

Mark Scheme (Results)

January 2009

GCE

GCE O level Physics
7540/02

Question	Acceptable Answers Graduate	Reject	Mark
1(a)(i)	mass x velocity / mv / <i>product of mass and/with/into velocity</i>	mass x speed/weight x speed/ weight x velocity	(1)
Question	Acceptable Answers Graduate	Reject	Mark
1(a)(ii)	energy possessed by a moving body/ $\frac{1}{2}mv^2$	ignore $\frac{1}{2}mv$	(1)
Question	Acceptable Answers Graduate	Reject	Mark
1(a)(iii)	energy due to position/height/ mgh		(1)
Question	Acceptable Answers expert	Reject	Mark
1(b)	$((0.30 + 1.2) \div 2) \times 0.20$ = 0.15 m UP Allow equations of motion with correct solutions	$0.9 \times .2 = .18$	(1) (1)
Question	Acceptable Answers expert	Reject	Mark
1(c)	$0.02 \times 1.2 = (0.024)$ (kgm/s) $0.024 = (0.02 + 0.01) \times v$ $v = 0.024 / 0.03 (= 0.80 \text{ m/s})$ Allow working in cm for three marks	$0.2 \times 1.2 = (0.01 + 0.02) v$	(1) (1) (1)
Question	Acceptable Answers expert	Reject	Mark
1(d)(i)	$= \frac{1}{2} \times 0.03 \times 0.80^2$ = 0.0096 J UP once for J	$= \frac{1}{2} \times 0.3 \times 0.80^2$ = 0.096 J separate calculations for KE of each ball	(1) (1)
Question	Acceptable Answers expert	Reject	Mark
1(d)(ii)	same (as (i))/ 0.0096 J UP unless penalised in (i) ecf	$0.0096 = 0.03 \times 10 \times h$	(1)
Question	Acceptable Answers expert	Reject	Mark
1(d)(iii)	$0.0096 = 0.03 \times 10 \times h$ ecf <i>from d(ii)</i> $h = 0.032 \text{ m}$ UP allow $0.096(\text{from d(ii)})=0.3(\text{from d(i)} \times 10 \times h = 0.032 \text{ m}$ Allow use of $v^2=u^2+2as = 0.032 \text{ m}$ accept correct solution if seen in d(ii)	$.0096 = .03 \times h = .32 \text{ m}$ does not score	(1) (1)
Question	Acceptable Answers Graduate	Reject	Mark
1(e)(i)	ball rotates tape would slow down/change speed of ball /wrap round ball/friction can't fasten tape to ball Mark as a whole	effect after collision	max (2)
Question	Acceptable Answers Graduate	Reject	Mark
1(e)(ii)	light gate (+ ruler) light sensor (multi)flash photography (+ ruler)	datalogger/timer without light gate stopwatch and ruler	max (1)
Question	Acceptable Answers Graduate	Reject	Mark
1(f)(i)	point/place/position through which weight/force of gravity (or mass) of a body acts	The force which acts through the centre of gravity point where it balances	(1)

Question	Acceptable Answers general	Reject	Mark
1(f)(ii)	<p>G must be shown at crossing point of two lines corner to corner as below accept a dot at crossing point with G near or an arrow labelled G pointing at crossing point</p> 	<p>A dot without label G G without unambiguous indication of the point</p>	(1)
	<p>accept lines from centre of sides as below</p> 		
	<p>Accept partial lines that would come from both corners</p> 		

Question	Acceptable Answers Graduate	Reject	Mark
1(f)(iii)	<p>G not outside base (vertical through) (sum) of ACW greater than (sum) of CWM G is to the left of point touching floor</p>	<p>collision force not big enough greater mass on the bottom base is wide stable (equilibrium)</p>	(1)

Question	Acceptable Answers Graduate	Reject	Mark
----------	-----------------------------	--------	------

1(f)(iv)	ball <u>higher</u> up slope higher <u>initial</u> speed of ball (apply) (larger) initial force on ball use heavier ball for B	steeper slope bigger slope longer slope higher slope making the block narrower hit it more than once force applied all along the slope	max (1)
----------	--	--	------------

Question	Acceptable Answers Graduate	Reject	Mark
2(a)(i)	Advantage: quicker <u>conductor</u> better <u>conductor</u> <u>conducts</u> (heat) more easily Absorbs less heat	Advantage (more) even heating anything about pressure quicker rise of water without mention of conduction	(1)
	Disadvantage: breaks easily /less robust	disadvantage heat conducted more quickly (more) heat lost not reliable enough	(1)

Question	Acceptable Answers expert	Reject	Mark
2(a)(ii)	anomalous/uneven expansion of water/ unusual nature of water	denser water at bottom water will freeze at 0°C it will not be accurate	(1)
	between 0°C and 4°C/below 4°C		(1)
	liquid moves down (as temp rises from 0°C to 4°C)/ water contracts <u>ora</u> /same height for two temps possible		(1)

