

**MARK SCHEME for the October/November 2011 question paper
for the guidance of teachers**

1123 ENGLISH LANGUAGE

1123/22

Paper 2 (Reading), maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

(b) Summary Writing and Style

[5]

Candidates have now fleshed out their notes into a piece of formal, continuous prose.

The mark for Style incorporates **TWO** categories of writing, namely OWN WORDS and USE OF ENGLISH. The table which follows on the next page provides descriptors of the mark levels assigned to these TWO categories.

In assessing the overall mark for Style, first of all assign the script to a mark level under the category of OWN WORDS. Then arrive at the mark level for USE OF ENGLISH. Before deciding the mark for this level, take the accuracy of the writing into account, in particular the absence or frequency of **serious** and **minor** errors, and the ability to use original complex sentence structures. **Underline all serious errors.**

Add the marks for OWN WORDS and USE OF ENGLISH together and divide by two. Raise any half marks to the nearest whole number. Add this mark to the Content mark and show as a total in the right-hand margin.

SERIOUS ERRORS

Wrong verb forms.

Serious tense errors.

Serious errors of sentence structure, especially in setting up subordination.

Omission or obvious misuse of prepositions.

Wholesale misunderstanding over the meanings of words used.

Serious errors of agreement.

Ingrained weakness of punctuation, i.e. the habitual comma replacing the necessary full stop.

Mis-spellings of a minor nature. Count as a serious error when the form of the word is severely mangled.

Obvious slips of repetition or omission.

Breakdown of sense.

MINOR ERRORS

Minor errors of punctuation, i.e. the failure to complete pairs of commas in parenthetical phrases/clauses, omissions of stops after introductory words like 'however'.

SUMMARY STYLE DESCRIPTORS			
Mark	OWN WORDS	Mark	USE OF ENGLISH
5	<ul style="list-style-type: none"> Candidates make a sustained attempt to re-phrase the text language. Allow phrases from the text which are difficult to substitute. 	5	<ul style="list-style-type: none"> Apart from very occasional slips, the language is accurate. Any occasional errors are either slips or minor errors. There is a marked ability to use original complex syntax outside text structures. Punctuation is accurate and helpful to the reader.
4	<ul style="list-style-type: none"> There is a noticeable attempt to re-phrase the text. The summary is free from stretches of concentrated lifting. 	4	<ul style="list-style-type: none"> The language is almost always accurate. Serious errors will be isolated. Sentences show some variation, including original complex syntax. Punctuation is accurate and generally helpful.
3	<ul style="list-style-type: none"> There are recognisable but limited attempts to re-phrase the text detail. Attempt may be limited by irrelevance or by oblique or mangled relevance. Groups of text expression are interlaced with own words. The expression may not always be secure, but the attempt to substitute the text will gain credit. 	3	<ul style="list-style-type: none"> The language is largely accurate. Simple structures tend to dominate and serious errors are not frequent, although they are noticeable. Where sentences show some variety and complexity, they will generally be lifted from the text. Serious errors may occur when more sophisticated structures are attempted. Punctuation is generally accurate.
2	<ul style="list-style-type: none"> Wholesale copying of large areas of the text, but not a complete transcript, Attempts to substitute own language will be limited to single word expression. Irrelevant sections of the text will be more frequent at this level and below. 	2	<ul style="list-style-type: none"> Meaning is not in doubt but serious errors are becoming more frequent. Some simple structures will be accurate, although this accuracy is not sustained for long. Simple punctuation will usually be correct.
1	<ul style="list-style-type: none"> Pretty well a complete transcript of the text expression. There will also be random transcription of irrelevant sections of the text. 	1	<ul style="list-style-type: none"> Heavy frequency of serious errors, impeding the reading. Fractured syntax is much more pronounced at this level. Errors of sentence separation are liable to be frequent.

Question 2 from knowledge or experience

[2]

(one concern, one way of dealing with that concern)

Reward only real concerns, do not reward generic concerns, for example, 'environmental problems / we need to protect the planet from destruction'

In the first limb award only concerns, not solutions

In the second limb reward only solutions not results.

Candidates can score the second point without the first. For example, concern is environmental problems = 0. We need to stop cutting down trees = 1.

Do not reward generic solutions. For example, we need to care for the planet = 0.

Must be related to the planet, therefore 'poverty / famine / etc.' = 0

Be generous with the candidate's knowledge and experience.

Question 3 from the whole passage

[1]

(true or false)

Accept any correct indication, do not insist on ticks.

Box 1: False

Box 2: True

Box 3: False

Appendix

There are laws governing the cutting down of trees, but sometimes trees are axed by people who are part of an illegal market in wood, and this **illegal logging destroys the natural habitat of orangutans**. Additional **damage is caused to their habitat by people who burn down extensive areas of forest in a bid to create more land for agriculture**. The displaced orangutans are left **hungry by the destruction of their food source** and, ironically, they are often branded as pests by farmers whose crops then become their only food option. Mindful of potential loss of profits, **farmers carry out vicious extermination programmes of orangutans**. The knock-on effect of this is that frequently **money is offered for killing orangutans**; it is possible to understand such misguided behaviour, as the reward will certainly be more than a week's salary. Sometimes the **mothers are killed for food**, and their killing is rarely humane: they can be beaten to death or doused in petrol and set on fire. On other occasions the **babies are captured as pets**.

But the biggest threat to orangutans today comes from the **clearing of their habitat for palm oil plantations**, which unfortunately flourish best in the lowland forest areas favoured by orangutans. It is estimated that, in some parts of the world, a staggering one in ten products on sale in supermarkets contains palm oil, items ranging from soap and lipstick to margarine and detergent. **Because food made with palm oil is low in the fatty acids associated with heart disease, more and more areas inhabited by orangutans are cleared**. Healthy food may be provided, but orangutans suffer. Furthermore, in a laudable desire to combat carbon emissions, **palm oil is produced on a grand scale to satisfy the demand for biofuels manufactured from it**, again at the expense of orangutans.

The world has become aware of the plight of orangutans, albeit dangerously late. Many **governments** are becoming pro-active in their attempt to halt the extinction of these beautiful creatures by **raising public awareness**. **Individual palm oil companies are being asked** to consider more than mere profit, and to **ensure that their products come from sources which are not detrimental to orangutans**. **Some national parks which are already homes to orangutans are being increased in size** to extend them even greater hospitality, and **better training and equipment are being offered to park rangers** there to help in the conservation programme. **Organisations dedicated to looking after orangutans – e.g. the World Wildlife Fund and the Orangutan Foundation International – are increasing in number**, and many such **organisations are involved in planting new trees in the already ravaged rainforests formerly favoured by orangutans**.

Ordinary people are invited to participate in conservation schemes by **working voluntarily in an orangutan habitat** – even as short a period as three weeks can make a difference. In some areas, **orangutan rescue centres have been established** in desperate and often last-ditch attempts to save lives. Unsurprisingly, the cost of caring for even one infant orangutan is very high; the fact that a single care centre rescues dozens of babies a year means that the bill is often staggering. To make some inroads into these costs, funding organisations encourage people to **adopt an orangutan**, in return for which they might receive such items as a photograph of the adoptee or a certificate of adoption. School **students are invited to be responsible for a particular day in a park's calendar: they instigate a fund-raising programme** to protect the park for that day by paying for police officers to guard against hunters or to patrol rivers in boats.
