FOR TEACHERS ONLY

The University of the State of New York REGENTS HIGH SCHOOL EXAMINATION

ENGLISH

Thursday, June 14, 2007—9:15 a.m. to 12:15 p.m., only

SCORING KEY AND RATING GUIDE

Mechanics of Rating

Updated information regarding the rating of this examination may be posted on the New York State Education Department's web site during the rating period. Check this web site http://www.emsc.nysed.gov/osa/ and select the link "Examination Scoring Information" for any recently posted information regarding this examination. This site should be checked before the rating process for this examination begins and several times throughout the Regents examination period.

The following procedures are to be used for rating papers in the Comprehensive Examination in English. More detailed directions for the organization of the rating process and procedures for rating the examination are included in the *Information Booklet for Administering and Scoring the Comprehensive Examination in English*.

Scoring of Multiple-Choice Questions

Indicate by means of a check mark each incorrect or omitted answer to multiple-choice questions on the Session One answer sheet; do not place a check mark beside a correct answer. Use only red ink or red pencil. In the box provided under each part, record the number of questions the student answered correctly for that part. Transfer the number of correct answers for the Part A and Part B multiple-choice questions to the appropriate spaces in the box in the upper right corner of each student's **SESSION ONE** answer sheet.

Session One Correct Answers		
Part A	Part B	
(1) 3	$(7) \ 3$	
(2) 1	(8) 2	
(3) 4	(9) 1	
(4) 2	(10) 1	
(5) 3	(11) 4	
(6) 1	(12) 2	
	$(13) \ 3$	
	$(14) \ 4$	
	(15) 2	
	(16) 1	
	, ,	

Rating of Essays

- (1) Follow your school's procedures for training for rating. This process should include: Introduction to the task—
 - Raters read the task and summarize its purpose, audience, and format
 - Raters read passage(s) and plan own response to task
 - Raters share response plans and summarize expectations for student responses

Introduction to the rubric and anchor papers—

- Trainer reviews rubric with reference to the task
- Trainer reviews procedures for assigning scores
- Trainer leads review of each anchor paper and commentary (**Note:** Anchor papers are ordered from high to low within each score level.)

Practice scoring individually—

- Raters score a set of five papers individually
- Trainer records scores and leads discussion until raters feel confident enough to move on to actual scoring
- (2) When actual rating begins, each rater should record his or her individual rating for a student's essay on the rating sheet provided, *not* directly on the student's essay or answer sheet. Do *not* correct the student's work by making insertions or changes of any kind.
- (3) Each essay must be rated by at least two raters; a third rater will be necessary to resolve scores that differ by more than one point. The scoring coordinator will be responsible for coordinating the movement of papers, calculating a final score for each student's essay, and recording that information on the student's answer paper for Session One.

SESSION ONE – PART A – SCORING RUBRIC
LISTENING AND WRITING FOR INFORMATION AND UNDERSTANDING

1 his Responses at this level:	or -provide minimal or no evidence of textual understanding -make no connections between information in the text and the assigned task	-are minimal, with no evidence of development xt are fied	show no focus or organization organization	able -are minimal -use language that is incoherent or inappropriate ess nces	assessment of assessment of conventions unreliable cult - may be illegible or not recognizable as English
Responses at this level:	-convey a confused or inaccurate understanding of the text -allude to the text but make unclear or unwarranted connections to the assigned task	-are incomplete or largely undeveloped, hinting at ideas, but references to the text are vague, irrelevant, repetitive, or unjustified	-lack an appropriate focus but suggest some organization, or suggest a focus but lack organization	-use language that is imprecise or unsuitable for the audience or purpose reveal little awareness of how to use sentences to achieve an effect	-demonstrate a lack of control, exhibiting frequent errors that make comprehension difficult
TION AND UNDERSTAND 3 Responses at this level:	convey a basic understanding of the text-make few or superficial connections between information and ideas in the text and the assigned task	-develop ideas briefly, using some details from the text	-establish, but fail to maintain, an appropriate focus - exhibit a rudimentary structure but may include some inconsistencies or irrelevancies	rely on basic vocabulary, with little awareness of audience or purpose exhibit some attempt to vary sentence structure or length for effect, but with uneven success	-demonstrate emerging control, exhibiting occasional errors that hinder comprehension
LISTENING AND WRITING FOR INFORMATION AND UNDERSTANDING 5	- convey a basic understanding of the text -make implicit connections between information and ideas in the text and the assigned task	-develop some ideas more fully than others, using specific and relevant details from the text	-maintain a clear and appropriate focus exhibit a logical sequence of ideas but may lack internal consistency	-use appropriate language, with some awareness of audience and purpose occasionally make effective use of sentence structure or length	-demonstrate partial control, exhibiting occasional errors that do not hinder comprehension
LISTENING AN 5 Responses at this level:	-convey a thorough understanding of the text-make clear and explicit connections between information and ideas in the text and the assigned task	-develop ideas clearly and consistently, using relevant and specific details from the text	-maintain a clear and appropriate focus exhibit a logical sequence of ideas through use of appropriate devices and transitions	-use language that is fluent and original, with evident awareness of audience and purpose vary structure and length of sentences to control rhythm and pacing	-demonstrate control of the conventions, exhibiting occasional errors only when using sophisticated language
6 Responses at this level:	reveal an in-depth analysis of the text make insightful connections between information and ideas in the text and the assigned task	-develop ideas clearly and fully, making effective use of a wide range of relevant and specific details from the text	-maintain a clear and appropriate focus exhibit a logical and coherent structure through skillful use of appropriate devices and transitions	-are stylistically sophisticated, using language that is precise and engaging, with a notable sense of voice and awareness of audience and purpose-vary structure and length of sentences to enhance meaning	-demonstrate control of the conventions with essentially no errors, even with sophisticated language
QUALITY	Meaning: the extent to which the response exhibits sound understanding, interpretation, and analysis of the task and text(s)	Development: the extent to which ideas are elaborated using specific and relevant evidence from the text(s)	Organization: the extent to which the response exhibits direction, shape, and coherence	Language Use: the extent to which the response reveals an awareness of audience and purpose through effective use of words, sentence structure, and sentence variety	Conventions: the extent to which the response exhibits conventional spelling, punctuation, paragraphing, capitalization.

If the student writes only a personal response and makes no reference to the text(s), the response can be scored no higher than a 1.
Responses totally unrelated to the topic, illegible, incoherent, or blank should be given a 0.
A response totally copied from the text(s) with no original student writing should be scored a 0.

The power of books on an individual's life is one that can be either calming or stimulating. To Lary Paulsen, books became both his haven as will as an unending adventure. The power of books on Hary Paulsen's life is a perfect to example of how books can influence and change a person's character and outlook on life, both in the past and in the future As a child Hory Paulson growing up in the Philippines, Day Paulsen grew up without with very little or no socializing. He received his aducation solely through a private military tutor. When he was 10 years old, Lary's parents moved to Washington D.C., where Sary received his first daste of going to a public of school. The few years of private tutoring had made Day very timed and shy, and the sight of all the rowdy kide in the classroom terrified him. Overcome by his fear, Hory Dary remained in the cloak closet after all the other children had taken their seats. It seemed as if nothing could make dary feel comfortable and overco in this environment, but his teacher had the answer - a picture book. Instead of forcing Hary to come out of the closet and sit with the uest of the class, Lay's teacher or sat down beside him and gave him a picture book that had a house's head on the cover. It say flipped through the book, he was centranced by its dreauty and lost in the stillness around him. The book had calmed Gary down Dary's teacher had given him something that would change his view of public ischool forever. He was no donger terrified, but rather he willingly consented with his teacher to join the class after he'd flipped through the staybook. This picture book had transformed young day from a "painfully shy individual, to a wold, but calm one.

The effect of books on Day Paulsen's life did not end when he was 10 years old. Books continued to influence his life, but in different ways as he grew older. Is an unpopular therteen-year old living in a small town in Minnesota, Lary would sell wander in the streets selling newspapers, on hoping to earn money to buy better clothes mande in an effort to escape his chaotic lefe at home with two drunken parents. Gary the believed that money was the answer to his life oper problems at home and school, but he desired otherwise. Hory incounts one dutter wenter evening when he hap waited outside a don in hopes of hustling some drunks for some extra change. Havy While waiting for the drinkers at the box to get drunk, Dary walked into a library to stay warm. It card and Logaranto opened the door to a world where, to Hary, there was "something other than ... dunken parents, or burg beaten up by school bullies, or a dife where duas always hurt." Books became a place where Hary could escape the realities of me his miserable childhood and look "outside himself, forward and not backward." Because of the power of books, Stary was given an opportunity to look forward to better present and a better future. Is he satism a creaking rocking chair in a basement with a dimly lit bull, Lary was able to realize everyth perceive over a dretter futiere united of wallowing in his present condition, Even after he joined the aimy and started a family of his own, boo day's life was still affected the power of books. this time, he would write them, forsaking his "work, family, earning and potential. Once again, changed the course of his life, as Lary began to spend the rest of his difetime un Gollywood, proofreading and uviting articles and or a chapter of a clook revery night. Day admit that being a writing a book difficult, he finds excitement toydance." If it wasn't for books, day might an unhappy electronics engineer in a satellite de estation, but books gave him something more than the misery that he had gone through in his childhoods. through wooks, Day was able to achieve his drue longery and for a better fettere as it they gave him an optimistic view of the future, which helped him bury the msery of his past childhood and day faulsen.
"Books saved my life," The influence of books on the life of an individual is astounding. In day toulsen's a haven of tranquility in his eventually a difetime ambition. wought to Sary to the there is always hope despite the presence of misery. (the power of) books influenced Hary's lefe, as much a positive influence on the generations now and to fallow.

Anchor Level 6 – A

Quality	Commentary	
	The response:	
Meaning	Reveals an in-depth analysis of the text, stating that the power of books can be either	
	calming or stimulating and can influence and change a person's character and outlook. The	
	response makes insightful connections between information and ideas in the text and the	
	assigned task [Just as (the power of) books influenced Gary's life, books can have as much a	
	positive influence on the generations now and to follow].	
Development	Develops ideas clearly and fully, making effective use of a wide range of relevant and specific	
	details from the text to describe Paulsen's elementary school experience with books (timid and	
	shy, remained in the cloak closet, a picture book), his chaotic life as a teen (unpopular thirteen-	
	year old, selling newspapers to buy better clothes, two drunken parents), and adult	
	realizations (he would write books forsaking his "work, family, earning, and potential").	
Organization	Maintains a clear and appropriate focus on the influence of books on the life of an individual.	
	The response exhibits a logical and coherent structure by chronicling Paulsen's association with	
	books, first presenting him as a <i>terrified</i> child, and then tracing his development into a teen able	
	to escape the realities of his miserable childhood to become an adult with an optimistic view of	
	the future. Transitions are skillfully used (Overcome by his fear, Because of the power of books,	
	Even after he joined the army).	
Language Use	Is stylistically sophisticated, using language that is precise and engaging (books became his	
	haven as well as an unending adventure and he was entranced by its beauty and lost in the	
	stillness around him), with a notable sense of voice and awareness of audience and purpose	
	(instead of wallowing in his present condition). The response varies structure and length of	
	sentences to enhance meaning (Gary believed that money was the answer to his problems at	
~	home and school, but he learned otherwise).	
Conventions	Demonstrates control of the conventions with essentially no errors, even with sophisticated	
	language.	
Conclusion: Ov	verall, the response best fits the criteria for Level 6 in all qualities.	