Question	Acceptable Answers expert	Reject	Mark
2(b)	28°C - 25°C = 3°C		(1)
	0.400 x 4200 x candidates temperature		(1)
	= 5040 J UP		(1)

Question	Acceptable Answers expert	Reject	Mark
2(c)(i)	<u>upward</u> sloping line all below first line	explanation using anomalous expansion	(1)
	curve levelling off (<i>ignore starting point of candidate's line</i>)		(1)
	compressing air/greater pressure above water (independent of line)		(1)

Question	Acceptable Answers Graduate	Reject	Mark
2(c)(ii)	vacuum (above Hg) allow no air allow gas at low pressure/ calibrated after manufacture	density of Hg > H2O Hg expands less than H2O Higher boiling point	(1)

Question	Acceptable Answers expert	Reject	Mark
2(d)(i)	0.03 × 1000 × 10	0.03 × 1000 = 30 Pa	(1)
	= 300 Pa (294.3/294) (N/m ²) UP	0.3 × 1000 × 10 = 3000 Pa	(1)

Question	Acceptable Answers expert	Reject	Mark
2(d)(ii)	(100 000 + 300) = 100 300 Pa ecf	pressure at Z = pressure at X	(1)

	pressure at Z = pressure at Y/ pressure is atmospheric <u>plus</u> pressure of water only UP once for Pa in (i) or (ii)	pressure at Z = atmospheric Forces no atmospheric pressure at X	(1)
--	--	---	-----

Question	Acceptable Answers expert	Reject	Mark
2(e)	water : close (packed)/ touching /little space air : far apart water : slide over each other/move around (within body of liquid) air : random / very high speed (Marked as one item award marks where seen)	More than solid but less than gas ignore vibrate/random	(1) (1) (1) (1)

Question	Acceptable Answers Graduate	Reject	Mark
3(a)(i)	720/240 = 3 A UP allow one mark for 3 with no working shown allow both marks for 3A with no working shown Allow calculation of energy, charge transferred in 30m hence current = 3A		(1) (1)

Question	Acceptable Answers expert	Reject	Mark
3(a)(ii)	720 x 30 x 60 = 1 296 000 J /1.3MJ UP or 0.72 x 0.5 = 0.36 kWh UP allow 360 Wh	1.3 mJ as UP	(1) (1) (1)

Question	Acceptable Answers expert	Reject	Mark
3(a)(iii)	29 000 000 x 0.35 = 10 150 000 J UP once only for J in (ii) and (iii)		(1)

Question	Acceptable Answers expert	Reject	Mark
3(a)(iv)	1 296 000 / 10 150 000 (x 100) = 0.128 or 12.8% (allow 0.13/ 13%/ 0.127/ 12.7% and do not penalise excessive sig figs ie 0.127684729) ecf allowed from (ii) and (iii) provided efficiency < or = to 100% and both values in same units (J or kWh)		(1) (1)

Question	Acceptable Answers Graduate	Reject	Mark
3(b)(i)	720 (W) no loss of energy/ energy out = energy in / 100% efficient/ no heat produced or lost/ no magnetic (flux) leakage <i>independent of numeric answer</i>		(1) (1)

Question	Acceptable Answers Graduate	Reject	Mark
3(b)(ii)	720 / 12 60 A UP		(1) (1)

Question	Acceptable Answers expert	Reject	Mark
3(b)(iii)	2400/N _s = 240 / 12- correct use of equation N _s = 2400 x 12 / 240 correct rearrangement = 120 (turns) no UP correct answer or turns ratio = 12/240 = (0.05) turns on secondary = 0.05 x 2400 = 120 (turns)		(1) (1) (1)

Question	Acceptable Answers Graduate	Reject	Mark
3(c)(i)	rectifier / allows current (to flow) in (only) one direction / very high resistance when reversed (bias) owtte	<u>changes</u> direction	(1)

Question	Acceptable Answers expert	Reject	Mark
3(c)(ii)	axes labelled voltage and time /V and t (correct orientation and labels seen in (ii) or (iii)) two complete waves symmetrical by eye about time axis <i>independent marks</i>		(1) (1)

Question	Acceptable Answers expert	Reject	Mark
3(c)(iii)	-correct half wave rectification (hump- line twice or line- hump twice; either + or) -humps same size as in (ii) by eye award second mark if full wave shown or if only one wave shown in (ii)		(1) (1)

Question	Acceptable Answers Graduate	Reject	Mark
4(a)(i)	change of direction of light or waves / bending of light or waves	Dispersion/ splitting of light	(1)

Question	Acceptable Answers Graduate	Reject	Mark
4(a)(ii)	<u>change of speed</u> slows down on entry speeds up on leaving accept (optically) less dense to more dense and more (optically) dense to less dense or lower RI to higher RI and Higher RI to lower RI for second and third marks		(1) (1) (1)

