Additional points for guidance

In submitting Music with Technology folios, separate submissions should be made for each candidate and should be clearly labelled with the candidate's name.

If centres choose to submit a CD with the work of several candidates, with tracks carefully labelled and named, this is considered acceptable. Submitting an audio cassette of recordings may not show candidate work to full advantage and runs the risk of potential confusion when trying to ascertain the location of each candidate's work.

If adopting the above approach with CDs, centres are advised to submit a different CD for each level being presented (and each area of Technology, ie MIDI Sequencing only or Sound Engineering and Production only).

Where the term 'tracks' is used in Sound Engineering and Production Course and Units, centres should be aware that several microphones used for one instrument equals one track when considering the requirements at each level. Examples include a drum kit recorded with multiple microphones which would only count as one 'track' where the requirements at Higher level are for 'five or more tracks and at least one of the tracks in each piece must use a microphone'. Similarly a recording of a piano using two microphones would count as one 'track'.