Literature is one of the most important forms of communication. It can easily spread new ideas to large groups of people in our modern world, just as it has for hundreds of years. The promotion of book tains and local libraries is something all societies should encleaver to perform, because of the many positive effects books have on people. Gary Paralsen's life is an example of the power of books, and praises their merit for bringing him through the inany challenger he has laced. Book can affect our emotions in poweral ways, they can cornfort, provide hope, and inspire dreams. Paulsen recollects how books contacted him in his time of need in his childhood. He writes of one episale on his tirst day of public school, where he was too territied to leave the contribut, the tander counterts him by reading a picture book to him, until he treels reach to leave the room. The power of the Comfort books provide is also evident another time in Paulsen's life. At a time when he was selling, engages at night, and hustling drunks for loose change, Poursen describes has books changed his outlook. He describes his society when he was B as tiding him very unpopular, and he entertained the vain hopes that making money to buy new clothes would change his like for the bother. Instrict he found relief in a beek that a carring librarion provided when he straged into the library on a cold wither night. They comparted his fear of being bullied from the tougher kids in school. At a very desperate and realtful time in lais life Paulson found comfort in reading. The individual books are not important, as Panson says he can't varieties removes any of the titles he read. It is the ownth feeling that is instilled by literature which renders it so important in our daily lives. Another lage resourse that literature can convey is one of lague, and there are nawy movels that can pull us in our most depressing times. In attending public sheet for the first time, Paulsen hold a strong team at rejection, but the books he reads gives him a hope of being accepted. The other the when Panken needed hope was in the long Minnasta winter of his Mitteenth year, with his parents continually drunk and fighting. The books that his librarian gave him changed his degressing outlook, by illustrating that there is a whole life outside himself, and a wide world to explore. He recollects, "It made me look forward, instead of backwards. He needed hope when he had little to bot forward to, and books provided a way to forget about reality for a while. One of the most parartal tollage literature can conveys inspiration. Vunlson perservered in that Mark basement behind the hornace because these books provided him with the inspiration to become

Joday, I would like to discuss the power of books. books are extremely powerful tools we can use to change lines one person whose life was changed by books is Lary Paulsen. Books helped him escape from fears, escape misery, and caused him to make a huge change in his life as an adult. Without books, Paulsen would be a nery different person Firstly, books can help people escape from fears. when Paulsen was 10, his family moved to Washington, D.C., and he was very afraid to go into his classroom at his new school. His new teacher helped him get oner his shyness by using a book I he read him a story and he got "lost in the book and energting else fell away: The book enabled him to stop forusing on his fears and helped him escape to a calmer place. Decordly, books can help people escape misery Paulsen was new unhappy with his adolescent life in a small minnesota town. He was very unpopular and tried to make money selling newspapers so he could bry better clathes one day, he went into the library to get warm, and the betrarian game him a book, and by doing this, according to Paulsen, "gane him enerything". The began to read more and more, and the books showed him that there was happiness out there and helped him Iscape from his unhappy life. Shirdly, books can cause people to make good big lifestyle changes. Offer after Paulsen had a job and

a family, he decided that his true delan was
to become a writer. He moved to Hollywood to
follow his dream and apprenticed himself to two
editors to primprove his writing abilities. He still
finds writing difficult but lones it now more than
ever because to "the stories dance, and the than
whythmis and movements of them are quaddly
exciting."

Books have the power to change lines. They help us escape from the realities of life and can greatly influence decisions we make in own lines. I urge all of you to haves their powerful tool and get out there and read!

	The response:	
Meaning	Conveys a thorough understanding of the text, explaining how books are extremely powerful tools and how without books, Paulsen would be a very different person. The response makes clear and explicit connections between information and ideas in the text and the assigned task (The book helped him escape to a calmer place and the books showed him that there was happiness out there).	
Development	Develops ideas clearly and consistently, using relevant and specific details from the text to discuss how books <i>helped</i> Paulsen <i>get over his shyness</i> , gave him relief from <i>his unhappy life</i> , and allowed him to <i>follow his dream</i> .	
Organization	Maintains a clear and appropriate focus on the power of books <i>to change lives</i> . The response exhibits a logical sequence of ideas, moving from how books affected Paulsen's childhood and teen years to their effect on him as an adult. Appropriate transitions are used (<i>Firstly, Secondly, Thirdly</i>).	
Language Use	Uses appropriate language, with evident awareness of audience and purpose (<i>Today, I would like to discuss the power of books</i>). The response varies structure and length of sentences (<i>After Paulsen had a job and a family, he decided that his true dream was to become a writer</i>).	
Conventions	Demonstrates control of the conventions with essentially no errors, even with sophisticated language.	
Conclusion: O	Conclusion: Overall, the response best fits the criteria for Level 5, although it is somewha	
stronger in conventions.		

Books and literature in general can have an overwhelming impact and influence in one's lifes. Words, organized creatively and poetically, have the ability not only to change lives but define them as well. Gary Paulsen, a renowned author, has (first hand), experienced just what significance books can hold in someones life. His success just gives to show that in throwson a world with books all things can be book is much more than just words arranged methodically on a page or even the story within the leather binding. According to Gary Pauten books can save 11ves. Quoted directly he stats that, "books have sustained me." In other words books can keep you going when nothing else will. They have the ability to erase fears and wornes, shyness and anger. Books have allowed the unknown to become a 11 He 1855 Frightening. Gary Paulson reiterated this fact when he told a take in which he as a young child was faced into a public school and became over whelmed by the foreigness of it all. He explained how the teacher had drawn him out, literally and emotionally, simply by reading to him. The words although he cont remember them now, calmed him and he became lost in the story allowing all the wornes and fears to fall away. Backs have the incredible power to make things seemingly insignificant and, at times, to protect you from the auside world Not only can beats from change your life but they have the ability to define it as well F créate realizations that life can be different. This fact was one that Gary Paulsen was lucky enough

to realize, and a fact that shaped him into the worder ful center he is to this day. & Growing up drunken parents had bood that was all 300, miserable, and worthless just like the people he rew up around Opening a book one day however where he Gary Paulsen didn't have to this thought resourcing in his lock at life attack He could be. Taking the initiative long and hard, through the storybooks ite put his life may partition faith and power to define your life, to direct you on motivate you to take that first Paulson ower his life to the "loops and which of the story dance" and so do many others. Books lives spurred action, and brought sense and purpose to reachers. Have you read a book

- •	The response:	
Meaning	Conveys a thorough understanding of the text, stating that books can have an overwhelming impact. The response makes clear and explicit connections between information and ideas in the text and the assigned task (He explained how the teacher had drawn him out by reading to him and Opening a book one day showed him that there were places where he didn't have to hurt).	
Development	Develops some ideas more fully than others. The response uses specific and relevant details from the text to describe how books affected Paulsen's childhood and teen years (<i>The words calmed him</i> once <i>he became lost in the story</i> and <i>The books he read motivated him and showed him just how grand life could be</i>). The discussion about how Paulsen <i>came out on top</i> is less developed.	
Organization	Maintains a clear and appropriate focus on the <i>ability</i> of books <i>not only to change lives but define them as well.</i> The response exhibits a logical sequence of ideas, moving chronologically through Paulsen's life to show how books affected him during each stage. Appropriate transitions are used (<i>A book is much more than just words</i> and <i>Not only can books change your life</i>).	
Language Use	Uses language that is fluent and original (reiterated, seemingly, vulnerable), with evident awareness of audience and purpose (Books have changed lives and brought sense and purpose to readers). The response varies structure and length of sentences to control rhythm and pacing (Books have the power to motivate you to take that first step and Have you read a book lately?).	
Conventions	Demonstrates control of the conventions, exhibiting occasional errors in the use of commas (states that, "books; calmed him and; Taking the initiative Gary).	
Conclusion: Ove	erall, the response best fits the criteria for Level 5, although it is somewhat weaker	

Conclusion: Overall, the response best fits the criteria for Level 5, although it is somewhat weaker in development.

Books are very powerful tools. As we gather today
Surrounded by so many, it is important that we fully
appreciated all that books can provide. They act as
a unifier, common ground for those who feel worlds apart.
They can provide you with a career. But most importantly
they can give you new aim in life. Author Gary Paulson
has experienced each one of these first hand.
As a kid, Gary was homeschooled, and when introduced
to the public school system, was hesitant to assimilated.
His first life changing experience involving books occurred
soon after: his teacher read to Bary alone, and
allowed him time to become comfortable with the teacher,
and gave him the confidence to join the other students.
By sharing something as special as a book with him,
Gary Felt welcome, and no longer felt like an outcost.
Paulsen's next life-altering run-in with books happened
when he was still relatively young. After enduring a
chaotic home life, Gary became a vagrant of sorts, living
in a shabby apartment, hustling drunks for the little
money he survived on. At one point, he stoke away into
a library for some peace and warmth. After being
befriended by the librarians and given books, he began
to turn his life around. Instead of wandering the
streets at night, he road. The books prevented him from
continuing down the wrong path.
As a grown man with a good job, Gary had many
reasons to thank the books that brought him to his
current status in life. Little did he know that he would

Anchor Paper - Part A-Level 5 - C

experience another change. One night while at work, he realized that instead of doing what he was doing then, he wanted to be a writer. He packed up his things, moved to Hollywood, and worked to become the well-known author he is today. All of the so minor changes, no matter how small at the time, changed the life Gary Paulsen, and all of them stemmed from his experience with books. He says that books gave him "a look at life outside of myself that made me look forward instead of backward" This redirection is the main the characteristic of books that help so many. Reading can provide Knowledge, comfort, support and, most important of all, a chance at new life. And so, as we open this book fair, and as you all browse through the titles, keep in mind the possibility that the next book you read could change your life Forovor.

In this world books are essential to the growth of peoples minds, when people strive to be the best and acheive their dreams, they get their Knowledge from books. It is unbelievable the effects books can have on lite, on it's youth and it's older generations. It is the power of books that helps people for time to live Books affect the minds of all people. The young children of Kindergarden or 1st and 2nd grade are being affected by books. Books are broadening their thoughts and helping them so grow. In the account written by famous author Gary Paulson, he talks his first day of school in this recou of this account; he was very nervous and scared his first day, but books helped him get through it. Books were a relaxing activity for Gary Paulson when he was young, and be enjoyed it very much. Books Effected Gary Problems childlife in many ways.

