## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Ordinary Level

## MARK SCHEME for the May/June 2012 question paper for the guidance of teachers

## **5054 PHYSICS**

5054/41

Paper 4 (Alternative to Practical), maximum raw mark 30

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

		GCE O LEVEL – May/June 2012 5054	41	
1	(a) (i)	to secure the end/prevent slipping/original length doesn't change/ give a strong grip on the wire	B1	[1]
	(ii)	breaking wire is hazard/damages eye	B1	[1]
	(b) (i)	increase in length (from original length)	B1	[1]
	(ii)	(longer length) increases the extension	B1	[1]
	(iii)	for movement of marker (as wire extends)	B1	[1]
	(c) (i)	50.3 (cm) cao	B1	[1]
	(ii)	to tension wire/remove kinks/wire straight	B1	[1]
	(iii)	distance between marker and ruler/marker edge not vertical/ difficult to view from above		
		difficult to view from above	B1	[1]
	(iv)	larger marker/raise ruler/use of set-square described or drawn	B1	[1]
	(d) (i)	axes: correct way round, labelled quantity and unit y: 2cm ≡ 5mm x: 2cm ≡ 5N	B1	
		scales: more than ½ page, sensible	B1	
		points plotted accurately	B1	
		best fit straight line neatly drawn	B1	[4]
	(ii)	directly proportional only if line within 1 sq of (0,0)/linear if not through (0,0)	B1	[1]
		re breaks/no longer linear/marker creep/load hits floor/plastic extension, formed	/permane B1	ently [1]

Mark Scheme: Teachers' version

Syllabus

	Page 3		3	Mark Scheme: Teachers' version	Syllabus	Paper	,				
				GCE O LEVEL – May/June 2012	5054	41					
2	(a)	(i)	0.02	2 and 0.033 (m) ± 0.001		B1	[1]				
		(ii)	9.16	7/9.17 seen		C1					
			9.2 (	$(m/s^2)$ ecf (a)		A1	[2]				
	(b)	comparison required plus explanation e.g. too small plus friction on tape through timer/air resistance/person holding tape slows down									
		allo	w ecf	e.g. too big plus faulty timer/weight swings/slack in tap	pe at start	B1	[1]				
				[Tota	l: 4]						
3	(a)	wa	x melt	ts and pea falls off		B1	[1]				
	(b)	half of the half o									
	(c)	pea	a falls	off first		B1	[1]				
	(d)	cre pea car									
		can time peas falling off can plot graph (distance against time)				B1	[1]				
						[Tota	l: 5]				
4	(a)	(i)	ray o	drawn through M₁ and M₂ to block		B1	[1]				
		(ii)	ray o	completed accurately through block		B1	[1]				
		(iii)	28° :	± 2°		B1	[1]				
	(b)	incı	rease	s angle of incidence described		B1					
		unt	il eme	ergent ray along surface (described or drawn)		B1	[2]				
	(c)	ray	not a	long normal/not to middle of diameter/refracted on ent	ry	B1	[1]
