

## Mark Scheme Summer 2008

GCE

GCE O Level Human Biology (7042)

Edexcel is one of the leading examining and awarding bodies in the UK and throughout the world. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers.

Through a network of UK and overseas offices, Edexcel's centres receive the support they need to help them deliver their education and training programmes to learners.

For further information please call our Customer Services on + 44 1204 770 696, or visit our website at www.edexcel-international.org.uk.

## 7042/01 O LEVEL HUMAN BIOLOGY MARK SCHEME - JUNE 2008

Question	Answer	Mark
Number		
1(a)		
	<ul><li>X - pelvis / hip;</li></ul>	
	<ul> <li>Y - tibia / patella;</li> </ul>	
	·	
		(2)

Question Number	Answer	Mark
1(b)(i)	blood cells;	
		(1)

Question Number	Answer	Mark
1(b)(ii)	<ul> <li>lighter (but still strong) / stronger per unit mass;</li> <li>less energy to move around;</li> <li>less minerals needed to form it;</li> </ul>	max (2)

Question	Answer	Mark
Number		
1(c)(i)		
	<ul> <li>to prevent / reduce friction / shock absorber;</li> </ul>	
	·	(1)

Question Number	Answer			Mark
1(c)(ii)	1 mark for eac			
	Difference	Bone	Cartilage	
	1	rigid/ not flexible	flexible	
	2	heavy	light	
	3	contains marrow	no marrow	
	4	contains calcium salts	no calcium salts	
	5	internal blood vessels	no internal / has external blood vessels	
	6	muscle attached	muscle not attached	max (3)

Question	Answer	Mark
Number		
1(c)(iii)		
	<ul> <li>allows bone / bone shaft to increase in length / grow;</li> </ul>	
	Reject stretch	(1)

Question	Answer	Mark
Number		
1(c)(iv)		
	<ul> <li>rib attachment to sternum;</li> </ul>	
	<ul><li>base of sternum;</li></ul>	
	<ul><li>in trachea;</li></ul>	
	ear / pinna;	
	(intervertebral) discs;	
	• nose;	4-3
		max (2)

Question	Answer	Mark
Number		
2(a)(i)		
	<ul> <li>inverse relationship / less fibre - more cases of</li> </ul>	
	bowel cancer / ORA;	
		(1)

Question Number	Answer	Mark
2(a)(ii)	• 87/88 per 100 000 / range 87-88 per 100 000;	
		(1)

Question Number	Answer	Mark
2(a)(iii)		
	• 2.50 g;	(1)

Question	Answer	Mark
Number		
2(a)(iv)		
	2.22g gives 93 deaths, 2.50g gives 8- deaths per	
	100 000;	
	<ul> <li>(change is) decrease of 13 deaths per 100 000;</li> </ul>	
	2 marks for correct answer without working shown	(2)

Question Number	Answer	Mark
2(b)(i)	<ul> <li>any leafy vegetable;</li> <li>root vegetable;</li> <li>fruits;</li> <li>all bran / any whole grain cereal;</li> <li>(wholemeal) bread;</li> <li>(brown) rice</li> </ul>	max (2)

Question	Answer	Mark
Number		
2(b)(ii)		
	<ul><li>increases / aids peristalsis;</li></ul>	
	<ul> <li>prevents constipation / removes faeces easily;</li> </ul>	
	<ul> <li>reduces risk of bowel cancer / eq;</li> </ul>	
	<ul> <li>less time for toxins to accumulate;</li> </ul>	
		max (2)

Question Number	Answer			Mark
3	1 mark for each correct answer (x).			
	Process	mitosis	meiosis	
	Results in the formation of haploid cells		Х	
	Nuclear membrane disappears during division	х	х	
	Homologous chromosomes line up in pairs		X	
	Only two daughter cells produced	Х		
	Genetic material exchanged between chromosomes of a homologous pair		Х	
	Daughter cells all identical to parent	Х		
	Nuclear spindle forms during division	Х	Х	
	DNA content doubled before next division	Х	Х	
	Occurs only during gamete formation		Х	(9)
		l	ļ	]

(Total 9 Marks)

Question Number	Answer	Mark
4(a)(i)	<ul> <li>trachea - P;</li> <li>bronchi - R;</li> <li>diaphragm - S;</li> </ul>	(3)

