

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS General Certificate of Education Ordinary Level

READ THESE	INSTRUCTIONS FIRST		
No Additional N	Materials are required.		
Candidates an	swer on the Question Paper.		
Candidates an	swar on the Questian Paper		2 hours 30 minutes
Paper 1			May/June 2010
COMPUTER S	TUDIES		7010/12
CENTRE NUMBER		CANDIDATE NUMBER	
CANDIDATE NAME			
	General Gertificate of Education Ordinary Level		

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use

This document consists of 19 printed pages and 1 blank page.

Explain, with examples where appropriate, the following five computer terms.			
(a)	buffer		
		[2]	
(b)	batch processing		
		[2]	
(c)	e-commerce		
		[2]	
(d)	simulation		
		[2]	
(e)	email		
		[2]	

1

2

A company making televisions has introduced robots to replace the human work force.				
(a)	Describe three effects this would have on the work force.			
	1			
	2			
	3			
	[3]			
(b)	Give two advantages to the company of introducing robots.			
	1			
	2			
	[2]			
(c)	How could the robots be trained to assemble the televisions?			
	[1]			
(d)	A whole batch of televisions was produced with some of the parts missing. How could this error have been avoided?			
	[1]			

3	State four tasks performed at the <i>analysis stage</i> in systems analysis.			
	1			
	2			
	3			
	4			
	[4]			
4	Give four features of a <i>Data Protection Act</i> .			
4	1			
4				
4	1			
4	1			

5

A bank is worried about computer crime. One of their concerns is online access to customer accounts. (a) How can a customer's access details be discovered by criminals? (b) Why would a customer using a credit card for online shopping be more of a security risk than a customer using the same card in a shop? [2] (c) Describe what measures the bank can take to safeguard customer accounts.

An	An expert system is being developed to help engineers diagnose faults in aero engines.				
(a)	Des	scribe the steps taken to develop this new expert system.			
		[4]			
(b)		other method used to identify and rectify faults is to train engineers using ual reality systems.			
	(i)	What is virtual reality?			
		[1]			
	(ii)	What special hardware is used to interface with virtual reality systems?			

6

7 A screen has been developed to allow the input of data into the following fields: name, sex, address, date of birth and examination results.

For
Examiner's
Use

(a) A first attempt at designing the screen is shown below:

(b)

	Student Records				
	Student name:				
	Date of birth: / / Exam results: Subjects and Grades				
	Type in NEXT to go to next student or BACK to go to previous student:				
	s is not a very good input screen. Give four ways in which it could be improv				
2					
3					
4		[4]			
(i)	What is verification?				
(ii)	Which fields should be verified?				
		[3]			

8	A supermarket makes use of barcodes on all its goods as part of its automatic stock control system.					For Examiner's Use		
	(a) Describe how the price is found for each item sold.							
				•••••				
				•••••	[2]			
	(b)	The followin	ng are steps in the automatic stock control syste	em.				
		Number the	steps in the correct order.					
			if stock level ≤ minimum stock level					
			report printed out for the manager					
			stock level reduced by 1					
			new stock value written back to file					
			more items are ordered automatically					
		·			[4]			
9		actory uses a neral adminis	a computer system to store information about tration.	custor	mers, spare parts and			
	(a)	Spare parts	can be identified by selecting from diagrams of	n a con	nputer screen.			
		Describe wh	nat hardware would be needed to allow the part	ts to be	e selected in this way.			
					[2]			
						1		

© UCLES 2010 7010/12/M/J/10

(b) The factory needs to buy a new printer. It has decided to buy either a dot matrix printer or an inkjet printer. Discuss the advantages and disadvantages of using both types of printer in this application. Dot matrix printer: Advantages Disadvantages Inkjet printer: Advantages Disadvantages

10 A small company runs six cars in its fleet. They have produced a spreadsheet to compare running costs over a five month period:

For Examiner's Use

	Α	В	С	D	Е
	Car Identity	Total number	Cost per km	Total cost	Average cost
1		of km	(\$)	(\$)	per month (\$)
2	10001	30 000	1.00	30 000	6 000
3	10002	20 000	4.00	80 000	16 000
4	10003	50 000	1.50	75 000	15 000
5	10004	30 000	2.00	60 000	12 000
6	10005	20 000	2.50	50 000	10 000
7	10006	30 000	1.50	45 000	9 000
8		Averages:	2.08	56 667	11 333

(a) It was decided to print out the spreadsheet formulas from D2 to E8. Using the grid below, show what formulas would be printed:

	D	E
	Total cost	Average cost
1	(\$)	per month (\$)
2		
3		
4		
5		
6		
7		
8		

[4]