For the Young Adult or teens books can be very Supportive during their time of growth. During Gary Paulsons teen stage his family was unstable. Palsen characterized his home life as chaotic. During this time Gary Paulson used books to escape, bury decribed books as a world were he fan get away from the pain and get away from the toubles in life. This show that books can also be essential for survival, it is important to the mental status of woung youing adolts. Books also can increase your reading ability. Before it took Gary hours to read a simple people becaused he was mable to lead well. Books are imported in many ways during lite.

Anchor Paper - Part A-Level 4 - A

Books can also be supartice to adults, Book allow may adults to escape from the hardships of water Jobs and life trades. Gary Paulson uses books as a escape. Here lefels to "

Them as "exciting". Gary says he emptys the way the stocks dama. Books can help stimulate the mind and create a peace. Book are essencial to a 11 stages of life and can give enlightenment.

The force of books on this horld is magnificant.

It is books that create heres and stars, Books are a sorre of browleye for all people and effect live every day. There is no wherestimeting the power of books on this work that effect

Organization	Maintains a clear and appropriate focus on how books affect people. The response exhibits a	
	logical sequence of ideas by chronologically presenting information about the impact of books	
	on young children, teenagers, and adults, including references to Paulsen, but the discussion of	
	the effect on Paulsen's job lacks internal consistency (Gary Paulsen uses books as a escape).	
Language Use	Uses appropriate language, with some awareness of audience and purpose (It is the power of	
	books that helps people continue to live). The response occasionally makes effective use of	
	sentence structure and length (Gary Paulsen describes his first day of school in a portion of this	
	account; he was very nervous and scared but books helped him get through it).	
Conventions	Demonstrates partial control, exhibiting occasional errors in spelling (essencial, acheive,	
	kindergarden), punctuation (peoples minds; life".; During this time Gary), agreement (Books	
	it and Book are), and shifts in tense and point of view that do not hinder comprehension.	
Conclusion: Overall, the response best fits the criteria for Level 4 in all qualities.		

Regardless of whome a person is from or how old thou are at ane point or another they have been by "the power of books". Though some May not agree, books give us so much within our lives, from to pure leisure. It, it is still important to understand haw great an impact books \$ con completely change their way of Forinstance, outhor Gony Poulsen Rois bean Changel and even "Saved" by books numerous times As a young boy, Garly Paulsen lived on a had no (formal) public schooling; therefore, when it come time for his family to return toth Gary to attend public School, he was "painfully shy". As he explains how his teacher handled him the first day of school he not only implies that his tracher old everything right, but also now appreciation for raighte wasony 10 years old was, "105tin the quiet of the 105tin the book so deeply that everythin PISE Fellowau! Paulsen was Struction from the the bons, Paulsen decided

Quality	Commentary	
	The response:	
Meaning	Conveys a basic understanding of the text, stating that Gary Paulsen has been changed and	
	even "saved" by books numerous times. The response makes implicit connections between	
	information and ideas in the text and the assigned task (As he explains how his teacher handled	
	him the first day of school he implies that his teacher did everything right).	
Development	Develops some ideas more fully than others. The response uses specific and relevant details	
	from the text to discuss Paulsen's elementary and teen experiences related to books ("painfully	
	shy", " lost in the quiet of the cloak room", Paulsen decided to enter a library to get warm).	
	His decision to become a writer in adulthood is less developed.	
Organization	Maintains a clear and appropriate focus on how books can indeed change the course of any life.	
	The response exhibits a logical sequence of ideas, moving chronologically through Paulsen's	
	experiences with books, using the conclusion to reiterate ideas stated in the introduction about	
	the great impact of books. The response lacks internal consistency in paragraph 3, weakly	
	transitioning from a discussion of Paulsen's 10 years old experiences to those of his teen years	
	[Once again, Paulsen was struggling to live a normal (teen) life].	
Language Use	Uses appropriate language, with some awareness of audience and purpose (books give us so	
	much within our lives). The response occasionally makes effective use of sentence structure	
	[There he had no (formal) public schooling; therefore, he was "painfully shy"].	
Conventions	Demonstrates partial control, exhibiting occasional errors in the use of commas (school he and	
	Even as an adult Gary) and punctuation with quotations (books". and time".) that do not	
	hinder comprehension.	
Conclusion: Ov	erall, the response best fits the criteria for Level 4 in all qualities.	

Escaping to other worlds, meeting new people, seeing new things, seeing things from another's point of view all seem like very hard things to do Maybe even impossible to some people. kt that isn't truly the case. As long as one knows how to read, books can help one do all those things and more Books help to educate and sometimes even provide an escape, saving Mpeople from the wrong Kind of life Gary Paulson's life was affected by boots. This can his account. He even went so far as to say that they saved his life. He wasn't popular as MAR a child, his parents were drunks and fought in front of him, and he was parked on by school bullies yet he turned out to be a good person with a job as a writer. All thanks to books. When that librarian harded him a book she gave himan escape from a painful existence ite got to see new worlds, karned to look forward, and came to realize that there was more to life than what he had experienced. Inshort, books had given him alife Books can even be seen as a very important part of society without them, where would be? Our doctors, screntists, teachers, etc. would have a hard time without books. That's because books educate, they reveal post mistaks, things that can be done in the present, and future possibilities. Possing down information to future generations is much easier when that information is written down. open doors for people that sometimes, expension doesn't even Know to look for them. They may just be made up of paper and ink, but they're still helpful and good to have around.

Starks are very powerful and are able to change someones life. In preparation for this spech I listened to an account by Gary Paylsen. I his authors life was transformed by book sitrom the time he read his first book to the fine he started withing his own books have he great impact on his life.

Books have the potential to excite and educate but in Gary Paulsen's case they also had the power to resource. When he was young books he peal him as on celult. Then Gary Paulson moved to fedywood to follow his dream he wanted to be sourconded by writers. He left his old job just to follow he dream to become an outlier. The power of books drawn Gary Paulsen from reading books to actually waking a living writing them Gary Paulsen describes his creat of writing as relaxing and simulating.

The pover of books grove on people to excite educate and even yescul. From ayoung age when one can't even read books they can excite your mind took man ayoung age to old books always have a powerful affect.

Quality	Commentary	
- •	The response:	
Meaning	Conveys a basic understanding of the text, stating that books are a wonderful tool that can	
	relaxe and simulate your mind. The response makes superficial connections between	
	information and ideas in the text and the assigned task (The reason why Books are so useful is	
	because they give you a chance to excape reality and become something your not).	
Development	Develops ideas briefly, using some details from the text. The response includes only brief	
	descriptions of Paulsen reading for hours going page after page as a boy, then trying to be a	
	writer and started as an apprentice as an adult.	
Organization	Establishes, but fails to maintain, an appropriate focus on the power of books to give you	
	Knowledge and Information. The response exhibits a rudimentary structure, but includes	
	irrelevancies (The author has a Job the author is No good).	
Language Use	Relies on basic vocabulary that is sometimes imprecise (No for 'know" and your for "you're"),	
	with little awareness of audience and purpose. The response exhibits some attempt to vary	
	sentence length for effect, but with uneven success (He took the risk of trying to be a writer	
	and that Boy is now Gary Paulsen).	
Conventions	Demonstrates emerging control, exhibiting occasional errors in spelling (grantie, dosn't,	
	Basment, fernness), punctuation (When a character get's hurt you feel it when there happy you	
	feel it and For example the Boy), and capitalization (New Information, Something New, this	
	Boy) that hinder comprehension.	
<i>Conclusion:</i> Overall, the response best fits the criteria for Level 3 in all qualities.		

The power of blooks it was sold has the power to save or change your life". Books can save you many different ways. If you have already writen books and you have a block in your thats, read after books antill it cames to you. It you haven't writen a books before and in the traph one back is all it takes to change on.

Grany Paulsen was affected by books, his first time in school he was scard to enter the class room. The teacher coald have made him go into the from but she didn't she brought him a book. It from Grany didn't know how long he was sitting with her but he does know know that after he was able to enter the class room.

Grany Paulsen atrabuts all the good thing that happend to him to books. He also atributs this wrighting wrighting cran to books. Gary said once "that "he was sitting at a satilite to trucking station when he realized that he wanted to wright.

He handed in the seconity page and teft to live in Holly wood, he

left every thing his wife and dater dater. Gary new writing was all

he wonted to dozund he followed that docum.

•	The response:		
Meaning	Conveys a basic understanding of the text, stating that books can save you many different ways. The response makes few connections between information and ideas in the text and the assigned task (Gary Paulsen was affected by books, his first time in school and Gary new writing was all he wanted to do).		
Development	Develops ideas briefly, using some details from the text (he was scard to enter the class room and He handed in the secerity bage and left to live in Hollywood).		
Organization	Suggests a focus on <i>the power of books</i> in Gary Paulsen's life but lacks organization. The response consists of two paragraphs of loosely related ideas with no conclusion.		
Language Use	Relies on basic vocabulary (<i>The teacher could have made him go into the room but she didn't</i>), with little awareness of audience or purpose. The response exhibits some attempt to vary sentence structure, but with uneven success (<i>If you have already writen books read other book ontill it comes to you</i>).		
Conventions	Demonstrates a lack of control, exhibiting frequent errors in spelling (thouts, atributs, happend, wrighting, dater) and punctuation (books, his first; didn't she; "he was; Hollywood, he) that hinder comprehension.		
Conclusion: O	verall, the response best fits the criteria for Level 3, although it is somewhat weaker		
in organization and conventions.			

The power of books, to some people, may or can be very enriching for example the people who find reading very riching usually have free time (a lót on their hands or they work u s in a school, in a library or their business offices have some in MONI MS read and 5 you and Drotab then folker sing boy books were MIM especially after his dog after talling through the , 1150 saved his duly life and Also when Gary was 7-10 years old he lived on the Philippine Islands

Anchor Level 2 – A

Quality	Commentary
-	The response:
Meaning	Conveys a confused and inaccurate understanding of the text (books were everything to him especially after his dog Cookie pulled him from the ice). The response alludes to the text but makes unwarranted connections to the assigned task (So as you can see, even famous authors start out as poor readers).
Development	Is largely undeveloped, hinting at ideas, but references to the text are irrelevant (<i>To the people who find reading very enriching usually have free time at home</i>) and unjustified (<i>Also, when Gary was 7–10 years old had a private Military tutor</i>).
Organization	Suggests a focus on reading. The response also suggests an organization with paragraphing, but the ideas within the paragraphs are loosely connected.
Language Use	Relies on basic vocabulary that is occasionally imprecise for the audience (a lot of it and have some). The response exhibits some attempt to vary sentence length for effect but with uneven success (If anyone has read any of Gary Paulsen's books and it took him and then follow an author).
Conventions	Demonstrates partial control, exhibiting frequent errors in comma use (example me; books, in; books you; reader and; boy books; him especially) that do not hinder comprehension.

