MARK SCHEME for the October/November 2009 question paper

for the guidance of teachers

5125 SCIENCE (PHYSICS AND BIOLOGY)

5125/02

Paper 2 (Theory – Physics), maximum raw mark 65

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 2	Mark Scheme: Teachers' version	Syllabus	Paper	
		GCE O LEVEL – October/November 2009	5125	02	
		Section A			
1	(a) use of gr 1.6 (m/s ²	radient of graph(1) ²)(1)			[2]
	(b) use of W 0.8 (N) C	/ = mg (1) DR 0.5 × their (a) (1)			[2]
	(c) use of ar 0.8 (m)	rea under the graph OR ave. speed × time(1) (1)			[2]
				[Tota	l: 6]
2	(a) microme	eter (screw gauge) / <u>vernier</u> callipers			[1]
	(b) use of m use of 27 203 / 202	n = VD (1) 7 (cm³) as the volume (1) 2.5 (g) (1)			[3]
				[Tota	l: 4]
3	moment calc equating mor	culated as 330 (Ncm) (1) ments (1)			[2]
	220 (11) (1)			[Tota	[3] I: 3]
4	(a) (i) kine	tic / movement / mechanical to electrical (1)			
	(ii) elec	etrical to light (1)			[2]
	(b) p.e. / wo 3.0 (1)	ork done per second = mgh ÷ t (1)			[2]
				[Tota	l: 4]
5	(a) 1. great more	t (er) amount of mercury (1) e movement per degree / greater sensitivity (1)			[2]
	2. faste faste	er conduction of heat (1) er response (1)			[2]
	(b) high / ve changing	ery low temperatures OR temperatures at a point(1) g temperatures(1)			
	(allow re	mote reading or little absorption of heat for 1 mark if 2	marks not score	d above)	[2]
				[Tota	l: 6]

				GCE O LEVEL – October/November 2009	5125	02	
				Section B			
11	(a)	circuit containing a power supply, wire, ammeter in series AND a voltmeter in parallel ac the wire (1)					
		means of varying the p.d. / current e.g. rheostat, variable resistor or variable power supposed p.d. and measure current and voltage (1)				ower supply (1)	
		chan	ge tl	ne p.d. and repeat the measurement a number of time	s (1)	[5]	
	(b)	axes straiç	labe ght li	elled with units (1) ne through the origin (1)		[2]	
	(c)	steep OR le	steeper line if I is the y-axis OR less steep line if V is the y-axis (1)				
		so gr	reate	er current for a given voltage (1)		[3]	
						[Total: 10]	
12	(a)	place place mark move join t	e the e a p the the d he d	magnet on a sheet of paper and draw round it (1) lotting compass near the magnet (1) position of both ends of the plotting compass (1) plotting compass and repeat (1) ots (1)	compass used t	o find the	
		direction)			[5]		
	(b)	(i) <u>s</u>	steel	bar placed inside coil and d.c. passed through coil (1)		
		(ii) ((magı (slow (this	net placed inside coil with a.c in coil (1) /ly) decrease current / remove magnet (1) mark is dependant upon the previous mark being gair	ed)	[3]	
	(c)	iron is easily magnetised / makes a strong electromagnet (1) easily loses its magnetism (when current switched off) (1)		[2]			
						[Total: 10]	
13	(a)	 (a) method of heating ends of metal equally (1) method of detecting if the metal is heated (1) observe each for the same time (1) observe what has happened with each rod (1) 					
	identify which shows better conduction (1)					[5]	
	(b)	by molecular / particle vibration (1) energy is passed from particle to particle along the rod (1)			[2]		
	(c)	(i)	ess	heat loss by conduction and convection (1)			
		(ii) ł	blacł so (n	t is a good absorber of radiation (1) nore) rapid heating of the water (1)		[3]	
						[Total: 10]
