FORM 1 ENGLISH TIME: 15 minutes LISTENING COMPREHENSION

# Teacher's Paper Instructions for the conduct of the Listening Comprehension Examination

The teacher should instruct the candidates to answer the questions on the paper provided. The following procedure for reading the Listening Comprehension passage is to be explained to the candidates immediately before proceeding with the examination.

You have been given a sheet containing the Listening Comprehension questions. You will be given three minutes to read the questions based on the passage. I shall then read the passage at normal reading speed. You may take notes during the reading. After this reading there will be a pause of another three minutes to allow you to answer some of the questions. The passage will be read a second time and you may take further notes and answer the rest of the questions. After this second reading you will be given a further three minutes for a final revision of the answers.

- a. 3 minutes Students read questions.
- b. 3 minutes Teacher reads passage aloud for the first time while students take notes.
- c. 3 minutes Students answer questions.
- d. 3 minutes Teacher reads passage for the second time. Students may answer more questions.
- e. 3 minutes Students revise final answers.

#### You are going to listen to Kim Smith talking about London's Tower Bridge.

London's Tower Bridge is one of the most famous bridges in the world. It was designed so that it would be in harmony with the nearby Tower of London.

Plans for Tower Bridge were made in 1876 when the east of London became extremely crowded and a bridge across the Thames in that area of the city seemed necessary. It took another eight years - and lots of discussions about the design - before they started building the bridge.

The bridge was completed in 1894. The 265-metre long bridge was constructed by 450 workers. 11,000 tons of steel were used to build the framework. At first many people disliked its design, but over time the bridge became one of London's most famous landmarks.

Since it is near the harbour and it is close to the sea, the bridge had to be made in such a way that it would allow the passage of large ships. Therefore, the designers decided to create a moveable bridge which could be opened to accommodate boat traffic. The mechanism to open the bridge is hidden in the two towers. Steam power was used until 1976, when the mechanism started to work by electricity.

The bridge used to open almost 50 times a day, for ships to pass, but nowadays it is only raised about 1,000 times a year. The bridge's website notifies visitors when the bridge is going to be raised or lowered.

Taking photographs of Tower Bridge is a favourite London tourist activity, but you can also go inside the bridge, where you'll have a magnificent view over London from the walkway between the two bridge towers.

Inside the bridge you can also visit the Tower Bridge Exhibition, a display area that includes the walkway and the two famous towers where you can observe the Victorian engine room. Visitors can learn about the history of the bridge through photos, films and other media.

At present the bridge is undergoing a renovation project that should be completed by the end of this year.

## ENGLISH LANGUAGE COMPREHENSION TEXTS

#### **SECTION B – READING COMPREHENSION**

Read the following text and then answer the questions on the Language Paper.

### **History of the Pencil**

Pencils are found everywhere... except a sharpened <u>one</u> when <u>you</u> need it! As pencils are so useful and so commonly used in daily life, they are taken for granted. And yet, it is a fact that pencils are one of the greatest inventions of all times.

The history of the pencil starts with a thunderstorm. After a violent storm struck the Lake District in north-west England in the sixteenth century, the local people discovered a large uprooted tree. Under the tree was an unknown black substance. This rock-like substance broke easily, was slightly shiny and smooth to the touch and it left a black mark on the hands of all those who touched it.

At first, the local farmers used the newly discovered substance to mark <u>their</u> sheep. Other people quickly realised that they could use <u>it</u> to write on paper. However, it was messy and soft. To use it with paper, people wrapped a thin stick of the substance in stiff sheepskin or rope. Later, people called this substance 'graphite'.

The Italians were the first to invent a wooden covering to hold a thin stick of graphite firmly in place to make writing easy. Italian craftsmen hollowed out two small pieces of wood and then they placed the stick of graphite in one of the **hollows**. They then glued the two pieces of wood together. When dry, it formed what today we know as a pencil. The Germans developed this idea further. In fact, the first **mass-produced** pencils were produced in Nuremberg, Germany, in 1662.

The first mass-produced pencils were not painted, to show off the high-quality wood covering. But by the 1890s, many pencil makers started painting pencils and printing brand names on them. There is an interesting story about how the familiar yellow pencil came to be. Pencils have been painted yellow ever since the 1890s. And that bright colour is not just so you can find them on your desk more easily! During the 1800s, the best graphite in the world came from China. Pencil makers wanted a special way to tell people that their pencils contained Chinese graphite. In China, the colour yellow is associated with royalty and respect. Pencil makers began painting their pencils bright yellow to suggest this "royal" feeling and association with China. However, nowadays, yellow pencils have become very common and they do not remind us of kings and queens.

# PART I – POETRY: Unprepared Text Read the poem and answer all the questions below.

#### **SUMMER GOES**

Summer goes, summer goes Like the sand between my toes When the waves go out, That's how summer pulls away,

- Leaves me standing here today, Waiting for the school bus.
  - Summer brought, summer brought All the frogs that I have caught, Frogging at the pond,
- Hot dogs, flowers, shells and rocks,
   Postcards in my postcard box –
   Places far away.

- Summer took, summer took
  All the lessons in my book,
- 15 Blew them far away.

  I forgot the things I knew –
  Arithmetic and spelling too,
  Never thought about them.
- Summer's gone, summer's gone –
  20 Autumn and winter coming on,
  Frosty in the morning.
  Here's the school bus right on time.
  I'm not really sad that I'm
  Going back to school.

Russell Hoban

## PART II – PROSE: Unprepared Text Read the following passage and answer all the questions below.

And now a queer thing happened to him. Billy was in the act of stepping back and turning away from the window when all at once his eye was caught and held in the most peculiar manner by the small notice that was there. BED AND BREAKFAST, it said. BED AND BREAKFAST, BED AND BREAKFAST, Each word was like a large black eye staring at him through the glass, holding him, compelling him, forcing him to stay where he was and not to walk away from that house, and the next thing he knew, he was actually moving across from the window to the front door of the house, climbing the steps that led up to it, and reaching for the bell.

He pressed the bell. Far away in a back room he heard it ringing, and then at once - it must have been at once because he hadn't even had time to take his finger from the bell button - the door swung open and a woman was standing there. Normally you ring the bell and you have at least a half-minute's wait before the door opens. But this lady was like a jack-in-the-box. He pressed the bell - and out she popped! It made him jump.