Question Number	Answer	Mark
4(a)(ii)		
	heart / pericardium;	(1)

Question	Answer	Mark
Number		
4(a)(iii)		
	<ul> <li>breathing is movement of air in and out / ventilation of lungs;</li> <li>respiration is the release of energy (in cells);</li> </ul>	
	respiration is the release of energy (in cens),	(2)

Question	Answer	Mark
Number		
4(b)		
	<ul> <li>intercostal muscles contract;</li> </ul>	
	<ul><li>ribs swing up and outwards;</li></ul>	
	<ul> <li>diaphragm (muscles) contracts;</li> </ul>	
	<ul> <li>diaphragm less dome shaped / flattened;</li> </ul>	
	Reject moves down	
	<ul> <li>leads to increase in volume of thorax / chest</li> </ul>	
	cavity;	max (4)

Question Number	Answer	Mark
4(c)	<ul> <li>particles / pollen / dust / eq;</li> <li>trapped by mucus;</li> <li>air warmed;</li> <li>by radiation / surrounded by tissues at higher temperature;</li> <li>air moistened;</li> <li>by evaporation from lining of trachea / mucus;</li> </ul>	max (4)

(Total 14 Marks)

	1.	1
Question Number	Answer	Mark
5(a)(i)		
S(d)(l)	• ureter;	
	J. 3 3 3 1 ,	(1)
Question	Answer	Mark
Number		
5(a)(ii)	• urine;	
	Reject urea	(1)
	,	
	<b>.</b>	
Question	Answer	Mark
Number 5(a)(iii)		
S(a)(III)	<ul> <li>cortex - filtration / ultra filtration / eq;</li> </ul>	
	<ul> <li>medulla - (selective) reabsorption / eq;</li> </ul>	
		(2)
Question Number	Answer	Mark
5(b)		
0(5)	<ul> <li>glucose used by kidney cells for respiration;</li> </ul>	
		(1)
0 11		1 8 4 1
Question	Answer	Mark
Number	Answer	Mark
	<ul><li>Answer</li><li>bulk of water in filtrate reabsorbed;</li></ul>	Mark
Number		Mark
Number	<ul> <li>bulk of water in filtrate reabsorbed;</li> </ul>	
Number	<ul><li>bulk of water in filtrate reabsorbed;</li><li>some solutes reabsorbed;</li></ul>	Mark max (2)
Number 5(c)(i)	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul>	max (2)
Number	<ul><li>bulk of water in filtrate reabsorbed;</li><li>some solutes reabsorbed;</li></ul>	
Number 5(c)(i)  Question	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer	max (2)
Number 5(c)(i)  Question Number	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> </ul>	max (2)
Number 5(c)(i)  Question Number	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer	max (2)
Number 5(c)(i)  Question Number	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> </ul>	max (2)
Number 5(c)(i)  Question Number 5(c)(ii)	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> </ul>	max (2)
Number 5(c)(i)  Question Number 5(c)(ii)  Question	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> </ul>	max (2)
Number 5(c)(i)  Question Number 5(c)(ii)  Question Number	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> <li>from filtrate / kidney tubule into blood;</li> </ul>	max (2)  Mark  (2)
Number 5(c)(i)  Question Number 5(c)(ii)  Question	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> <li>from filtrate / kidney tubule into blood;</li> </ul> Answer <ul> <li>Answer</li> </ul>	max (2)  Mark  (2)
Number 5(c)(i)  Question Number 5(c)(ii)  Question Number	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> <li>from filtrate / kidney tubule into blood;</li> </ul> Answer <ul> <li>sweating;</li> </ul>	max (2)  Mark  (2)
Number 5(c)(i)  Question Number 5(c)(ii)  Question Number	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> <li>from filtrate / kidney tubule into blood;</li> </ul> Answer <ul> <li>sweating;</li> <li>less water in the blood;</li> </ul>	max (2)  Mark  (2)
Number 5(c)(i)  Question Number 5(c)(ii)  Question Number	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> <li>from filtrate / kidney tubule into blood;</li> </ul> Answer <ul> <li>sweating;</li> </ul>	max (2)  Mark  (2)
Number 5(c)(i)  Question Number 5(c)(ii)  Question Number	<ul> <li>bulk of water in filtrate reabsorbed;</li> <li>some solutes reabsorbed;</li> <li>urea left behind / not reabsorbed;</li> </ul> Answer <ul> <li>all glucose reabsorbed;</li> <li>from filtrate / kidney tubule into blood;</li> </ul> Answer <ul> <li>sweating;</li> <li>less water in the blood;</li> <li>ref. to ADH;</li> </ul>	max (2)  Mark  (2)

