MARK SCHEME for the October/November 2007 question paper

5090 BIOLOGY

5090/06

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2007 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

				GCE O LEVEL – October/November 2007	5090	06
1	(a)	(i)	Grap 1. <i>x</i> - 2. <i>y</i> - 3. a 4. c Rev. Bar	oh marks: -axis labelled 'light intensity/arbitrary units'. -axis labelled 'number' or 'rate'/bubbles per minute'. ccurate and clear plotting. urve (line) of – best fit/ <i>ruled</i> connections. . axes: A: both axis labels = 1 mark ; and point 4 ; graph: A: 1 and 2.		[4]
		(ii)	light CO ₂ ,	saturation AW ; /other factor limiting/ref 1 variable ;		[2]
	(b)	(i)	light affeo	source generates heat ; cts rate of: reaction/photosyn./enzyme action [R: denat	ures];	[2]
		(ii)	time	to settle/acclimatise ;		[1]
		(iii)	mov use	e lamp/apparatus closer ; brighter/higher power bulb/more bulbs ;		[2]
		(iv)	Four meth mair colle more	r from: replicate readings/take mean ; nod of having uniform bubbles ; ntain constant temp/w.bath etc. ; ecting / measuring gas ; e weed / longer time ; [ignore CO ₂ /HCO ₃]		[up to 3] [Total: 14]
2	(a)	(i)	Draw 1. R cl 2. S 3. 4	wing marks: Realistically complete, at least 8 cm, lear and clean. Spores well shown with smaller proximal bulge. –5 spores on main branches.		[D.3]
		(ii)	Mea NB - Expr [drav Mag [Up 1 Allov	surement with correct units from place indicated ; – if in cm must give decimal place e.g. 4.0 cm. ression clear and correct ; wing measurement over equivalent on Fig.] . accurate and well expressed ; to 2 d.p, no more than 0.2 rounding] wance for x 1000 ;		[4]
	(b)	Holes, smears or filter paper discs on culture dishes; [or a group of separate dishes] dilutions mentioned ; R: volumes clear areas measured/observed ; how results assessed ; replication ;				
		con con	nstant environment/temp/volume/time ;		[up to 4]	
						[Total: 11]