Conclusion: Overall, the response best fits the criteria for Level 2, although it is somewhat stronger in language use and conventions.

Anchor Level 2 – B

Quality	Commentary		
	The response:		
Meaning	Conveys a confused and inaccurate understanding of the text (Gary Paulsen did not get no education until he was 10 and Gary Paulsen went to a college course to help him). The response alludes to the text but makes unwarranted connections to the assigned task (Gary Paulsen was a security grad and quit so he could write books because he just thought writting books was better).		
Development	Is incomplete and largely undeveloped, hinting at ideas, but references to the text are vague (When Gary Paulsen had people help him read and what was going on in the books) and unjustified (Gary Paulsen is a writer that did not think he could be one and The libarber give him books and he realized he wanted to be a book writter).		
Organization	Suggests a focus on the power books hold for Gary Paulsen. The response suggests an organization with paragraphing, but the ideas within paragraphs are not clearly connected.		
Language Use	Relies on basic vocabulary that is occasionally imprecise (<i>like a month</i> and <i>some guys side</i>), with little awareness of audience. The response reveals little awareness of how to use sentences to achieve an effect (<i>When he first started to read and he would hide and he would read but his first time and it would take him like a month to finish).</i>		
Conventions	Demonstrates emerging control, exhibiting occasional errors in spelling (grad, writting, libarber, fer) and comma use (read it, basement and, Therefore now) that hinder comprehension.		

Conclusion: Overall, the response best fits the criteria for Level 2, although it is somewhat stronger in language use and conventions.

Anchor Paper - Part A—Level 2 - C

BOOKS have Many powers like tescuing, education, or exitment. Books let offmany powers to many different people every book has a different power that it lets off in people. Book help people learn in every book not just one has about of boys be cause every book is different. Books have many powers to help people when they are in need in many many boys just like in the passage when the power of Books is used for resoning.

In this Passage Gary Rulsin uses the Power of Boxs For rescurse Recourse when he fell into the Tice cult water he had read a book about that before it horseered to thim. He Athally sound, himself with the Information that he get from that work and used it the save him self. He shared that work course it Actually worked and he did not die ain he did a good jubs. He moved to Hullyword to excell his Jull Child had and Start a withing carrer or should I say to faller his beams in becoming a hinter.

Books have many fourts all your need

to do is read it and pull get then pavers.

Anchor Level 2 – C

Quality	Commentary		
- •	The response:		
Meaning	Conveys a confused and inaccurate understanding of the text (Because when he fell into the Ice cold water he had read a book about that before it happened to him). The response alludes to the text but makes unwarranted connections to the assigned task (every Book has a different		
	power that it lets off in people).		
Development	Is largely undeveloped, hinting at ideas, but references to the text are vague and unjustified (He Actually saved himself with the Information that he got from that book and used it to save him self and He moved to Hollywood to escape his dull child hood).		
Organization	Suggests a focus on how books are used to rescue people and suggests some organization with separate paragraphs for the introduction, body, and conclusion. In paragraph 2, the response abruptly shifts from how Paulsen used a book to save himself to his move to Hollywood.		
Language Use	Uses language that is imprecise for the audience or purpose (let off many powers, not just one way alot of ways, get them Powers). The response reveals little awareness of how to use sentences to achieve an effect (He studied that book cause it Actually worked and he did not die and he did a good job).		
Conventions	Demonstrates emerging control, exhibiting occasional errors in spelling (exitment, Pulsin, carrer) and frequent errors in punctuation (many many ways, Passage Gary, carrer or, say to, youll) and capitalization (Book, Passage, Ice, Actually, Information) that hinder comprehension.		
Conclusion: O	verall, the response best fits the criteria for Level 2, although it is somewhat		
stronger in conv	ventions		

The power of Books is overwelming, they can take you into awhole difficult world and rescue you from yours.

When I was young I read all the time.

it would help me pass time, and rescue me thom my boring social life. Now that I am a little older I don't just to look them for the adventure. To pass time but I read them for the adventure. The fun and the worker of the socks make my feelings shine through they make me feel wonderful about my self.

The power of Books is stimulating. Wonderful and Stupendows. I recomend to everyone fick upabook and read it, you will be a mazed at the way it makes you feel.

Anchor Level 1 – A

Quality	Commentary
	The response:
Meaning	Provides no evidence of textual understanding beyond a reference to the prompt. The response
	consists of personal reactions.
Development	Is minimal, offering primarily a personal response to the text.
Organization	Establishes, but fails to maintain, a focus on the Power of Books. The response exhibits a
	rudimentary structure made up of an introduction, a body paragraph, and a conclusion.
Language Use	Uses appropriate language, with some awareness of audience and purpose (You will be amazed
	at the way it makes you feel). The response occasionally makes effective use of sentence
	structure (Now that I am a little older at the climax of the Book).
Conventions	Demonstrates partial control, exhibiting occasional errors in spelling (overwelming, diffrent,
	recomend), punctuation (young I; time, and; older I), and capitalization (time. it, Book; Pick)
	that do not hinder comprehension.
Conclusion: Although the response best fits the criteria for Levels 1, 3, and 4, it remains at Level	
1 because the response makes no reference to the text.

	The response:
Meaning	Provides minimal evidence of textual understanding beyond a reference to the power of books.
Development	Is minimal. The response mentions some ideas from the text (Books helps you figure out what you want to do and The books also show you what other peoples lives are like) but fails to develop any of them.
Organization	Is too brief to demonstrate organization.
Language Use	Is minimal.
Conventions	Is minimal, making assessment of conventions unreliable.
Conclusion: Ov	verall, the response best fits the criteria for Level 1 in all qualities.

Many people underestimate the power books hold when you hold them in your hands. Some view them as just pages with words. Others see those words Form into sentences, then paragraphs, then chaptering, chapters that will hold you until the very end. tallabourge For Cary Paulsen books were much more thant words on pages. bary grew up son under miserable circumstances. Because his father was in the military he amounted so had a military totor until he was 000 ten years old. At this age he began attending public schools and described nimself as "painfully shy! Itis teacher was the First person to introduce him to books. He said he had become "lost in the book so decply, everything else went away." When Gary was \$ thirteen his life wasn't any better. Ite would hussle drunks For some extra change and sell newspapers... all to buy new clothes just to Feel popular. A librarian introduced him, again, to the towonderful world of books. Books helped him escape From his harsh life of drunk, screaming porents and bullies. They made him "look forward" instead of backward. " Not only reading them, but the writing them as well. He guit his job as an engineer for a satellite tracking company, lefthis Family and money, and went to Holly wood. Cary became an apprentice ses to two male editors, Itere he learded the meaning of nardwork and the difficulty of

Part A — Practice Paper – A

writing. But he also felt the glory and pride that comes with that hard works.

Itopefully, to you, books are more than just words on pages. They should yeild within them, the power to move you, rescue you, or even change you. You should not only read them, but become lost another power in them. Speciforapodokooms Enjoy the book fair everyone.

It's pleasure to come the local library's book four and take you gue about the importants of book and how book some importants of book and how book one important in life it can get you place to place that you never been before. To I advised guy's to read book and thou some in some you can get a better education and fellow you're clream to become nothing you want in life like Doctor, Fire fighter, police and other things in life that you can pursue you're clream and gools in life.

Britis have saved my life through out my childhood. It was hard for one grawing up in life not know how to read and write because I come from a long way in life I was born as phillianiess I come to america subject the age of 10 years old my father and Mother both worked my dad jub was big it stuff about military.

Like I said books are the main reason in why stand in front of gou goy's at lock lab rary's book fair there been asked to give a speech about the power of books. It is honor ladies and sentleman and kills of all age to all speak art on the power of books. Book are very important in life because it teaches you moral and important are life in how to live you life in a well washand mature Adult that we more you guy's could live We go to school or liborities make guy's worth to rearn new things about life so as well as keep preading and writing we rearnathings new more than an infe so as well as keep preading and writing we rearnathings new more than a carry on in life because of you keep reading and writing has to carry on in life because of you keep reading and writing has it way to complete your life, when writing and reading we growed to kids is bor feature. So is a parent it our job to teaches

the kids our important and valves about locals at and what the kids our important and valves about locals at an interest on the so it important enough to read tooks to kids so that can okt a better view in want next for did as he grows up in life. Read or Writing Eachs once again change my life from body become. Policity for a while into eletrons engeneer so as you can see read andwrite could get you please in life. He to grow up in life you could be nothing, you want

Every body has something that motivates from to work hard and keep moving forward in life. For some it might be a habby or a sport, for others it could be something else. Books can be very powerful in this way. Although their mossage varies, all books, even picture books, have the power to charge the path of your life, whather it is simply providing an escape from your hectic life or teaching you a lifelong lesson, books can change your life If you simply take the time to read them, in his speech author Gary Paulson discusses them his life and accounts for how reading changed it. Gary Paulson grow up in the Phillippine Islands whole to had from the age of 7 until to was 10. Home He did not attend public school, and instead he was taught by a tutor. When he was 10 years old he moved to the United States with his family. His mother enrolled him in public school, where he got his first exposure to reading as a means of escaping from your world. Growing up he lived in a crummy apartment" where he was constantly faced with his drunk parents fighting and at school he faced bullies. Reading allowed him to live in a fantasy world. Paulson's first exposure to the power of books come on his first day at his new school. His mother dropped off her shy and terrified son at school. He hid in the closet, where he was joined by his teacher with a book. Instead of forcing him to come out,

she read to him. Everything else fell away and he was able to join his poors in the classroom. This was the first realization that books could provide an escape from the world. His next realization came when he was 13 and selling hewspapers. To escape the cold he goes into the library whose the librarian gives him a library card and a book. He takes the book home and although he is a poor reader, he hides in his basement every night reading. He says,
the collaborations *showed me places where it didn't hurt all the time. "Again, Paulson is able to escape to a foundasy word, but this motivates him to keep on reading. Not only did reading provide a haven for Paulson, so did writing. When he got older he gave up his life to become a writer. His writing become everything to him. and the became a proof reader for a magazine and was exposed to people who forced him to write every hight for critique the next day. Again, books provided Paulson with an escape, but this time he was writing them. Books have the power to after your thinking. One minute you could be extremely angry and once you start reading you could find a sense of peace. Books allow people to escape from teality and slip into a fantasy world where they will find sciently. Books have the power to change your innormest emotions.