Question	Answer	Mark
Number		
5(d)(ii)		
	<ul><li>it will increase / eq;</li></ul>	
	·	(1)

(Total 13 Marks)

Question Number	Answer	Mark
6(a)(i)	1 mark for correct answer.	
	• male; (1 Mark)	
	(1 Mark)	
	1 mark for each correct answer from any of the following - maximum 3 marks	
	<ul> <li>ref. to unpaired X chromosome in males / male XY;</li> </ul>	
	<ul> <li>recessive (allele / gene) present in male always shows feature;</li> </ul>	
	<ul> <li>females can have recessive allele hidden by dominant allele;</li> </ul>	
	females must receive a recessive allele from	
	both parents / be homozygous recessive to show feature;	
	(3 Marks)	
		(4)

Question	Answer	Mark
Number		
6(a)(ii)		
	• <b>X</b> <sup>h</sup> <b>Y</b> ;	
		(1)

Question	Answer	Mark
Number		
6(b)(i)	1 mark for each correct answer from any of the following (Accept other logical explanations for these points) - maximum 3 marks.	
	<ul> <li>haemophilia allele is recessive;</li> <li>Sarah heterozygous / carries recessive X<sup>h</sup>;</li> <li>lan's mother / Catherine inherits X<sup>h</sup> from her mother / Sarah / carrier;</li> <li>lan inherits X<sup>h</sup> from his mother / carrier;</li> </ul>	max (3)

Question Number	Answer	Mark
6(b)(ii)	<ul> <li>Colin is not affected / does not carry X<sup>h</sup> / does carry X<sup>H</sup>;</li> <li>thus girl cannot have X<sup>h</sup>X<sup>h</sup> / have two recessive alleles / must have an X<sup>H</sup>;</li> </ul>	(2)

(Total 10 Marks)

Question	Answer	Mark
Number		
7(a)	<ul> <li>mother's blood has higher carbon monoxide content than normal;</li> <li>mother's blood carries reduced amount of oxygen / A/W;</li> <li>fetus receives reduced / too little oxygen supply;</li> <li>baby born with reduced birth weight / mass / small;</li> <li>may show brain damage symptoms;</li> </ul>	max (3)

Question	Answer	Mark
Number		
7(b)	<ul> <li>may cause sunburn / blistering;</li> <li>can damage skin tissues / cells;</li> <li>ultra-violet can cause cell / nucleus / chromosome damage;</li> <li>could lead to (more) mutations;</li> </ul>	
	<ul> <li>could lead to skin cancer / melanoma;</li> </ul>	max (4)

Question Number	Answer	Mark
7(c)	<ul> <li>loud noise causes large vibrations of eardrum;</li> <li>this causes large vibrations of middle earbone / malleus;</li> <li>ligaments to middle ear bone / malleus slackens;</li> <li>person cannot hear / suffers temporary deafness;</li> <li>(extensive exposure) can lead to cochlea damage / deafness;</li> </ul>	max (3)

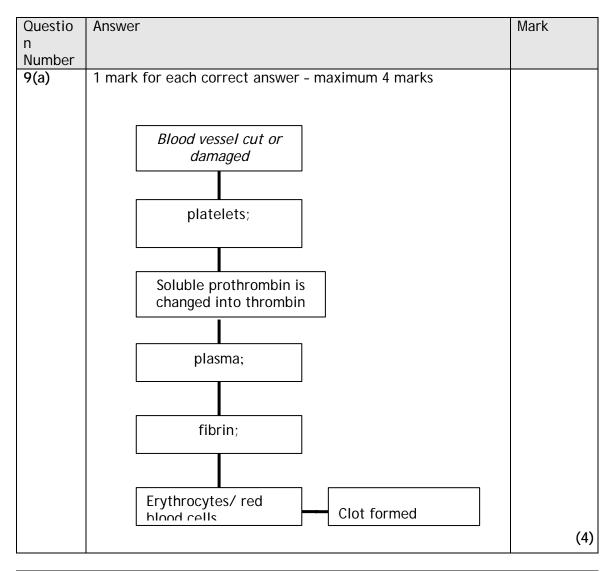

(Total10 Marks)

