NATIONAL<br>QUALIFICATIONS<br>THURSDAY, 3 MAY<br>$2.45 \mathrm{PM}-4.05 \mathrm{PM}$

# MATHEMATICS <br> STANDARD GRADE <br> Credit Level <br> Paper 2 

1 You may use a calculator.
2 Answer as many questions as you can.
3 Full credit will be given only where the solution contains appropriate working.
4 Square-ruled paper is provided.

## FORMULAE LIST

The roots of $a x^{2}+b x+c=0$ are $x=\frac{-b \pm \sqrt{\left(b^{2}-4 a c\right)}}{2 a}$
Sine rule: $\frac{a}{\sin \mathrm{~A}}=\frac{b}{\sin \mathrm{~B}}=\frac{c}{\sin \mathrm{C}}$

Cosine rule: $a^{2}=b^{2}+c^{2}-2 b c \cos \mathrm{~A}$ or $\cos \mathrm{A}=\frac{b^{2}+c^{2}-a^{2}}{2 b c}$

Area of a triangle: $\quad$ Area $=\frac{1}{2} a b \sin \mathrm{C}$

Standard deviation: $s=\sqrt{\frac{\sum(x-\bar{x})^{2}}{n-1}}=\sqrt{\frac{\sum x^{2}-\left(\sum x\right)^{2} / n}{n-1}}$, where $n$ is the sample size.

1. Alistair buys an antique chair for $£ 600$.

It is expected to increase in value at the rate of $4.5 \%$ each year.
How much is it expected to be worth in 3 years?
2. Solve the equation

$$
3 x^{2}-2 x-10=0
$$

Give your answer correct to 2 significant figures.
3. (a) During his lunch hour, Luke records the number of birds that visit his bird-table.

The numbers recorded last week were:

$$
\begin{array}{lllllll}
28 & 32 & 14 & 19 & 18 & 26 & 31 .
\end{array}
$$

Find the mean and standard deviation for this data.
(b) Over the same period, Luke's friend, Erin also recorded the number of birds visiting her bird-table.
Erin's recordings have a mean of 25 and a standard deviation of 5 .
Make two valid comparisons between the friends' recordings.
4. Solve the inequality

$$
\frac{x}{4}-\frac{1}{2}<5 .
$$

5. Mark takes some friends out for a meal.

The restaurant adds a $10 \%$ service charge to the price of the meal.
The total bill is $£ 148 \cdot 50$.
What was the price of the meal?
6. Brunton is 30 kilometres due North of Appleton.

From Appleton, the bearing of Carlton is $065^{\circ}$.
From Brunton, the bearing of Carlton is $153^{\circ}$.

Calculate the distance between Brunton and Carlton.
7. A fan has four identical plastic blades.

Each blade is a sector of a circle of radius 5 centimetres.
The angle at the centre of each sector is $64^{\circ}$.
Calculate the total area of plastic required to make the blades.
8. In triangle PQR :

- $\mathrm{QR}=6$ centimetres
- angle $\mathrm{PQR}=30^{\circ}$
- area of triangle $\mathrm{PQR}=15$ square centimetres.

Calculate the length of PQ .
9. To make " 14 carat" gold, copper and pure gold are mixed in the ratio 5:7. A jeweller has 160 grams of copper and 245 grams of pure gold.

What is the maximum weight of " 14 carat" gold that the jeweller can make?
10. Solve algebraically the equation

$$
5 \cos x^{\circ}+4=0, \quad 0 \leq x<360 .
$$

11. (a) A decorator's logo is rectangular and measures 10 centimetres by 6 centimetres.

It consists of three rectangles: one red, one yellow and one blue.

The yellow rectangle measures 10 centimetres by $x$ centimetres.
The width of the red rectangle is $x$ centimetres.
Show that the area, A, of the blue rectangle is given by the expression

$$
\mathrm{A}=x^{2}-16 x+60
$$

(b) The area of the blue rectangle is equal to $\frac{1}{5}$ of the total area of the logo. Calculate the value of $x$.
12. (a) A cylindrical paperweight of radius 3 centimetres and height 4 centimetres is filled with sand.

Calculate the volume of sand in the paperweight.
(b) Another paperweight, in the shape of a hemisphere, is filled with sand.

It contains the same volume of sand as the first paperweight.
Calculate the radius of the hemisphere.
[The volume of a hemisphere with radius $r$ is given by the formula, $\left.V=\frac{2}{3} \pi r^{3}\right]$.
13. The profit made by a publishing company of a magazine is calculated by the formula

$$
y=4 x(140-x),
$$

where $y$ is the profit (in pounds) and $x$ is the selling price (in pence) of the magazine.

The graph below represents the profit $y$ against the selling price $x$.

Find the maximum profit the company can make from the sale of the magazine.