Part A — Practice Paper – D
Books have a lot of power. They can
Change peoples lines like Gary Paulson. He had
a very poor Child hood. His dad was in the
Grmy.
During his Childhood his mom and
dad were both acholics and mean to him.
Hus first day of school he was a fraid of
the other Children. So he went and hid in the
closer. The reacher found him in the closet.
So she went and sat next to him and read
him abook. Then she asked him to come out
and take his seat so he did.
When Gary was thirteen he sold
news papers for some extra money. So he would
wait outside of the bors so he could
hustle the drunk men for some extra
money. He could buy new clothes so
his class mates would think that he was
wolet.
After he graduated he started to work
for a guy's magazine as a proofreader.
for a guy's magazine as a proofreader. While he was working their two people. Said they would help him write better. So
said they would help him write better. 20
every night he would have to write
a paragraph or a short storie. If he

Part A — Practice Paper – D

After that he started to write his own books.

The meaning of this story is that
books can change peoples lifes. Just by the
teacher reading that book it changed his life.

A book can make you get throw hard times.

bary Paulsen is not only a great author, but a pieson who has gone through many obstacles in his life. He came out of his bad expenences appreciating books for things thut most do not notice. For that reason, Gary Paulson demonstrates the power that book our have. Paulson explains in his speich that "books are the reason he surrived his childhood". He had to deal with daily bullies and dramatic exents at home by his arguing parents; his one escape was reading books. He tried to escope the ents of school children by getting a job as a newspaper boy and tearning some money to purchase dother that - he thought would improve his conditions of being humiliated at school. His first teacher and librarian helped him to acknowledge how books can help. He was very afraid when he first attended school, but soon found out that there were people to show others the light. His first teacher got him a picture book to put him at ease, and it did. His librarian introduced him to reading more, and really changed his life by doing this. Gary Paulson went on to accomplish great things in life. He was an engineer, but later realized that was not what he really

Part A — Practice Paper – E

wanted to do. He decided that he wanted to unte his own works of Interature and got an apprenticeship that was not top of the trade, but did the job.

Although bary Paulsen experienced several instance of demeaning airs, he harmed that life can be totally flipped over with a little trading. He said that books changed his life, that they were the trason he sumed his childhood. From Paulsen we are able to karn the power that books

SESSION ONE – PART B – SCORING RUBRIC READING AND WRITING FOR INFORMATION AND UNDERSTANDING

QUALITY	6 Responses at this level:	5 Responses at this level:	4 Responses at this level:	3 Responses at this level:	2 Responses at this level:	1 Responses at this level:
Meaning: the extent to which the response exhibits sound understanding, interpretation, and analysis of the task and text(s)	reveal an in-depth analysis of the documents rounections between information and ideas in the documents and the assigned task	-convey a thorough understanding of the documents -make clear and explicit connections between information and ideas in the documents and the assigned task	- convey a basic understanding of the documents -make implicit connections between information and ideas in the documents and the assigned task	-convey a basic understanding of the documents -make few or superficial connections between information and ideas in the documents and the assigned task	-convey a confused or inaccurate understanding of the documents -allude to the documents but make unclear or unwarranted connections to the assigned task	-provide minimal or no evidence of understanding understanding between information in the documents and the assigned task
Development: the extent to which ideas are elaborated using specific and relevant evidence from the document(s)	develop ideas clearly and fully, making effective use of a wide range of relevant and specific details from the documents	develop ideas clearly and consistently, using relevant and specific details from the documents	develop some ideas more fully than others, using specific and relevant details from the documents	-develop ideas briefly, using some details from the documents	-are incomplete or largely undeveloped, hinting at ideas, but references to the documents are vague, irrelevant, repetitive, or unjustified	-are minimal, with no evidence of development
Organization: the extent to which the response exhibits direction, shape, and coherence	-maintain a clear and appropriate focus exhibit a logical and coherent structure through skillful use of appropriate devices and transitions	-maintain a clear and appropriate focus exhibit a logical sequence of ideas through use of appropriate devices and transitions	-maintain a clear and appropriate focus exhibit a logical sequence of ideas but may lack internal consistency	-establish, but fail to maintain, an appropriate focus - exhibit a rudimentary structure but may include some inconsistencies or irrelevancies	-lack an appropriate focus but suggest some organization, or suggest a focus but lack organization	-show no focus or organization
Language Use: the extent to which the response reveals an awareness of audience and purpose through effective use of words, sentence structure, and sentence variety	-are stylistically sophisticated, using language that is precise and engaging, with a notable sense of voice and awareness of audience and purpose-vary structure and length of sentences to enhance meaning	-use language that is fluent and original, with evident awareness of audience and purpose vary structure and length of sentences to control rhythm and pacing	use appropriate language, with some awareness of audience and purpose occasionally make effective use of sentence structure or length	-rely on basic vocabulary, with little awareness of audience or purpose e-exhibit some attempt to vary sentence structure or length for effect, but with uneven success	-use language that is imprecise or unsuitable for the audience or purpose reval little awareness of how to use sentences to achieve an effect	-are minimal -use language that is predominantly incoherent, inappropriate, or copied directly from the text
Conventions: the extent to which the response exhibits conventional spelling, punctuation, paragraphing, capitalization, grammar, and usage	demonstrate control of the conventions with essentially no errors, even with sophisticated language	-demonstrate control of the conventions, exhibiting occasional errors only when using sophisticated language	-demonstrate partial control, exhibiting occasional errors that do not hinder comprehension	-demonstrate emerging control, exhibiting occasional errors that hinder comprehension	-demonstrate a lack of control, exhibiting frequent errors that make comprehension difficult	-are minimal, making assessment of conventions unreliable -may be illegible or not recognizable as English

<sup>If the student addresses only one text, the response can be scored no higher than a 3.
If the student writes only a personal response and makes no reference to the text(s), the response can be scored no higher than a 1.
Responses totally unrelated to the topic, illegible, incoherent, or blank should be given a 0.
A response totally copied from the text(s) with no original student writing should be scored a 0.</sup>

Volcanoes, large mountainous structures which seriodically extrude lava, continue to be the focus of many scientists and goodogists. They have concluded that Here are many volcances threateding the inhabitants of large metropolises, yet faw of these in Labetants are educated about the threat of these deadly mountains. On order to save the lines of those year Alcanoes sophisticate scientists have developed visual quides as all wands scientific equipment to detect enoptions and inform Hose in danger of the impending catastrophe. One such person who is informing the public is S. Blakeslee, from whose study this essay is based. Few realize the jopandy the world's 1,500, active volcaves can put them in. Of the 1,500, some 50 to 60 volcanoes are in some state of eruption. These eruptions can theaten those living and Mexico. Those in Columbia are especially aware of the threat volcanoes possess; in 1985, 26,000 people ded from an existion the people had Thought was harmless. Fine hundred million people line near on active volcano, yet it is unknown whether they know what to do in case of on orustion He United Nations has declared the 1990's the Leonational Docade of Natural Harard Reduction."

Volcanology and Chemistry of the Carth's Interior have begin their own program to educate those in the "danger none" using audio and visual quides; one such quide aired in the Philippings and is believed to have saved 50,000 lines. Scientists begun to study 15 bleaves around the world which by understanding (Them better, will give volcanolgists the knowledge they need to estrate exuptions and promptly inform the public. Scientists and geologists have developed new techniques to study and inform people of enistions. While the forecasting of volcanic emptions used to be minimal, new technological discoveries have now made its more reliable. The seismoneter can be used to detect faint vibrations in the ground, indicating an eruption may be imminent. Wit meters are souths placed closer to the lava dome of the Volcano; Mey measure the level of magna, which indicates whether or not the magna is swelling. Revealing changes in the sing of cracks on the volleding ground crack meters are essential in forecasting druptions. High levels of carbon diopide con lead scientists to believe an eruption will occur. Satellites have also become key in predicting oruptions, as they are able to monitor ground displacement and thus perspoint future activity. In Stanley N. Williams has developed the a graphied which displays the several ways scientists have used technology.

Anchor Paper – Part B—Level 6 – A

forecast futine volcanic eruptions.

Science continues to be on the forefront of predicting volcanic energtions. Such predictions have proben to save Housands of lines. Because their have been over 1.5 million emptions in the last 400 years, now is a crucial time in educating the public on the dangers of volcanoes. An example of technology and education coming together is shown as only five georgle died in an eruption in Parma New Guinea, an eruption that destroyed 75 percent of homes. This combination is key in saving countless lives in the wake of an Jeruption.

Anchor Level 6 – A

Quality	Commentary
	The response:
Meaning	Reveals an in-depth analysis of the documents, stating that to save the lives of those near volcanoes, scientists have developed visual guides and sophisticated scientific equipment to detect eruptions and inform those in danger of the impending catastrophe. The response makes insightful connections between information and ideas in the documents and the assigned task (Few realize the jeopardy the world's 1,500 active volcanoes can put them in and Revealing changes in the size of cracks on the volcano, ground crack meters are essential in forecasting eruptions).
Development	Develops ideas clearly and fully, making effective use of a wide range of relevant and specific details from the documents to discuss the danger of volcanic eruptions and the efforts to lessen them (Of the 1,500, some 50 to 60 volcanoes are in some state of eruption; Because of eruptions such as the one in Columbia; The seisometer can be used to detect faint vibrations; Tilt meters measure the level of magma; An example of technology and education coming together is shown).
Organization	Maintains a clear and appropriate focus on the life-saving work of volcanologists. The response exhibits a logical and coherent structure, moving from the general threat of volcanic danger (it is unknown what to do in case of an eruption) to the ways this threat is being met (new techniques to study and inform people of eruptions), concluding with a positive prognosis for the future. Skillful use of appropriate devices and transitions is evident (by understanding them better, While the forecasting used to be have now, Science continues to be on the forefront).
Language Use	Is stylistically sophisticated, using language that is precise and engaging (large mountainous structures which periodically extrude lava, estimate and promptly inform, in the wake of an eruption), with a notable sense of voice and awareness of audience and purpose (This combination is key in saving countless lives). The response varies structure and length of sentences to enhance meaning (Those in Columbia the people had thought was harmless).
Conventions	Demonstrates control of the conventions with essentially no errors.
Conclusion: Ov	erall, the response best fits the criteria for Level 6 in all qualities.

Volcanoes are a formidible and unpredictable natural danger. The lack of public knowledge and the belief in volcano myths over facts are major reasons a volcano is so Mereatening. a volcano's unpredictability is another weapon in its around of destruction and simultaneously creates spepticism about volcano warming systems. However, volcanologists are beginning to gain ground in the field of volcano safety thanks to educational programs and advances in technology. Recent success stories, such as Mr. Dinatulo, in the Philippines and Habaul in Papua, New Duinea have increased the volcano warning system's oredibility. Dramatic educational films have been made by scientists from the International Association of Volcanology and Chemistry of the Earth's Interior. The video is geared toward educating officals in charge of evacuation and natural disaster precautions. The It is loped that the "lovifying accuracy" with which the video depicts the destruction a volcano "Causes will validate the response and make the public respect and few? the power of a volcanic exception. Another goal of the video es to dispell volcano myths; for example, that you can outrun a lava flow and then be

safe from danger this is not true; the majore cause of death from volcanic eruption is "glowing clouds of super-hot gas and bill thousands in a matter of minutes their research understand and predict activities. Serors called seismometers bried in the ground on a volcano's slope. They detect movement which could be deep magma movement feading up to an although in its infancy; satellite se seens to be the future of volcanic prediction It can monitor ground is gaining fait hilippines Int Vinatubo, 50,000 people

Anchor Paper - Part B-Level 6 - B

Volcanologists are working Rard to better understand volcancoes and for the public to better understand them as well. New educational programs, educating municipal leaders and new more accurate technologies are being used to protect the public.