Question Number	Answer	Mark
8(a)	<ul> <li>Cerebral hemispheres</li> <li>controls intelligence / reasoning / learning / controls voluntary muscle / memory / vision / hearing / personality;</li> <li>(1 Mark))</li> </ul>	
	<ul> <li>Cerebellum</li> <li>balance / involuntary control of skeletal muscles / learned reflexes / named example; (1 Mark)</li> </ul>	(2)

Question Number	Answer	Mark
8(b)	<ul> <li>death;</li> <li>part C controls all involuntary muscles / gut / heartbeat / breathing;</li> </ul>	(2)

Question Number	Answer	Mark
8(c)	<ul> <li>spinal cord;</li> <li>no impulses below break / lower body;</li> <li>no sensations (below break);</li> <li>paralysis (below break);</li> <li>Reject</li> </ul>	max (3)

(Total 7 Marks)

Answer	Mark
•	
<ul> <li>prevents entry of bacteria / pathogens;</li> <li>Reject germs</li> </ul>	(2)
	<ul> <li>prevents further blood loss;</li> <li>prevents entry of bacteria / pathogens;</li> </ul>

Question	Answer	Mark
Number		
9(b)(ii)		
	<ul> <li>clots / thromboses could occur in blood vessels and block them / cause strokes / heart attack / eq;</li> </ul>	
	4/	(1)

(Total 7 Marks)

Question Number	Answer	Mark
10(a)(i)	<ul> <li>grinding / crushing / chewing (food);</li> </ul>	(1)
Question Number	Answer	Mark
10(a)(ii)	• molars / (type) A;	(1)
Question Number	Answer	Mark
10(a)(iii)	<ul> <li>remove all bacteria / food remains / plaque collecting here;</li> </ul>	(1)
Question Number	Answer	Mark
10(b)	<ul> <li>enamel;</li> <li>dentine;</li> <li>calcium;</li> <li>bacteria;</li> <li>acid;</li> <li>erodes / corrodes / dissolves;</li> </ul>	(6)

(Total 9 Marks)

## 7042/02 PAPER 2 MARK SCHEME - JUNE 2008

Question	Answer	Mark	
Number			
1(a)(i)			
	1. right atrium;		
	2. atrium (wall) contracts;		
	<ol><li>pushes blood into ventricle;</li></ol>		
	4. (via) cuspid valve;		
	Reject bicuspid		
	5. ventricle (wall) contracts;		
	<ol><li>forces blood into pulmonary artery;</li></ol>		
	7. (via) semilunar valves;		
	8. through lung capillaries;		
	<ol><li>via pulmonary vein to left atrium;</li></ol>		
	10. valves prevent backflow of blood;		
		max	(7)

Question Number	Answer	Mark
Number 1(a)(ii)	<ol> <li>blood in vena cava has raised carbon dioxide level;</li> <li>blood in vena cava has lower oxygen level; R - none</li> <li>carbon dioxide produced by body cells;</li> <li>oxygen removed from blood as it passes through tissues;</li> <li>blood in vena cava has low pressure;</li> <li>pressure increased by pumping of heart;</li> <li>alveolar air has high concentration of oxygen;</li> <li>oxygen diffuses into capillaries;</li> <li>combines with haemoglobin / forms oxyhaemoglobin;</li> <li>low carbon dioxide concentration in alveolar air;</li> <li>carbon dioxide diffuses out of blood;</li> <li>suitable ref. to concentration gradient;</li> <li>glucose level drops;</li> <li>reference to respiration in alveoli;</li> </ol>	max (9)

