Notes

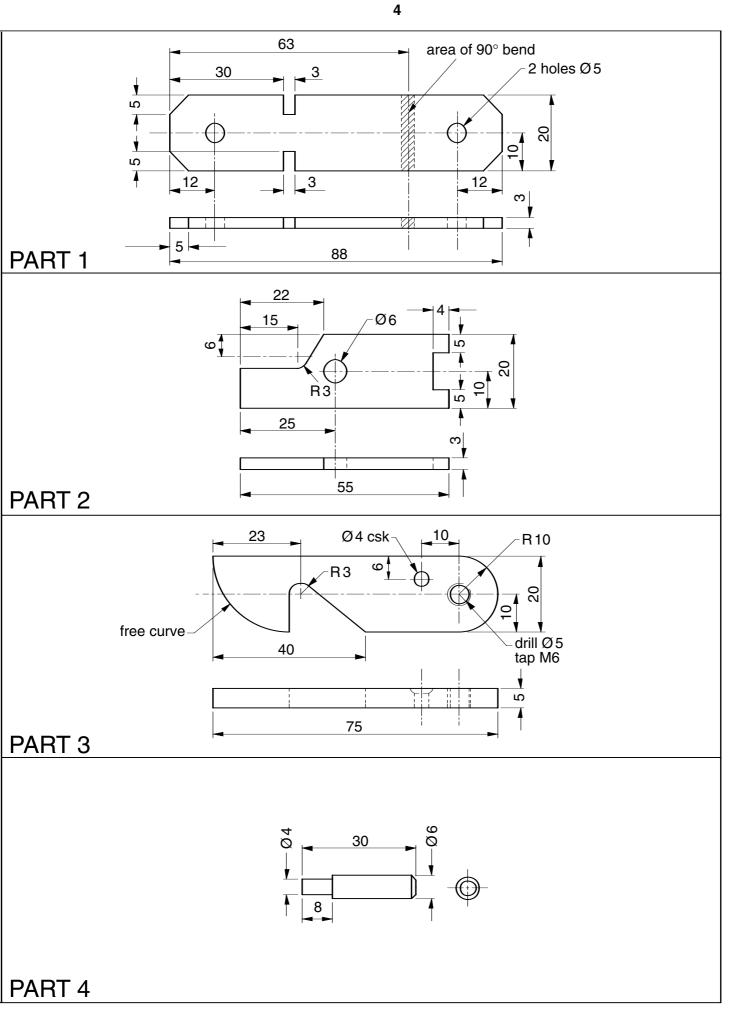

Working Procedures

- A Part 1 is bent to 90° as shown using the former provided.
- B Part 1 is silver soldered to Part 2 and the joint filed flat.
- C Part 4 is riveted to Part 3 and filed flat.
- D The nut is used to lock the screw into Part 3 so that the screw can turn in Part 2.
- E It will be necessary to 'ease' edge **X** on Part 2 to allow Part 4 to move freely.

General Notes

- A second supply of material is **not** allowed. If you make a mistake do your best to work as near to the dimensions given in the drawing as possible.
- Any dimensions omitted are left to your discretion.
- Attempt to complete all the work but remember that a partly completed piece of work of good quality may gain more marks than one which is complete but inaccurate or poorly finished.
- Clean up all parts by draw filing. Emery cloth or similar must **not** be used.
- Write your name and examination number on the labels supplied, attach one to your work and the other to the bag in which your work is enclosed. Put into the bag all worked and unworked materials, with the exception of waste.