Anchor Level 6 – B

Quality	Commentary
	The response:
Meaning	Reveals an in-depth analysis of the documents by noting the progress of the scientific community (volcanologists are beginning to gain ground in the field of volcano safety and Although in its "infancy," satellite surveillance seems to be the future of volcanic prediction). The response makes insightful connections between information and ideas in the documents and the assigned task, successfully distilling information (Volcanoes are a formidible and unpredictable natural danger and However promising, the technology is restricted by its high cost).
Development	Develops ideas clearly and fully, making effective use of a wide range of relevant and specific details from the documents to emphasize volcanologists' contributions (Recent success stories have increased the volcano warning system's credibility, Another goal of the video is to dispell volcano myths, Scientists have also increased the intensity of their research).
Organization	Maintains a clear and appropriate focus on the efforts of volcanologists to lessen the danger of volcanoes. The response exhibits a logical and coherent structure, discussing the inherent dangers of volcanoes and the efforts being made to lessen those dangers (new technology to better predict a volcano's activities). Skillful devices and transitions are used (A volcano's unpredictability is another; This is not true; Recent dodges of disaster).
Language Use	Is stylistically sophisticated, using language that is precise and engaging (another weapon in its arsenal and the video will validate the evacuation response), with a notable sense of voice and awareness of audience and purpose (The public is gaining faith in volcanic prediction). The response varies length of sentences to enhance meaning (Sensors, called seismometers are buried in the ground on a volcano's slope).
Conventions	Demonstrates control of the conventions, exhibiting occasional errors in spelling (formidible and dispell) and punctuation (myths; for example and movement which) only when using sophisticated language.
Conclusion: Over in conventions.	erall, the response best fits the criteria for Level 6, although it is somewhat weaker

Volcanologists are very warried about the drastic effects that erupted Volcanoes have on people's lives. There are \$583 volcanoes that have exploded within the last 400 years out of a total of 1,500 volcanoes World wide. Each eruption leaves harrible destruction and death in its path. One Volcano in Colombia killed over 26,000 people in one night from an eruption. While Valcano eruptions can't be stopped, the deaths of so many people from them can be prevented. Recently, volconologists have been working hard to save lives through education. Valcanologists believe that they can save thousands of lives by educating people on how to look for clues of an eminant eruption and what to do if one accurrs. If they succeed, they will save thousands of lives and greatly lessen the dangers of valcanic eruptions. One form of education that they are using is through an informational video. With hopes that people with tistenta Since people don't listen to Warnings about valcances, believing them to be paintless and innacurate, Scientists hope that a gruesomely graphic video shown to city and evacuation officials in possible valcano effected areas will be able to change that Another method they have instituted is to hold workshops at 15 valcances near large population areas that have been studied extensively. The third way is to educate people on how they can help to predict an eruption, since Valcanologists can't keep an eye on every single valcana in the world. People are taught to soan the Sky for clues, looking for hints of carbon dioxide or ear unusual changes in their natural surroundings. Scientists feel that education and communication are essential in reducing risk from Volcanic hazards. This method appears to be warking very Well, for though there was great property destruction, 50,000

people's lives were saved in the Philippines by Mount Pinatubo after they voluntarily evacuated having watched the educational video Another volcano in at Rabaul in Papua New Guinea had even destrayed 75 percent of homes in the city, but only killed 5 people because the city had been educated in evacuation procedures.

An important part of Saving people's lives once they know what to do in an evacuation Situation is to tell them when they have to evacuated. In order to better predict volcanic eruptions, scientists have developed many new technological tools. They watch for movements and ground displacements via satelite and the Glabal Positioning System. Measuring tools such as the seismometer, which picks up the vibrations of deep movements of magma, or the tilt meter, which determines if accumulating magma is beginning to swell in a volcano's upper reaches, are all used to help predict volcanic eruptions. Even measuring the air for high levels of carbon dioxide, an indicating hint of valcanic plume, can be used to help predict them. These forecasts of eruptions are essential to lessening the damage that they cause because the Sconer people know of the danger they may be in the Caster they can escape and somether lives. Valcandogists understand the importance of better predicting volcanic eruptions and informing the people of what they can do to protect and some themse. It is for this reason that they have put so much effort into their predicting tools and aunation of the people who are at Yisk of being hurt by a

Anchor Paper - Part B-Level 5 - A

Voltanic eruption These actions will greatly lessen the dangers of voltanic eruptions.

Anchor Level 5 – A

Quality	Commentary
	The response:
Meaning	Conveys a thorough understanding of the documents, stating that volcanologists have put so much effort into their predicting tools and education of the people at risk of a volcanic eruption. The response makes clear and explicit connections between information and ideas in the documents and the assigned task (Recently, volcanologists have been working hard to save lives through education).
Development	Develops ideas clearly and consistently, using relevant and specific details from the documents to discuss how volcanologists are educating people who are near active volcanoes (Since people don't listen to warnings scientists hope that a gruesomely graphic video will be able to change that) and predicting volcanic eruptions (scientists have developed many new technological tools).
Organization	Maintains a clear and appropriate focus on what volcanologists are doing to lessen the dangers of volcanic eruptions. The response exhibits a logical sequence of ideas, first explaining the potential result of reducing the danger of volcanoes, then presenting the way in which volcanologists can address the problem (informational video and workshops). The conclusion reiterates the need to predict volcanic eruptions and inform the people to protect and save themselves. Appropriate transitions are used (One form of education, Another method, Another volcano).
Language Use	Uses language that is fluent and original (Each eruption leaves horrible destruction and death in its path), with evident awareness of audience and purpose (Volcanologists are very worried about the drastic effects that erupted volcanoes have on people's lives). The response varies structure and length of sentences to control rhythm and pacing (If they succeed, they will save thousands of lives and greatly lessen the dangers of volcanic eruptions).
Conventions	Demonstrates control or the conventions, exhibiting occasional errors in spelling (eminant, ocurrs, satelite) and punctuation (lives once and situation is).
Conclusion: Ox	verall, the response best fits the criteria for Level 5 in all qualities.

The men and woman that study volcanses, othernise known as volcanologists, are coming up with new work to lesson the dangers of volcanic eruptions. With increasing technology, volcandiogists have many new help educate the public to lives. here are about 1,500 active volcances planet out of these, 583 r recently erupted, thus gerous than the rest. Since t volcances has increased in th decades, volcanologists were forced to do something to prevent/lessen all the danges that were stated in passage 1. saster officials "are" the 1985 Colombia eruption. Volcanologists readed new nous to predic eruptions earlier and make first attempt at lessening the voers of volcanic eruptions came in n. This video was shown

46 public officials that were in charge

Anchor Level 5 – B

Quality	Commentary
_	The response:
Meaning	Conveys a thorough understanding of the documents, stating that with increasing technology, volcanologists have many new resources to help save lives. The response makes clear and explicit connections between information and ideas in the documents and the assigned task (The men and women that study volcanoes are coming up with new ways to lessen the dangers of volcanic eruptions).
Development	Develops ideas clearly and consistently, using relevant and specific details from the documents to discuss the efforts of volcanologists (<i>The first attempt came in video form, They intensely studied the "top 15" most active "decade" volcanoes, make better predictions</i>).
Organization	Maintains a clear and appropriate focus on what volcanologists are doing to lessen the danger of volcanic eruptions. The response exhibits a logical sequence of ideas by first establishing the problem (583 have recently erupted, thus they are more dangerous than the rest), then describing the ways in which volcanologists can educate the public (make people listen and workshops to educate disaster relief officials), followed by an explanation of new technalogical ways to forecast volcanoes. The response uses appropriate transitions (Since, The second attempt, So far).
Language Use	Uses language that is fluent, with evident awareness of audience and purpose (Even though some may have failed, they are working together with public officials to reach their main goal of keeping our people and environment protected). The response varies structure and length of sentences to control rhythm and pacing (This was the case in the 1985 Columbia eruption).
Conventions	Demonstrates partial control, exhibiting occasional errors in spelling (Sattelites and volcanoe) and punctuation (erupted, thus; invented we; system), this) that do not hinder comprehension.
Conclusion: Ove	erall, the response best fits the criteria for Level 5, although it is somewhat weaker
in conventions.	

There are 1500 active volumes
colcanoes in the world today, and
each objects a natural disaster
waiting to happen. Active volcanoes
have become an increasing danger
due to the increasing number of
people who live close to them.
Volcanologists have been working on
lessening the dangers of eurupting
volcanoes by educating people
about the true dangers & threats
eruptions propose.
·
The first step these
scientists are taking is trying
to be able to predict when a
volcano will erupt. As shown in
the graphic, there are several
things being done to achieve
this seismeters have been developed,
a tool which is buried in the
side of a volcang & is used
to sense slight vibrations which
may indicate the movement of
magna inside the volcano. Another
instrument which is explained in
the diagram is a tilt meter. Tilt
meters can detect if magna

Anchor Paper – Part B—Level 5 – C
accumulation is making the upper
part of a vokano swell, suggesting
a possible eruption.
a positive crapitorio
Developing new tools to
detect volcanic activity isn't
the only thing volconologists
have been working on. They are
also attempting to get people
to comprehend the reality of
an exuption. One idea they came
up with and acted upon was
making a video that depicts
the reality of what a volcanic
exuption thas the potential to do.
This video was made with such
accurate detail that "it is not
recommended for children under
15." Volcanologists show this video
to people who are in public
authority & evacuation teams in hopes
that they will get people to
evacuate when a volcano may
explode. Another thing they are
doing to lessen the danger of
erupting volcanoes is closely
studying threatening volcanos located
near large populations.