Question Number	Answer	Mark
1(b)	2 marks for each correct answer from any of the following pairs - maximum 4 marks.  • cardiac muscle involuntary; • skeletal muscle voluntary;  • cardiac muscle single cells; • skeletal muscle fibres with scattered nuclei /	
	<ul> <li>coenocyte described;</li> <li>cardiac muscle no fatigue;</li> <li>skeletal muscle fatigues;</li> <li>cardiac muscle not joined to skeleton;</li> <li>skeletal muscle joined to bones;</li> </ul>	
	<ul><li>cardiac muscle myogenic;</li><li>skeletal muscle neurogenic;</li></ul>	max (4)

Question Number	Answer	Mark
2(a)	<ul> <li>they detect a stimulus / eq;</li> <li>Accept changes in environment</li> <li>they respond by generating electrical impulse;</li> <li>pass this to CNS / brain / sensory neurone;</li> <li>one example from following list: skin / tongue / cochlea / semi-circular canals / nose / eye;</li> <li>Reject senses</li> </ul>	max (3)

Question Number	Answer	Mark
2(b)	Accept points on labelled / annotated diagram  1. light rays (almost) parallel; 2. enter via cornea; 3. rays refracted / bent; 4. pass (unaltered) through aqueous humour; 5. enters lens via pupil; 6. lens made less convex / flatter; 7. by relaxation of ciliary muscles; 8. suspensory ligaments pull on lens; 9. fine adjustment / final refraction by lens; 10. pass (unaltered) through vitreous humour; 11. final focus on fovea / yellow spot;	max (7)

Question Number	Answer	Mark
2(c)	<ul> <li>hard lens</li> <li>more difficult to change shape of lens / accommodation difficult;</li> <li>difficult to form sharp focus;</li> <li>especially on distant / very close objects;</li> <li>cloudy lens</li> <li>light rays cannot penetrate / scattered;</li> <li>image is blurred / fuzzy;</li> </ul>	max (4)

Question Number	Answer	Mark
2(d)(i)	<ul> <li>(mechanism that) keeps internal conditions / cell environment;</li> <li>constant / within narrow limits;</li> </ul>	(2)

Question Number	Answer	Mark
2(d)(ii)	1 mark for each correct answer from any of the following - maximum 4 marks     • regulates the amount of light reaching the retina:	
	retina;  • too much / bright light / ORA;  • circular muscles of iris contract / ORA;  • radial muscles of iris relax / ORA;  • pupil becomes smaller / less light enters / ORA;	(4)

<ul> <li>3(a)(i)</li> <li>respiration;</li> <li>glucose;</li> <li>energy released in mitochondria;</li> <li>suitable ref. to enzymes;</li> </ul>	Question	Answer	Mark
<ul> <li>(glucose) reacts with oxygen;</li> <li>waste products are carbon dioxide and water;</li> <li>in aerobic respiration;</li> <li>energy released used to form ATP;</li> </ul> max (6)	Number 3(a)(i)	<ul> <li>glucose;</li> <li>energy released in mitochondria;</li> <li>suitable ref. to enzymes;</li> <li>present on cristae / inner membranes;</li> <li>(glucose) reacts with oxygen;</li> <li>waste products are carbon dioxide and water;</li> <li>in aerobic respiration;</li> </ul>	max (6)

Question	Answer	Mark
Number		
3(a)(ii)		
	<ul><li>energy is used to form ATP;</li></ul>	
	<ul> <li>combines ADP and phosphate group;</li> </ul>	
	<ul><li>stored in cell;</li></ul>	
	<ul> <li>when energy required ATP breaks down;</li> </ul>	(0)
		max (3)

Question Number	Answer	Mark
3(b)(i)	<ul> <li>Any three pairs - up to 2 marks each</li> <li>anaerobic - end product is lactic acid;</li> <li>aerobic - end products are carbon dioxide and water;</li> <li>aerobic - requires oxygen;</li> <li>anaerobic - no oxygen needed;</li> <li>aerobic - glucose molecule completely broken down;</li> <li>anaerobic - glucose molecule only partially broken down;</li> <li>aerobic - large number of ATP molecules formed / a lot of energy released;</li> <li>anaerobic - few ATP molecules formed / little energy;</li> </ul>	
	(6)	
	1 mark for correct answer	
	<ul> <li>only minimal amount of lactic acid tolerated as it is toxic / causes cramp;</li> <li>anaerobic respiration wasteful of energy reserves / eq;</li> </ul>	max (7)

