- **Size of the undertaking** - The bigger the undertaking, the larger is the requirement for working capital
- **Stage of development** - If a business is in the beginning stages, it will need more working capital
- **Time of production** - If it takes a long time to finish the final product for example, grain farming, the requirement for working capital will be higher
- **Rate of stock turnover** - The more quickly goods are disposed of, the quicker the money comes in, the less working capital is needed - You can use the money of the stock to buy new stock with cash at a better price. If the stock turnover rate is slow, the demand for working capital will be higher
- **Selling and buying terms** - If the business purchases the stock on credit and sells it for cash, its working capital requirements will be lower. If you purchase with cash and sell the stock on credit, you will need more working capital
- **Seasonal consumption** - Manufacturers and merchants that purchase seasonal goods will require more working capital. The factory must be kept working throughout the year, while the sales take place during one season

- **Seasonal production** - It takes a long time to produce corn, wheat, etc. Up to the time that it is ready for harvest, the farmer has expenses for example wages, fuel, storage etc.

4.3 **DRIE FAKTORE WAT DIE BEDRYFSKAPITAALBEHOEFTE BEPAAL**

- **Aard van die onderneming.** $\checkmark \checkmark$
Bv. 'n myn se behoeftes aan bedryfskapitaal is groter as die van 'n kafee, want 'n myn het bv. meer werkers wat lone moet kry \checkmark
- **Grootte van die onderneming**
Hoe groter die onderneming, hoe groter is die behoefte aan bedryfskapitaal.
- **Ontwikkelings stadium**
'n Besigheid wat nog besig is om uit te brei, het meer bedryfskapitaal nodig.
- **Produksietydperk**
As die eindproduk lank neem om te voltooi, Bv. graanboerdery, word meer bedryfskapitaal benodig.
- **Omsetsnelheid van voorraad**
Hoe vinniger die voorraad in kontant omgesit word, hoe minder bedryfskapitaal word benodig. Geld kom gouer in waarmee nuwe voorraad gekoop en bedryfsuitgawes mee betaal kan word.
Hoe stadiger die omsetsnelheid, hoe groter is die behoefte aan bedryfskapitaal.
- **Inkoop- en verkoopvoorwaardes**
Indien die onderneming voorraad op krediet aankoop en dit vir kontant verkoop, is die behoefte aan bedryfskapitaal minder. Wanneer goedere vir kontant aangekoop word en op krediet verkoop word, word meer bedryfskapitaal benodig.
- **Seisoensverbruik**
Fabrikante en handelaars wat goedere verkoop wat seisoens gebonde is, se bedryfskapitaalbehoefte is groter. Die fabriek moet deur die jaar aan die gang gehou word, terwyl die goedere net sekere tye van die jaar verkoop word.

- **Seisoensproduksie**

Graangewasse neem redelik lank om verbou te word totdat dit gereed is om geoes te word, is daar uitgawes, bv. lone, brandstof, ens. dit verhoog die behoefte aan bedryfskapitaal.