Quality	Commentary
	The response:
Meaning	Conveys a thorough understanding of the documents, asserting that volcanologists have been working on lessening the dangers of volcanoes by educating people. The response makes clear and explicit connections between information in the documents and the assigned task (raising awareness of the danger of volcanic eruptions using new tools to monitor volcanos, scientists have saved many lives).
Development	Develops some ideas more fully than others. The response uses specific and relevant details from the documents to discuss volcanologists' attempts to predict when a volcano will erupt and to get people to comprehend the reality of an eruption. The idea that volcanologists are studying threatening volcanos is less developed.
Organization	Maintains a clear and appropriate focus on what volcanologists are doing to lessen the dangers of volcanic eruptions. The response exhibits a logical sequence of ideas, moving from scientific devices that monitor volcanoes (Seismeters and a tilt meter), to educating people on the reality of what a volcanic eruption has the potential to do. The response uses appropriate devices and transitions (The first step, Another instrument, They are also).
Language Use	Uses appropriate language, with some awareness of audience and purpose (Developing new tools isn't the only thing volcanologists have been working on and One idea they came up with was making a video), although use of the ampersand appears throughout. The response occasionally makes effective use of sentence structure and length (Tilt meters can detect if magma accumulation is making the upper part of a volcano swell, suggesting a possible eruption).
Conventions	Demonstrates control of the conventions, exhibiting occasional errors in punctuation (<i>eruption</i> . <i>Such as</i> and <i>procedures</i> , <i>and</i>) and the use of vague pronoun references.
Conclusion: Ove	erall, the response best fits the criteria for Level 5, although it is somewhat weaker
in development a	1

A Volcanon probably the dead liest natural
disaster. It could bill millions without warning. People
that live an and around volcenous are advised to
evacuate, but most people ignore the warning. Nobody
Cannot stop volcanoes from expting. Thoritrolly however,
Volcanologist & have gotten together to create three ways
to reduce the dangers of volcanic eruptions.
The first idea of the volcanologist is to areate
a video. Real Simple, right? However, this video shows
how volcanoes destroy property and what it does to
people. In the text it says that children under is cannot
Watch it because it contains Such horrifying accuracy
It should benefit though. In the text it says that
approximately 500 million people live on thre sides
of volcanos. Many of them are in major cities
Title to Tokyo, Manila, Janarta, Blow Mexico City, Quito etc.
Really any city with at least a million people. If this
video is shown to in these cities, one those 500 million
lives doubt be out of rish. "It is being shown to
mayors and other public officials in Charge of gotting people
to evacuate when volcanoes threaten to explade."
santists
The Second idea the come up with is to pick
15 vol conces around the world. With the selected they
are going to Study intensely. These volcenors have
been named decade volcanoes. He way though that these
were picked repose is that these are the ones

Anchor Paper – Part B—Level 4 – A near heavy populated areas and are extremely likely to exupt. From what it seems they the Scientists are getting ready to for the emption. "Workshops have been held at most of them, bringing together Scientists and & discover relief officials from the local regions. The boot taken their scentists have come up with is to make an effect to predict more according of when emphons will hoppen. They have created new Scientific equipment. According the to the graph, the equipment they are going to be using a are ground cheek meters, filt meters and seismonuters. The groph says that Crock measurements are sensors and surveying can reveal Changes in the size of cracks and gullies on a volcarous flenks." Tilt meters are placed on the slopes of volcanoes, Thes indicates 10 magma 18 beginning to Swell the volceno's upper reacher he last pear of equipment as are the sus momenters. They are sensors Direct in the groupd and pick up vibretions at magne movement. The graphic "to recosting a videonic francy" says that surveillence Scatellites are also being set up to predict emptions In conclusion, many initiatives are being taken to reduce the dangers or volcenic eruptions videos are being made to inform the herards of whence exuptions volcanoes are very studied. Finelly equipment is very set up to beller the effect in predicting the cruptours.

Quality	Commentary
	The response:
Meaning	Conveys a thorough understanding of the documents, stating that <i>volcanologist have gotten together to create three ways to reduce the dangers of volcanic eruptions</i> . The response makes clear and explicit connections between information and ideas in the documents and the assigned task (<i>If this video is shown lives could be out of risk, these are the ones likely to erupt, new scientific equipment</i>).
Development	Develops some ideas more fully than others. The response uses specific and relevant details from the documents to describe the difficulty of convincing the <i>approximately 500 million people</i> who <i>live on the sides of volcanoes</i> to evacuate and the purpose of studying the <i>decade volcanoes</i> (the scientists are getting ready for the eruption). The paragraph discussing prediction equipment is basically a listing of the tools.
Organization	Maintains a clear and appropriate focus on the <i>many initiatives</i> being taken to reduce the dangers of volcanic eruption. The response exhibits a logical sequence of ideas through the use of appropriate transitions between paragraphs (<i>The first idea, The second, The last, In conclusion</i>).
Language Use	Uses appropriate language, with some awareness of audience and purpose (<i>People that live on and around volcanoes are advised to evacuate, but most people ignore the warning</i>). The response occasionally makes effective use of sentence structure (<i>It could kill millions without warning</i>).
Conventions	Demonstrates partial control, exhibiting occasional errors in spelling (heavey), grammar (nobody cannot, With the selected, of when eruptions), agreement (volcanoes it, equipment are, piece are), and shifts in verb tense that do not hinder comprehension.
Conclusion: Overall, the response best fits the criteria for Level 4, although it is somewhat	
stronger in meaning and organization.	

Volcanic eruptions in the past decade and

Still today have been serious threats to various

Communities even whole countries. It is extremely

Fortunate that scientists have taken the responsibility

upon themselves to help the situation. Scientists

see that volcanues can be cantamberous to human life down to the number of the number of Intractable issues they bring up. The damage that has been done by Volcanoes to both humans and property is evident that is why volcanologists are Maling such a valiant effort in spreading safety workings for volcanic eruptions. The efforts of the Mard-working volcandoquets may be taken for granted by some but as more volcanoes begin to erupt, the number of people evocuating and being Soved is steadily increasing. Mediective the hondreds of volcances toung under creans, there are 15,000 active volcanoes IN the World that are unpredictable (IN the sense of erupting).
Of the years go on scientists see that volcances are as they were a decase ago. All Since the manner population has increased, it is abusous that people will have to begin to live in any areas they can TIND. These areas include land that is PTONE to volcanic CTUPTION." The NUMBET of paple living ON the Sides of Volcanoes as in the vollege below has suy racheted. It has been said that many people who reside in eruption prone areas do not know any better. The best example that can be given is when scientists issued a warning

W 1985 about an eruption in Colombia. On November 13", The Ice cup on the volcance exploded above The town of Novado del Ruz. Instead of abiding to the warning that said go loo yords, 26,000 people ded. Seeing the volcanoes we bewin a serous threat Scientists asked the United Nations tor Funding for a volcance awareness payram - New just did not have the woney for it win hands. By coming is with thee ideas Aly Hen saved muscare williams of lives First they washe a video exposing all the damage done by Volonnoes and sent it to various public afficials. Second Scientists priced 15 volcanores that were extrevely threatening and wiretigated them intersely. Lastly they make an effort to make better prestictions of other Volcanoes will erept with rew and work advanced equipment. These 3 steps have he ped save thusands. In 1994, a udicaro at Rabaul nastroyed 75 percent of hopes, but only willed 5 people.

Occording to the graphite, a lot of Money of Moved and the has been put in by volcanologists to place equipment on volcanives. The equipment enchose summeters til neters and ground crack neters all of these tools are extrevely costly, but beneficial to volcante emption and and energy It is clear the scientists see the need for something to be done about whenever entotions. have done just so, with a lot of hard'-

Quality	Commentary
•	The response:
Meaning	Conveys a basic understanding of the documents, stating that (The efforts of hard-working
	volcanologists may be taken for granted but the number of people evacuating is
	steadily increasing). The response makes implicit connections between information and ideas in
	the documents and the assigned task (It is extremely fortunate that scientists have taken the
	responsibility upon themselves to help the situation).
Development	Develops some ideas more fully than others. The response uses specific and relevant details
	from the documents to discuss the reasons for volcanologists' efforts (scientists see that
	volcanoes are as much a threat today, as they were a decade ago) and actions (By coming up
	with three ideas, they saved millions of lives). The paragraph discussing equipment
	volcanologists use to forecast eruptions is only briefly developed.
Organization	Maintains a clear and appropriate focus on the dangers of volcanoes and the need to reduce
	them. The response exhibits a logical sequence of ideas, first establishing a justification for
	lessening the dangers of volcanic eruptions (Volcanic eruptions have been serious threats), followed by a description of the efforts (These 3 steps have helped save thousands), and
	concluding with a summary, but is weakened by vague transitions (Neglecting the hundreds of
	volcanoes, Instead of abiding to the warning, They have done just so).
Language Use	Uses appropriate language (they made a video exposing all the damage and sent it to various
Language esc	public officials) that is at times inaccurate (can be cantankerous to human life and has been put
	in), with some awareness of audience and purpose (It is clear the scientists see the need for
	something to be done). The response occasionally makes effective use of sentence structure and
	length (All of these tools costly, but beneficial to volcanic eruption awareness).
Conventions	Demonstrates partial control, exhibiting occasional errors in spelling (volcanoe) and
	punctuation (evident that is why; destroyed 75 percent of homes, but only killed 5 people; back,
	they are) that do not hinder comprehension.
Conclusion: Ove	erall, the response best fits the criteria for Level 4 in all qualities.

"With the world population growing, people are moving into marginal lands,,, that are more prone to disasters - volcanoes, floods, earthquakes and hurricanes. A volcanie eruption should not automatically spell "death" for those that live within the vicinity. Volcanologists are working to lessen the dangers of volcanic eruptions by informing people of the dangers and making better productions. From the text, there have been a number of examples of bad communication and the high price of lives paid because of it. People are often victimized by volcanoes because they ignore warnings. In the case of the people who ined in the town of Novado del Ruiz, the ignored warnings because they Pelt that the volcano was far away. This mused 26,000 people to perish all because they did not head the warning, and could have easily walked 100 yards to a hill to be safe. Also stated in the text, people have a misconception about the dangers of a volcance enuptrons; they think that they can outrun a Plow or just walk away from danger but unfortunately that is false: The flows actually evaporate the flesh and fry the lungs of everyone in their path. Thankhilly, volcanologists are not standing lidly by and allowing for such things to occur. They got together and came up with three effective ideas which they have set into motion. They made an actual bluntly true-to-life video that depicts a what a volcanic eruption in charge of execuation procedures so that people will know what indicances really do rather than just what they see in the movies. Then they picked volcanoes around the world to be studied intensely in order to make better predictions. In the graphic there are a number of ways that a volcano can be monitored such as through the use of seigmometers which monitor the motion of magina, and crack measurement which allows for the size of cracks and gullies on a volcano's Flanks to be studied for changes. Surveillance by satellite is also promising, and there are many other ways of monitoring

Anchor Paper - Part B-Level 4 - C

signs they see as well being that monitoring is expensive and not all volcances are monitored. The volcanic eruptrons of Mt. Pinatuloo and Rabaul proved the successes of communication and science working hand in hand.

Anchor Level 4 – C

weaker in development.