Question	Answer	Mark
Number		
3(b)(ii)	<ul> <li>carbon dioxide removed via alveoli / lungs;</li> <li>carbon dioxide used to form urea;</li> <li>water removed via alveoli / lungs;</li> <li>water removed by kidney;</li> <li>lactic acid oxidised (when oxygen is available);</li> <li>lactic acid converted to glycogen;</li> <li>in the liver;</li> </ul>	
	• III the liver,	max (4)

Question	Answer	Mark
Number		
4(a)(i)	<ul><li>long structure/folded internally;</li><li>large surface area;</li></ul>	
	<ul> <li>ref. to entry of bile / pancreatic ducts;</li> <li>secretion of enzymes;</li> <li>presence of villi;</li> </ul>	
	<ul> <li>muscles move food along / mixing;</li> </ul>	max (4)

Question Number	Answer	Mark
4(a)(ii)	<ul> <li>for absorption materials must be soluble;</li> <li>enzymes activated by alkaline conditions / higher pH;</li> <li>bile produces alkaline conditions;</li> <li>bile emulsifies fats / eq;</li> <li>lipase;</li> <li>fats to fatty acids and glycerol;</li> <li>amylase;</li> <li>starch to maltose;</li> <li>maltase;</li> <li>maltose to glucose;</li> <li>peptidase / relevant named example e.g. trypsin;</li> <li>protein / peptides to amino acids; (Accept any other relevant enzyme and effect)</li> </ul>	max (8)

Question Number	Answer	Mark
4(a)(iii)	<ul> <li>glucose absorbed into blood capillaries;</li> <li>amino acids absorbed into blood capillaries;</li> <li>fatty acids / glycerol absorbed into lacteals;</li> <li>ref. to diffusion gradient / relative concentrations;</li> <li>ref. active uptake;</li> </ul>	max (3)

Question Number	Answer	Mark
4(b)	<ul> <li>metabolism of products of digestion / eq;</li> <li>glucose converted to glycogen;</li> <li>stored in liver;</li> <li>excess amino acids deaminated;</li> <li>urea formed;</li> <li>alcohol broken down / oxidised;</li> <li>harmful substances detoxified;</li> </ul>	max (5)

Question Number	Answer	Mark
5(a)	<ul> <li>progesterone produced / level high;</li> <li>fertilised egg cell / zygote passes to uterus;</li> <li>moved along oviduct (by cilia);</li> <li>uterine lining rich in blood vessels;</li> <li>zygote settles on / sinks into / attaches to uterine lining / implants;</li> <li>zygote divides to form ball of cells;</li> <li>cells differentiate / eq;</li> <li>some cells form placenta / attach to uterine lining;</li> <li>other cells become embryo / fetus;</li> </ul>	max (5)

Question Number	Answer	Mark
5(b)(i)	<ul> <li>interlocking of maternal and fetal tissues;</li> <li>ref. to villi;</li> <li>large surface area in contact;</li> <li>a rich blood supply in both maternal and fetal tissues;</li> <li>very thin barrier between blood supplies;</li> <li>allows diffusion to occur readily (from one system to the other);</li> <li>ref. to concentration gradients;</li> <li>blood systems are not connected to each other / no mixing of blood;</li> </ul>	max (5)

Question Number	Answer	Mark
5(b)(ii)	<ul> <li>small intestine</li> <li>higher concentration in maternal blood;</li> <li>glucose / amino acids / vitamins / mineral salts / fatty acids / glycerol;</li> <li>diffusion into fetal blood;</li> </ul>	
	<ul> <li>lungs</li> <li>oxygen higher concentration in maternal blood;</li> <li>carbon dioxide higher concentration in fetal blood;</li> <li>diffusion down concentration gradient;</li> </ul>	
	<ul> <li>kidneys</li> <li>urea in fetal blood diffuses to maternal blood;</li> </ul>	max (6)

Question Number	Answer	Mark
5(c)	<ul> <li>progesterone;</li> <li>prevents breakdown of uterine lining;</li> <li>thus prevents miscarriage abortion;</li> <li>uterine lining further vascularised / blood vessels grow into lining;</li> <li>stimulates placental growth;</li> <li>prevents further ovulation / implantation / FSH production;</li> </ul>	max (4)

