CAMBRIDGE INTERNATIONAL EXAMINATIONS GCE Ordinary Level

MARK SCHEME for the May/June 2013 series

5054 PHYSICS

5054/31

Paper 3 (Practical Test), maximum raw mark 30

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Page 2	Mark Scheme	Syllabus	Paper
	GCE O LEVEL – May/June 2013	5054	31

Section A

1	(a)	<i>l</i> , <i>w</i> and <i>T</i> all sensible (73 mm < l < 79 mm, 22 mm < <i>w</i> < 28 mm and	
		9 mm < T < 16 mm) measured to the nearest mm with unit seen somewhere.	B1

Measurements of *l*, *w* and *T* all repeated.

(b) *M* with unit and correct calculation of density with unit.*M* to be in one of the ranges below, depending on the thickness of the stack.

T / mm	Minimum <i>M</i> / g	Maximum <i>M</i> / g
10	43	51
11	49	55
12	52	60
13	57	65
14	60	69
15	64	76

(c) (ii) Number of slides correctly calculated from *M* / *m* and from *T* / *t* with working clear. (Allow non-integer values)

(iii) Possible comments, for example:

Values should be integers so all slides not identical if ratios are not integers / Ratios should give same answer even if slides are not identical (because mass proportional to thickness) / Not integers because of errors in the measurements / Are integers, so slides in the stack are the same as the single slide / Tape does not have the same effect on the mass and the thickness. A1

Section B

4 Preliminary Results

(a) l in the range 1.5 cm to 3.0 cm, measured to the nearest mm with unit.	B1	
(b) $p > y$ with units seen somewhere in (b).	B1	
	<i>L</i> < <i>p</i> with at least 2 measurements to the nearest mm. (Apply units penalty once only in (a) and (b))	B1	
(c) (i) Correct x.	M1	
	(ii) Correct calculation of <i>F</i> in the range 0.39 N to 0.59 N with unit.	A1	[5]
<u>Ta</u>	able		
(d) Table with units for <i>M</i> , <i>y</i> , <i>p</i> , <i>L</i> , <i>x</i> and <i>F</i> .	B1	
	y, p, L and x increase as M increases for all readings with a minimum of 4 readings.	B1	
	A minimum of two correct <i>F</i> values.	B1	
	A minimum of four correct <i>F</i> values.	B1	[4]

Correct *F* values are in the ranges specified below for each *M*.

<i>M</i> / g	Minimum F / N	Maximum F / N
100	0.44	0.54
200	0.88	1.08
300	1.32	1.62
400	1.76	2.16
500	2.20	2.70
600	2.64	3.24
