Information Sheet Q2

Karen has completed her sixth year and has recently left school. She has gained a group of qualifications and particularly enjoyed her geography and modern studies classes. Over the last year, she has had a part-time job in her local mountaineering shop. She has always been adventurous and was very interested in an article she read recently in her local newspaper. She liked the idea of travel and wondered if she could combine this with working abroad.

This article is reproduced below.

Scots love to explore

Record numbers of Scots are shunning package holidays for adventure tours.

Of the Scots questioned, 84% said holidays should be about exploration, while 31% had travelled recently to at least 4 different countries. The majority felt that travel should be a personal development opportunity as well as a physical journey.

Do you have a burning desire to push back the frontiers of exploration, too?

After reading this article, Karen decides to go off on a gap year. She already has some money saved, and plans to spend the first 6 months working at an Alpine holiday resort. Following this, she would like to see as much of the world as she can afford.

She hopes this experience will help her decide on a future career from areas such as: map production, weather forecasting, conservation, travel and tourism.

Information Sheet Q3

You are the leader of your local youth club.

Recently, there have been problems in the community when litter bins in the park were set on fire. This made you very aware that sometimes all young people get a bad name when something like this happens. Everyone in the youth club thinks this is unfair. So, as a group, you decide to do something to improve the image of young people in the community.

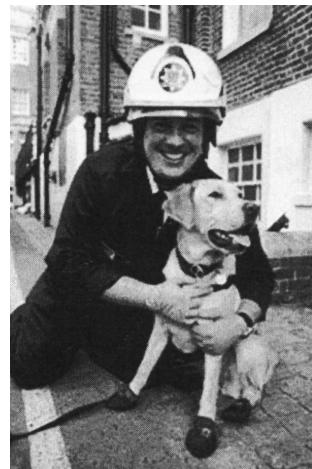

You have read the newspaper article below and decide to raise money towards a “hot dog” for your community.

“Hot Dogs” investigate fires

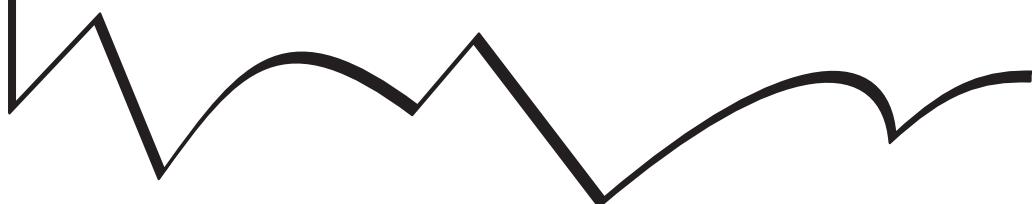

Two new fire investigation dogs are now sniffing out fire crime. Next year, they will be part of a dedicated dog team being developed that will support the investigation of arson all over London, 24 hours a day, seven days a week.

Roscoe, an English springer spaniel and Sapphire, a labrador, have now completed an extensive training programme and the latest recruits to the Brigade’s Fire Investigation team have already been sent to incidents with their new handlers.

The dogs’ training has enabled them to enter a fire scene and detect whether accelerants, such as petrol, have been used.

Station Officer Mat Rosendale with Sapphire, the new fire investigation dog.

It is your responsibility as **leader of the youth club** to make sure everyone works well together to raise money successfully.