Question	Acceptable Answers Graduate	Reject	Mark
4(a)(iii)	(centre of) <u>objective</u> lens to image <u>parallel</u> light focussed at focal point / focal distance / focal plane	6.4 cm	(1) (1)

Question	Acceptable Answers Graduate	Reject	Mark
4(a)(iv)	real where rays meet / could see on a screen / inverted/ opposite side of lens dop		(1) (1)

Question	Acceptable Answers Graduate	Reject	Mark
4(a)(v)	inverted/ upside down ray from top of object enters eye at bottom / magnifying glass does not (further) invert an image dop	magnifying glass forms an inverted image	(1) (1)

Question	Acceptable Answers expert	Reject	Mark
4(b)(i)	Both correct labels (focal length and mag) Both correct units plot (-1 each incorrect ± 1 mm or outside grid) smooth curve	joining the dots	(1) (1) (2) (1)

Question	Acceptable Answers expert	Reject	Mark
4(b)(ii)	17-19 mm UP		(1)

Question	Acceptable Answers expert	Reject	Mark
4(b)(iii)	line across and / or down (not just a dot) at correct place		(1)

Question	Acceptable Answers expert	Reject	Mark																																								
4(b)(iv)	choice of suitable pair of values from table below (must be seen) fe x magnification (<i>rearrangement</i>) = 900 mm UP or 910 mm UP <table style="margin-left: 20px;"> <tr> <td>Fe</td> <td></td> <td>Mag</td> <td></td> <td></td> </tr> <tr> <td>5</td> <td>x</td> <td>180</td> <td>=</td> <td>900</td> </tr> <tr> <td>10</td> <td>x</td> <td>90</td> <td>=</td> <td>900</td> </tr> <tr> <td>15</td> <td>x</td> <td>60</td> <td>=</td> <td>900</td> </tr> <tr> <td>20</td> <td>x</td> <td>45</td> <td>=</td> <td>900</td> </tr> <tr> <td>25</td> <td>x</td> <td>36</td> <td>=</td> <td>900</td> </tr> <tr> <td>30</td> <td>x</td> <td>30</td> <td>=</td> <td>900</td> </tr> <tr> <td>35</td> <td>x</td> <td>26</td> <td>=</td> <td>910</td> </tr> </table>	Fe		Mag			5	x	180	=	900	10	x	90	=	900	15	x	60	=	900	20	x	45	=	900	25	x	36	=	900	30	x	30	=	900	35	x	26	=	910		(1) (1) (1)
Fe		Mag																																									
5	x	180	=	900																																							
10	x	90	=	900																																							
15	x	60	=	900																																							
20	x	45	=	900																																							
25	x	36	=	900																																							
30	x	30	=	900																																							
35	x	26	=	910																																							

Question	Acceptable Answers expert	Reject	Mark
5(a)(i)	magnetic field/ lines /flux (of magnet) <u>cut</u> by (wires in) coil	charges cutting current Changing field	(1) (1)

Question	Acceptable Answers expert	Reject	Mark
5(a)(ii)	opposite/different poles / N then S poles / flux cut in opposite directions/field reverses	charges	(1)

Question	Acceptable Answers Graduate	Reject	Mark
5(a)(iii)	8 / 0.025 or 0.08 / 0.025 = 320 cm/s or 3.2 m/s 0.32 cm/ms UP	320 m/s	(1) (1)

Question	Acceptable Answers general	Reject	Mark
5(b)(i)	ruler / metre rule / metre stick/ measuring tape / distance scale	tape scale	(1)

Question	Acceptable Answers Graduate	Reject	Mark
5(b)(ii)	1. height / distance from drop point to coil 2. length of <u>magnet</u> 3. time <u>between peaks</u>	EMF	(1) (1) (1)

Question	Acceptable Answers expert	Reject	Mark
5(b)(iii)	1. Turn on recorder 2. measure height (of magnet to coil) 3. release magnet 4. note time 5. Calculate speed 6. repeat for same height 7. repeat for different heights any 5 five points Max 5		(1) (1) (1) (1) (1) (1) (1) Max (5)

Question	Acceptable Answers expert	Reject	Mark
5(b)(iv)	Height and time seen suitable units all columns dop Ignore additional columns with correct units eg Length of magnet / cm or m and / or speed m/s.		(1) (1)

Question	Acceptable Answers expert	Reject	Mark
5(b)(v)	axes labelled height and speed line or curve from origin - speed rising		(1) (1)

Question	Acceptable Answers Expert	Reject	Mark
5(c)	any pair from taller/higher/greater amplitude greater rate of cutting (of lines)/larger emf/ faster movement of magnet or narrower/steeper magnet moving faster or allow closer together magnet moving faster ALL reasons dependent on first mark	they would increase	 (1) (1) (1) (1) (1)
