Notes

Working Procedures

- A Part 5 should be shaped so that it is comfortable to hold.
- B After shaping, Part 5 is silver soldered to Part 3.
- C Part 4 is riveted into Part 2 and the joint filed flat.
- D Part 6 should be bent to 90° on the line shown using the former provided. The end with the 12 mm square hole should be held in the vice against the former.

General Notes

- A second supply of material is **not** allowed. If you make a mistake do your best to work as near to the dimensions given in the drawing as possible.
- Any dimensions omitted are left to your discretion.
- Attempt to complete all the work but remember that a partly completed piece of work of good quality may gain more marks than one which is complete but inaccurate or poorly finished.
- Clean up all parts by draw filing. Emery cloth or similar must **not** be used.
- Write your **name and examination number** on the labels supplied, attach **one** to your work and **the other** to the bag in which your work is enclosed. Put into the bag all worked and unworked materials, with the exception of waste.