Quality	Commentary
_	The response:
Meaning	Conveys a basic understanding of the documents by explaining how volcanologists are informing people of the dangers and making better predictions. The response makes implicit connections between information and ideas in the documents and the assigned task (<i>They got together and came up with three effective ideas which they have set into motion</i>).
Development	Develops ideas briefly, using some details from the documents to discuss the things that volcanologists are doing to fight the dangers of volcanic eruptions (made an actual video, picked volcanoes around the world to be studied intensely, use seismometers and crack measurement, Surveillance by satellite).
Organization	Maintains a clear and appropriate focus on what volcanologists are doing to <i>lessen the dangers</i> of volcanic eruptions. The response exhibits a logical sequence of ideas, first establishing the results of volcanic eruptions when warnings are ignored (the high price of lives paid) followed by three effective ideas scientists are using to save lives from volcanic eruptions.
Language Use	Relies on appropriate vocabulary that is sometimes copied from the text, with some awareness of audience and purpose (A volcanic eruption should not spell "death" for those within the vicinity). The response occasionally makes effective use of sentence structure or length (Thankfully, volcanologists are not standing idly by and allowing for such things to occur).
Conventions	Demonstrates partial control, exhibiting occasional errors in punctuation (warning, and; but unfortunately that; volcanoes the people), agreement (a volcanic eruptions and flows in their path), and shifts in verb tense that do not hinder comprehension.
Conclusion: ()	verall, the response best fits the criteria for Level 4, although it is somewhat

Volcanologists can only do so much tokelp
people art away from volcanoes. Theytry to
do their best, but, people also have to listen
to these important people. With over 1,500 volcances
that could erupt at any given time, Ublcarologists
are ready to give instructions of what to do.
Of the 1500 volcanoes, 583 have errupted
within the post 400 years, which are very dangerous
The two main volcance types mentioned are
ones that gently extrude lava like red but toothposte
and "heaves motten rack many miles into the
atmosphere. It is not just the lava that
is the most chargerous, it is the noxious gas and
ash particles. Because people have moved
closer to the volcances more worries of
human deaths have risen. When a
volcano was threatening \$ to erupt in
Columbia, scientist issued a worning, but
no one listened to the warning causing 26,000 per lives in one night. After so many
26,000 pe lives in one night. After so many
natural disasters in one decode, the united
Nations declared the 1900's as the "International recode of Hazard Reduction", no funding
Decade of Mazara Reduction, no turning

in name only.
Scientists had got together and came up with 3 ideas. They made a videa
up with 3 ideas. They made a videa

that shows what happens. The video ended up being so graphic that it was not recommended for kids under Byears.
The video has been shown to mayors and other public officials. Scientists picked 15 volcanoes to study intensely. These "decade volcanoes" are situated evaluated large population areas and could erupt at any time. The last idea was to make better predictions of eruptions.

Although scientists warn people, people must know that scientists do make mistakes and that when a warning is issued people must listen to them.

Anchor Level 3 – A

Quality	Commentary
_ •	The response:
Meaning	Conveys a basic understanding of the text, stating that volcanologists <i>try to do their best</i> . The response makes superficial connections between information and ideas in the document and the assigned task (<i>The two main volcanoe types mentioned</i> and <i>They made a video that shows what happens</i>).
Development	Develops ideas briefly, using some details from the text (<i>It is not just the lava that is the most dangerous</i> and <i>The video has been shown to mayors and other public officials</i>).
Organization	Maintains a clear and appropriate focus on <i>volcanologists</i> and their attempts <i>to help people get away from volcanoes</i> . The response exhibits a logical sequence of ideas, first discussing the threat caused by volcanoes and then the <i>3 ideas</i> scientists had to combat this threat. The scarcity of transitions and the one-sentence conclusion affect internal consistency.
Language Use	Relies on basic vocabulary (<i>Scientists had got together, The video ended up, for kids</i>) and on language taken from the text, with little awareness of audience and purpose. The response exhibits some attempt to vary sentence structure and length for effect, but with uneven success (<i>Although scientists warn people, people must know and must listen to them</i>).
Conventions	Demonstrates partial control, exhibiting occasional errors in spelling (<i>volcanoe</i> and <i>exhist</i>), punctuation (<i>volcanoes more</i> ; <i>warning causing, Reduction, no;</i>), and usage (<i>of</i> for "on" and <i>of</i> for "about") that do not hinder comprehension.

Conclusion: Although the response fits criteria for Levels 3 and 4, it remains at Level 3 because the response addresses only one document.

Volcanologists have a hadeler job than you think. They have to observe, research, monator, and the derid it the volcanoe is active tank languages If the volcanobgists concurr a valcance is active energy wed the Said of encours medition solat It the valuance is almost really to erupt, they have to try to contine people to und leave everything behind. People studerner that at least 500 million people live Largeously close to valcanses in the world. U.S. There are about a million. If the sciencists sent out a evacuation wasning most people con't B's triby k effect from when really it eventually ville It the volcarobzists sent ant a warning and the eluption does not happen more and more people start to worder it the scientists are really prelist an eluphon of just guesting. But the people bon't relize the high-tech tools volcanologists have. Some examples are Surreillance by satellites which is really effective and accurate expensive, bobal Positioning Systems (GPS) another very effective to), sieismomotors, titt meter, ground clack meders which are all bushed on majorly tangerous valiances. & read it acculatly. In conclusion people would open shell eyes and see the show strow ark mant siews of men sno better off and sufer.

Anchor Level 3 – B

Quality	Commentary
	The response:
Meaning	Conveys a basic understanding of the documents (If the volcanologists concure a valcanoe is
	active they have to take certian measurs and Some examples are Surveillance by Satellites
	Gobal Positioning Systems). The response makes few connections to the task.
Development	Develops ideas briefly, using some details from the documents (they have to try to convince
	people to evacuate and the high-tech tools the volcanologists have).
Organization	Establishes an appropriate focus on the role of volcanologists who must observe, research,
	monator, and the decide if the volcanoe is active and dangerous but shifts focus in the
	conclusion. The response exhibits a rudimentary structure, explaining how volcanologists must
	first predict volcanic eruptions and then convince people to evacuate hazardous areas, but ideas
	are only loosely connected. The response contains irrelevancies (In the U.S. there are about a
	million).
Language Use	Uses appropriate language, with some awareness of audience and purpose (Volcanologists have
	a harder job than you think). The response occasionally makes effective use of sentence
	structure or length (If the volcanoe is almost everything behind).
Conventions	Demonstrates emerging control, exhibiting frequent errors in spelling (concure, certian,
	stuberned, relize, acculatly) and occasional errors in punctuation (warning most, are
	Surveillance, expensive Gobal), paragraphing, and omission of word endings (the decide, the
	have, their home, a evacuation) that hinder comprehension.
Conclusion: Overall the response best fits the criteria for Level 3, although it is somewhat	
stronger in langu	age use.

There are over 1500 active volcanoes in world today, and there is less than one third of the population of the world that true danger behind volcanoes. People Know if they choose to live near the site of an active volcanoe, but they do not realize the dunger that the volcance poses upon them. Over the years, there been increasing eforts to help educate ho live near volvances and save lives. efforts developed in order to educate people the dunyers of volcunoes was the creation International Decade of National Huzurd Reduction, set up by the United Nations, and the development new technology to predict nazardous volcanic eruptions. The International Decade of Natural Hazard Reduction was set up by the United alert people of threatening dungers by active volcanoes. This organization was only developed after 26,000 people died as a result of a volcano exploding during the night. The people of the town were warned by scientists monitoring a volcano the people disregarded because it did not seem reasonable. The organization to prevent these types of disastors from happening again organization fell apart and the International Associate Volcanology and Chemistry of the Earth's Interior took matters into their own hands. Led by Or. Newhall,

the association developed a three step process in order to when those needed about the dangers of volcanoes. First, the organization developed a series of homitaing tapes to show public officials in towns threatened by volcanoes to increase the efforts to evacuate individuals. Second, the organization picked 15 of the most dendly volcanoes around the world that posed the most threat if they erupted and monitored them intensely. Finally, new technology began to be developed to allit those threatened by volcanic eruptions. In recent years, new technology has been developed in order to alert people living in the proximity of an active volcans. These new devices the volcano to predict eruptions. Three new devices developed in order to monitor active volcunoes are tilt meters, seismometers, and ground crack meters. Tilt meters are sensors similar a curpenter's level situated on the slope of the Volcano to tell if accumulating mayma is beginning to swell in the upper region of the volcano. Unlike the tilt meters, the seisometer is buried beheath the ground to detect faint vibrations which indicate deep movement in magma. Similarly to seisometers, ground crack meters are beneath the the size of the volcano and reveal changes in the size of clacks and gullies on a volcanors flunk. This technology has already been developed

und is working in effect teday, while new technology develops for the future. Scientists are working diligently to perfect surveillance of volcanous by satellite. Although still in stages of intancy, surveillance by satellite has come a long way since it's first stages of development. The way of blobal Positioning System's has recently allowed scientest to be able to monitor all different stages of active volcanous from a set location. In the future, more technology will most likely develop in order to save the lives of those living new un active volcano.

In conclusion, although active volcanoes are extremely languages, the lives of those living around them are easily saved if the right steps are taken to worn them. Scientist's can only do so much for the people living around volcanoes, the people living there need to meet them bult way by being familiar with evacuation plans. The lives of people living around volcanoes can be normal as long as the night steps are taken.

Volcanoes are extremely unpedictable, and having about		
1500 active on earth can be very dangerous. Out of that 1500,		
583 have exploded in the past 400 years. Volcanologists are		
583 have exploded in the past 400 years. Volcanologists are scientists that study worksommers, volcanoes. The world's population		
us on a continuous increase and people are setting in		
areas that are potentially high risks for volcanos destruction.		
Dr. Grant Heiken, a voicanologist at the Los Hamos National		
Laboratory is concerned with the lives of these threatened		
people. Actions have taken place to better inform these		
people and have shown to be effective.		
many people refuse to listen to warnings usoued		
about volcances. They tend to ignore the warnings that		
could save their life. Scientists have taken action by		
making a video that depicts what volcanoes can do		
to people and property. This strongly accurate		
film clearly made a point about dangerous volcanoes.		
This film was shown to mayors and public officials		
in hopes to encourage people to evacuate if a		
volcance threatens to explade. These scientists		
chose to study 15 of the vocanos in the world		
that were near large populations. In the areas		
of these volcances, workshops have been held		
bring together those that could help make a difference.		
With newer technology scientists are also able		
to better predict volcanoes.		
The chart of Forecasting a Volcanic Frenzy'		
shows how instruments can be used to better		
predict volcanoes. Seis mometers are placed on

Submitting Teacher Evaluations of the Test to the Department

Suggestions and feedback from teachers provide an important contribution to the test development process. The Department provides an online evaluation form for State assessments. It contains spaces for teachers to respond to several specific questions and to make suggestions. Instructions for completing the evaluation form are as follows:

- 1. Go to <u>www.emsc.nysed.gov/osa/exameval</u>.
- 2. Select the test title.
- 3. Complete the required demographic fields.
- 4. Complete each evaluation question and provide comments in the space provided.
- 5. Click the SUBMIT button at the bottom of the page to submit the completed form.