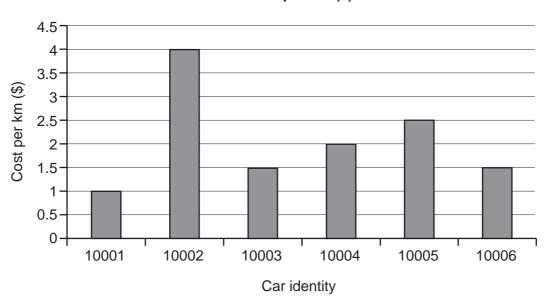

(b) A graph of Cost per km (\$) was drawn:

(c)

For Examiner's Use

[2]

Cost per km (\$)

(i)	Which cells were highlighted to produce this graph?	
		[2]
(ii)	Describe how the average value of 2.08 would be shown on the graph.	
		[1]
	e data in cell C6 was changed to 3.00. ich cells would be updated automatically?	

11 A database has been set up showing information about cars:

For
Examiner's
1100

[2]

Car ref	No of doors	Engine (litres)	CO ₂ (g/km)	Fuel used (km/litre)	No of cylinders
А	3	1.4	145	15.3	4
В	4	2.0	193	12.3	4
С	5	2.5	231	10.9	6
D	3	2.0	190	11.2	6
Е	4	1.3	120	17.5	4
F	5	1.8	180	14.6	4
G	4	3.0	240	9.5	6
Н	4	1.2	115	19.7	3

	condition was used:
	(No of doors = 4) AND (Fuel used (km/litre) > 15)
	[2]
(b)	Write down a search condition to find out which cars have engines larger than 1.8 litres OR have CO_2 emissions higher than 150 g/km.
	[2]
(c)	The database is sorted in <i>ascending order</i> on Fuel used (km/litre) . Using Car ref only, write down the results of the sort.

(a) Using Car ref only, write down which cars would be output if the following search

12	(a)	State two items of hardware needed to enable a standard computer system to take part in video conferencing.
		1
		2
		[2]
	(b)	State two additional items of software that would be needed for the video conferencing to take place.
		1
		2
		[2]
	(c)	Describe two potential problems when using video conferencing.
		1
		2
		[2]

13 Study the following flowchart very carefully:

For Examiner's Use

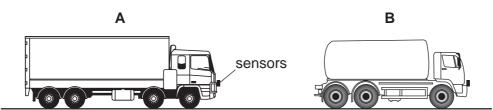

What output would you expect if the following data was input into the flowchart?

х	OUTPUT
-150	
540	
0	

[3]

14 A safety system has been developed to stop vehicles getting too close to each other on the road.

For Examiner's Use

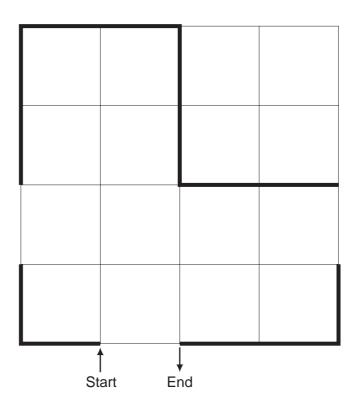

If vehicle ${\bf A}$ gets \underline{too} close to vehicle ${\bf B}$, the brakes are automatically applied by a computer system in vehicle ${\bf A}$.

(a)	What type of sensors could be used on the vehicles?
	[1]
(b)	Describe what the safety system does to constantly monitor how close the vehicle is to the vehicles in front and decide when to take action.
	[4]
(c)	Describe two potential problems with this safety system.
	1
	2
	וכז

15 A floor turtle can use the following instructions:

Instruction	Meaning
FORWARD d	Move d cm forward
BACKWARD d	Move d cm backward
LEFT t	Turn left <i>t</i> degrees
RIGHT t	Turn right <i>t</i> degrees
REPEAT n	Repeat the next set of instructions <i>n</i> times
ENDREPEAT	End of REPEAT loop
PENUP	Raise the pen
PENDOWN	Lower the pen

(In the following grid, each square is 10 cm by 10 cm.)

For Examiner's Use

© UCLES 2010 7010/12/M/J/10

Complete the set of instructions to draw the shape (shown in bold lines) by filling in the blank lines.	For Examiner's Use
LEFT 90	
PENDOWN	
FORWARD 10	
RIGHT 90	

© UCLES 2010 7010/12/M/J/10 **[Turn over**

16	(a)	Write an algorithm, using pseudocode or a flowchart, which:
		 inputs 50 numbers outputs how many of the numbers were > 100
		[3]

(b)	Write an algorithm, using pseudocode or a flowchart, which:
	 inputs 100 numbers finds the average of the input numbers outputs the average
