | (iv)  | (i)  | (ii)  |
| (2) | (i)   | (iii) | (ii) | (iv)  |
| (3) | (ii)  | (iv)  | (i)  | (iii) |
| (4) | (iv)  | (iii) | (ii) | (i)   |

100. Weaknesses of TDN system of energy evaluation :

- (a) It measures energy in energy limits.
- (b) It measures all the losses from the body.
- (c) It over estimates energy value of forages in relation to concentrates.
- (d) The factor 2.25 is used to equalise the energy content of fat.

Options :

- (1) (b) and (d) are correct
- (2) (a) and (c) are correct
- (3) (c) and (d) are correct
- (4) All are correct

### सूचना — ( पृष्ठ 1 वरून पुढे.... )

- (8) प्रश्नपुस्तिकेमध्ये विहित केलेल्या विशिष्ट जागीच कच्चे काम (रफ वर्क) करावे. प्रश्नपुस्तिकेव्यतिरिक्त उत्तरपत्रिकेवर वा इतर कागदावर कच्चे काम केल्यास ते कॉपी करण्याच्या उद्देशाने केले आहे, असे मानले जाईल व त्यानुसार उमेदवारावर शासनाने जारी केलेल्या “परीक्षांमध्ये होणाऱ्या गैरप्रकारांना प्रतिबंध करण्याबाबतचे अधिनियम-82” यातील तरतुदीनुसार कारवाई करण्यात येईल व दोषी व्यक्ती कमाल एक वर्षाच्या कारावासाच्या आणि/किंवा रुपये एक हजार रकमेच्या दंडाच्या शिक्षेस पात्र होईल.
- (9) सदर प्रश्नपत्रिकेसाठी आयोगाने विहित केलेली वेळ संपल्यानंतर उमेदवाराला ही प्रश्नपुस्तिका स्वतःबरोबर परीक्षाकक्षाबाहेर घेऊन जाण्यास परवानगी आहे. मात्र परीक्षा कक्षाबाहेर जाण्यापूर्वी उमेदवाराने आपल्या उत्तरपत्रिकेचा भाग-1 समवेक्षकाकडे न विसरता परत करणे आवश्यक आहे.

### नमुना प्रश्न

प्रश्न क्र. 201. सतीची चाल नष्ट करण्यासाठी कोणी मूलतः प्रयत्न केले?

- |                           |                         |
|---------------------------|-------------------------|
| (1) स्वामी दयानंद सरस्वती | (2) ईश्वरचंद विद्यासागर |
| (3) राजा राममोहन रॉय      | (4) गोपाळकृष्ण गोखले    |

ह्या प्रश्नाचे योग्य उत्तर “(3) राजा राममोहन रॉय” असे आहे. त्यामुळे या प्रश्नाचे उत्तर “(3)” होईल, यास्तव खालीलप्रमाणे प्रश्न क्र. 201 समोरील उत्तर-क्रमांक “③” हे वर्तुळ पूर्णपणे छायांकित करून दाखविणे आवश्यक आहे.

प्र. क्र. 201. ① ② ● ④

अशा पद्धतीने प्रस्तुत प्रश्नपुस्तिकेतील प्रत्येक प्रश्नाचा तुमचा उत्तरक्रमांक हा तुम्हाला स्वतंत्ररीत्या पुरविलेल्या उत्तरपत्रिकेवरील त्या त्या प्रश्नक्रमांकासमोरील संबंधित वर्तुळ पूर्णपणे छायांकित करून दाखवावा. ह्याकरिता फक्त काळ्या शाईचे बॉलपेन वापरावे, पेन्सिल वा शाईचे पेन वापरू नये.
