

**UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS**

General Certificate of Education Ordinary Level

**MARK SCHEME for the June 2004 question papers**

**7110 PRINCIPLES OF ACCOUNTS**

<b>7110/01</b>	<b>Paper 1, maximum raw mark 40</b>
<b>7110/02</b>	<b>Paper 2, maximum raw mark 100</b>

These mark schemes are published as an aid to teachers and students, to indicate the requirements of the examination. They show the basis on which Examiners were initially instructed to award marks. They do not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

- CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the June 2004 question papers for most IGCSE and GCE Advanced Level syllabuses.

4. (a) (i) Diminishing (reducing) balance

The same percentage/proportion (1) of the net book value (1) is charged annually as depreciation. [2]

(ii) Straight-line

The same percentage/proportion (1) of cost less estimated residual value (1) is charged annually as depreciation. [2]

(iii) Revaluation

Depreciation is calculated as value at start of year  
 plus  
 cost of items purchased during the accounting period (1)  
 less  
 Valuation of fixed assets at end of the accounting period (1) [2]

(b) (i) Diminishing (reducing) balance

Year 1 depreciation —  $60\% \times \$2000 = \$1200$  (1)  
 Year 2 depreciation —  $60\% \times (\$2000 - \$1200) = \$480$  (1) [2]

(ii) Straight-line

Year 1 depreciation —  $10\% \times \$3000 = \$300$  (1)  
 Year 2 depreciation —  $10\% \times \$3000 = \$300$  (1) [2]

(iii) Revaluation

Year 1 —  $\$800 - \$600 = \$200$  (1)  
 Year 2 —  $\$600 - \$350 = \$250$  (1) [2]

- (c) Computers are subject to rapid technological change (1) which must be reflected in the depreciation policy (1). The diminishing (reducing) balance method involves a high proportion of depreciation in early years (1)

Any 2 x 1 marks

Office furniture is used consistently over a long period (1) and this should be reflected in the depreciation policy (1). The straight-line method involves a consistent amount of depreciation being charged annually (1).

Any 2 x 1 marks

Loose tools are low cost fixed assets and tend to be numerous in any organisation (1). It is a simpler procedure to revalue loose tools than employ either of the other two methods of depreciation (1). Because of the value of these assets, the difference from more formal depreciation methods is not material (1) and is cost-effective for these assets (1).

Any 2 x 1 marks