Question Number	Answer	Mark
6(a)	<ul> <li>an organism that transfers pathogens from host to host;</li> <li>not itself harmed by the pathogen;</li> </ul>	(2)

Question Number	Answer	Mark
6(b)(i)	1 mark for correct answer.	
	• louse; (1 Mark)	
	1 mark for each correct answer from any of the following - maximum 3 marks	
	<ul> <li>pathogen / bacterium / microbe on body / in faeces of louse; R - germ</li> <li>left on human skin;</li> <li>louse bites cause irritation;</li> </ul>	
	<ul> <li>scratching breaks skin surface / allows pathogen entry;</li> </ul>	
	(max 3 Marks)	(4)

Question Number	Answer	Mark
6(b)(ii)	<ul><li>1 mark for correct answer.</li><li>anopheline mosquito; (1 Mark)</li></ul>	
	<ul> <li>1 mark for each correct answer from any of the following - maximum 3 marks</li> <li>bites/ stab and sucks human blood;</li> <li>if victim has malaria parasite enters mosquito with blood;</li> <li>when biting injects saliva to prevent blood clotting;</li> </ul>	
	saliva contains contains parasite;     (max 3 Marks)	(4)

Question	Answer	Mark
Number		
6(c)		
	<ul> <li>(Schistosoma) eggs present in faeces / urine;</li> </ul>	
	<ul> <li>hatch in water to release larva;</li> </ul>	
	<ul> <li>larva enters body of snail;</li> </ul>	
	<ul> <li>develops into second type of larva;</li> </ul>	
	<ul><li>released into water;</li></ul>	
	<ul> <li>this larva can penetrate human skin</li> </ul>	<i>(</i> -)
	'	max (5)

Question Number	Answer	Mark
6(d)	<ul> <li>objects that pierce skin / named example;</li> <li>may be contaminated by virus from user;</li> <li>if not sterilised can pass virus to second user;</li> <li>direct transfusion of contaminated blood / blood products;</li> <li>sexual transmission;</li> <li>lining of penis / vagina has no epidermis;</li> <li>transmission from mother to fetus / child;</li> <li>across placenta / during birth;</li> </ul>	max (5)

Question	Answer	Mark
Number		
7(a)(i)	1 mark for each correct answer from any of the following - maximum 4 marks If nucleus included - maximum 3 marks Accept marks on a labelled diagram  • ref. to small size / possible shape; • cell wall; • cell membrane; • cytoplasm; • thread / coil of nucleic acid / DNA; • flagellum / flagella; • presence of plasmids;	max (4)

Question Number	Answer	Mark
7(a)(ii)	<ul> <li>Accept points on a labelled diagram</li> <li>most cannot manufacture own food;</li> <li>parasites or saprophytes;</li> <li>saprophytes secrete enzymes / eq;</li> <li>external digestion;</li> <li>(both groups) absorb / take in digested foods;</li> <li>by diffusion;</li> <li>food sources - living organism / dead organic matter;</li> <li>ref. to chemotrophs;</li> <li>ref. to photosynthetic bacteria;</li> </ul>	max (5)

Question Number	Answer	Mark
7(b)(i)	<ul> <li>1 mark for correct answer.</li> <li>name / description of disease; (must be a bacterial example);</li> <li>(1 mark)</li> </ul>	
	1 mark for each correct answer from any of the following - maximum 4 marks (treatments and controls must be specific to named disease) For non-bacterial diseases allow treatment and control	
	<ul> <li>use of antibiotics;</li> <li>named example;</li> <li>second method of treatment;</li> <li>vaccination / medical method of control;</li> <li>environmental method of control;</li> <li>(maximum 4 marks)</li> </ul>	<b>(F)</b>
		(5)

Question Number	Answer	Mark
7(b)(ii)	Accept any three recognised processes with examples - 2 marks each	
	<ul> <li>food production;</li> <li>e.g. yoghurt / cheese / soy sauce;</li> </ul>	
	<ul> <li>decomposition; formation of humus / manure / compost / etc;</li> </ul>	
	<ul> <li>recycling;</li> <li>e.g. nitrogen cycle / carbon cycle / sewage treatment;</li> </ul>	
	<ul> <li>biotechnological processes; genetic engineering / named example;</li> </ul>	
	accept any relevant examples need explanation /description for second mark	max (6)

