

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Ordinary Level

MARK SCHEME for the May/June 2011 question paper

for the guidance of teachers

5014 ENVIRONMENTAL MANAGEMENT

5014/22

Paper 2, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 2			Mark Scheme: Teachers' version	Syllabus	Paper		
				GCE O LEVEL – May/June 2011	5014	22		
1	(a)	(i)	worl	world recession/lack of demand/product substitution/Ni surplus/eq;				
		(ii)		eep the price high/help price recover/eq; to maintain w metal ore to last longer/eq)	profit/reduce cos	ts; [2]		
	(b)	(i)	15 (1	tonnes); reject Kg or other units		[1]		
		(ii)	-	e amount of overburden/soil needs to be movution/dust released/habitat destruction/eq; reject po		•		
	(c)			asks/eq; protective clothing/gloves/washing faciliti hours/exposure time)	ies/eq; (allow re	f to controlled [2]		
	(d)	(i)	very	r few female miners/eq;		[1]		
		(ii)	to gi	ive diseases time to develop/eq;		[1]		
		(iii)		sure health/other causes of death in miners/non min ord different numbers of deaths from lung cancer in n		;; [1]		
		(iv)	mine	er time; more participants; compare smoking miners ers/smokers with non smokers; include women; reco ord time in mining industry;		-		
	(e)	(i)	B , Ic	ongest contact/closest to mine and/ or mine waste;		[1]		
		(ii)	heav som	vy metals (normally) bio accumulate/bio magnify/acc vy metal passes up food chain(s)/eq; le small fish may die; so less food for large fish; so la oduce;		ooisoned/do not [2]		
		(iii)		graph plotted; label axes (number of <u>mayflies</u> / A B C w population for number)	D E);; plots;	[4]		
		(iv)	•	flies increase further away from the mine/converse ickel;	statement/eq; ma	ayflies poisoned [2]		
	(f)			nergy; less pollution/damage to the environment; mir cost of mining/cheaper than mining;	ning reserves last	longer; [2]		
	(g)	(i)	pollu	level of pollution at the start/after one year; ution reduced at ten years/reduces over time; some pollution after ten years/eq;		[2]		
		(ii)	disa	antage fast; fast/easy/cheap/ no skill needed/ no spe dvantage not a specific response to Ni/ no concentra h Ni is present/ref to validity;				
		(iii)	more	e than 10 yrs/11+yrs;		[1]		

	Page 3			Mark Scheme: Teachers' version	Syllabus	Paper	
				GCE O LEVEL – May/June 2011	5014	22	
	(h)	(i)	•	t Euphorbia in soil; extract water and grow mung be sure root growth of mung beans;	ans/use same me	thod; [2]	
		(ii)	coul gene	could become a dominant/invasive plant/outcompetes native plants/reduces biodiver could alter food chains/webs/eq; genes may pass to local plants/ hybridise with local euphorbs; could introduce a pest/disease;			
		(iii)		very valuable export; not highly dangerous to humar nvironment; provides jobs/income to people/country;			
			-	<i>inst:</i> destroys farmland; toxic to humans/livestock/eq s not employ many people; (max 2 if both for and a			
2	(a)	(i)	Octo	bber, February;		[1]	
		(ii)	Nov	–April;		[1]	
		(iii)	112	(days);		[1]	
	(b)	(i)	2. fe	wer no. of plants; less cell division/growth; wer leaves; so less photosynthesis/growth; wer flowers; so fewer seeds/ less reproduction;		(max 4)	
		(ii)		er number/absence of) flowers;		[1]	
		(111)	ao w	veevils infect other plants/crops/alter food chains/car	n weeviis survive/	əq; [1]	
	(c)	(i)	med	e valid points related to source eg: lium/high milk yield; medium/high growth rate; low s ase resistance;	tress at high temp	peratures; ref to [3]	
		(ii)	table	e drawn; suitable headings(milk yield/days); for 7 day	ys;	[3]	
	(d)	(i)	chic	income from) milk; cost of buying new animals; kens not enough of a substitute food source/eq; much to sell; only cassava to eat; so have to buy in f	ōood;	[2]	
		(ii)		er because using WH to keep/feed cattle; so milk all a source of food for chickens; can sell chickens/egg		[2]	
		(iii)	bear	e crops/food sources grown; so always something to ns are N fixers; beans are a high protein food; tomat ing dry WH helps keep cattle/milk production;

	GCE O LEVEL – May/June 2011	5014	22

(e) good ideas such as:

- 1. cattle by channel, qualified;
- WH dried on field edges;
 chickens can be moved to any field to eat crop wastes;
- 4. cattle can be fed crop wastes;
- 5. a rotation idea;
- 6. further detail of rotation; e.g. leave a field fallow
- 7. beans fix N;

8. and 9. AVP;; such as ref to irrigation/water supply, chickens close to farmhouse for security, tomatoes need water, so in fields1/2/3, keep chickens away from beans and tomatoes [4]