Question Number	Answer	Mark
8(a)	<ul> <li>an injection / oral liquid;</li> <li>containing weakened / dead pathogens / antigens;</li> </ul>	max (2)

Question	Answer	Mark
Number		
8(b)(i)	<ul> <li>antigens;</li> <li>proteins on surface of pathogen</li> <li>stimulate white blood cells / lymphocytes;</li> <li>to form antibodies;</li> <li>action of antibody / destroy / agglutinate pathogens;</li> <li>remain in blood for some time;</li> <li>memory cells retain ability to make specific antibody;</li> <li>thus can respond to future infections;</li> <li>before symptoms appear;</li> </ul>	max (6)

Question Number	Answer	Mark
8(b)(ii)	<ul> <li>takes some time for antibodies to be formed;</li> <li>if infected antigens already present;</li> <li>thus white blood cells already stimulated;</li> </ul>	max (2)

Question	Answer	Mark	
Number			
8(b)(iii)			
	<ul><li>antibodies present in mother's blood;</li></ul>		
	<ul> <li>from infections / immunisations she has had;</li> </ul>		
	<ul> <li>antibodies can cross placenta;</li> </ul>		
	<ul> <li>antibodies active in child at birth;</li> </ul>		
	<ul> <li>memory cells do not cross placenta;</li> </ul>		
	<ul> <li>child's organs destroy / excrete antibodies</li> </ul>		
	within months;		
	<ul> <li>presence of future antigens needed to trigger</li> </ul>		
	child's own immune system;	<b>(-)</b>	
		max (5)	

Question Number	Answer	Mark
8(c)	<ul> <li>white blood cells / lymphocytes needed to form immune system;</li> <li>baby not able to form antibodies;</li> <li>therefore unable to destroy pathogens;</li> <li>even normally mild infections can become fatal;</li> <li>white blood cells formed in bone marrow;</li> <li>tissue matching necessary for donor tissue to avoid rejection;</li> <li>successful transplant will form new active white blood cells;</li> </ul>	max (5)

Question Number	Answer	Mark
9(a)(i)	<ul> <li>process of photosynthesis;</li> <li>light energy;</li> <li>absorbed by chloroplasts / chlorophyll;</li> <li>converted to chemical energy;</li> <li>used to combine carbon dioxide and water;</li> <li>to form glucose / simple sugar;</li> <li>glucose converted to other substances;</li> <li>e.g. starch / fats / proteins;</li> <li>passed to consumers;</li> <li>some ATP formed;</li> </ul>	max (6)

Question	Answer	Mark	
Number			
9(a)(ii)	<ul> <li>suitable food chain; (must start with producer have a suitable herbivore and end with human)</li> <li>eaten / digestion by consumers;</li> <li>materials assimilated in body of consumer;</li> <li>energy lost at each stage of chain;</li> <li>Maximum of 2 marks from</li> <li>by respiration;</li> <li>by defaecation;</li> <li>excretion;</li> <li>heat / movement undigested material;</li> </ul>		
		max	(4)

Question Number	Answer	Mark	
9(b)(i)	<ul> <li>for manufacture of proteins;</li> <li>nitrates needed for conversion glucose to amino acids;</li> <li>amino acids formed into proteins;</li> <li>nitrates supply increased by use of manure / compost / humus;</li> <li>increased by use of chemical fertilisers;</li> <li>use of leguminous crop (explained);</li> </ul>	max	(4)

Question	Answer	Mark
Number		
9(b)(ii)		
	<ul><li>nitrates very soluble;</li></ul>	
	<ul><li>easily leached into lakes / rivers;</li></ul>	
	eutrophication can occur;	
	<ul> <li>rapid growth of algae (on surface) / algal bloom;</li> </ul>	
	<ul> <li>light excluded from deeper layers;</li> </ul>	
	<ul> <li>death of algae and other aquatic plants;</li> </ul>	
	<ul> <li>provide food for bacteria;</li> </ul>	
	<ul> <li>rapid reproduction of bacteria;</li> </ul>	
	<ul> <li>use up oxygen / create anaerobic conditions;</li> </ul>	
	<ul> <li>aquatic animals die from lack of oxygen;</li> </ul>	(4)
	aquatic attended to onlygon,	max (6)
