Do you know that plants have immune systems just like people? The healthier the plant, the more powerful its immune system is to keep pests and diseases at bay.
(21)

Plants contain special chemicals that make them unpleasant to bugs. These chemicals are removed and used as pesticides. When the plants are weakened by stress due to heat, drought or poor soil, their chemical levels are lessened and they become vulnerable to pests.

Read the passage below and answer questions 26 to 30.

When the SKI band came marching into the stadium, my wife, Sylvia, and I held our breaths for the performance. We carefully scanned and inspected every boy in the band and listened to every note. Every step was superbly carried out. The drum-major was most masterful – twirling, spinning and leading his band with grace and majesty. **The music was stirring beyond what words can describe.**

5

“We’re sure to win.” I breathed a sigh of relief as the band beat its retreat. Sylvia nodded in agreement.

After the interval, the moment of truth came – all too soon. Upon hearing the announcement, Sylvia and I could have wept. Our judgment had proven to be too biased.

The bands had all reassembled in formation on the field to receive the results. As soon as the winners were announced, a powerful electric charge seemed to pass through the entire field as well as the spectators’ stand. The winning bands broke loose with whoops and shrieks of joy and band members exchanged hugs of self-congratulation. The spectators also went wild in their clapping although in many places, disappointed faces like ours could be seen.

10

15

We watched the SKI band with eagle eyes, but it was too far for us to see John’s and Pat’s faces. Then, something seemed to be happening. The SKI band was standing very still and straight. The drum-major was saying something to his band. As the rest of the school bands in the field grew steadily noisier and wilder, the stillness and silence of the SKI boys became almost unnatural. And to us, parents of the boys, it was unnerving.

20

A tiny sound of drums was heard. The SKI drum-major had raised his mace and the band started playing the tune of their school song, faintly at first in the noisy field, but clear as tinkle bells to our parental ears.

A small silence fell on those around the band. Something was happening. They could feel it. Something extraordinary.

25

Smartly, not a step out of place, the SKI boys stepped forward, marched onto the running tracks, made a faultless turn and began their orderly retreat away from the field. The discipline with which they carried out their disappointment touched those who noticed them. Unlike the others, they did not scream nor shout. They did not even shed a tear. Their unshed tears flowed in our hearts as they went out in perfect step, dignified despite the defeat.

30

How proud we felt as we watched the SKI band march past the field of spectators. Yes, now the spectators were cheering the band on as they passed by. Hail to the losers! Yes, even in defeat, there are laurels to be won.

The rain forest teems with life — birds squawk, snakes slither and frogs croak.

Leaves on trees sag, weighed _____ by droplets of water.
(51)

One leaf has a special treasure. A female red-eyed tree frog has _____
(52) a batch of eggs on it. She chose the spot for a special reason — the leaf hangs over a pond.

When the eggs are ready to hatch, the tadpoles _____ start swirling
(53) around vigorously. This breaks each egg open, _____ the little tadpoles.
(54)

All the tadpoles will then be washed down the leaf in a stream of moisture from the hatching
_____ and plop! plop! plop! they land noisily in the pond _____
(55) (56)

Feeding on tiny _____, the tadpoles live in the water until they
(57) _____ into little brown frogs. By the time they are adults, the frogs have
(58) turned a striking green, with blue-and-yellow striped sides, red feet and big red eyes. Being green helps the red-eyed tree frog _____ in with the tree leaves. This
(59) keeps it hidden from both the insects it eats and the _____ that want to
(60) eat it. When one of these tree frogs sits still on a green leaf, with legs _____
(61) in and eyes shut, it is practically invisible.

So why do the frogs have brightly coloured bodies and huge red eyes? The bright colours are a defence mechanism. If the camouflage fails and a predator spots a

_____ frog, it swoops in for what it thinks will be a _____
(62) meal. Then the awakened frog's eyes pop open, revealing _____
(63)

startling bright red colour! When the frog rushes to get away, it also untucks its brightly coloured legs. The predator is often so _____ by these sudden flashes
(64) of colour that it is momentarily confused and it hesitates. While it does, the frog makes
(65)

its escape in a split second!

Read the passage below and answer questions 71 to 80.

It was soon after the results of the class test for the first term had been compiled. I did badly in the test, not unexpectedly. My family had recently moved to Kampong Bahru. For my education, the move was somewhat a disaster. There was too much fun for boys of my age there, from rounders, basketball, fighting fish to mischievous exploits of one sort or another.

5

My teacher, Mr Doraisamy, was a genial person who was not very keen to use the rod. However, he wrote four words in my report book and they told it all: "Can work, but lazy." It was the system then that principals would go round to each class and take a look at every report book. The principal, Captain Goodman Ambler, was a retired British army officer. He was about six feet tall, slim and slightly hunched, but his looks were enough to give shivers to students who did not match his expectations.

10

On that fateful afternoon, Captain Ambler sat on our teacher's chair and went through the report books. For some odd reason, my book was on top of the pile. Then I heard my name. His military voice boomed across the room, "So, you can work, but you are lazy, eh?" That question did not call for a reply.

15

"My boy," the principal bawled, "go to my office. Next to my desk is a wooden cabinet. Open it. In it find the magic wand you like best and bring it back to me."

I did not need any prodding. I stepped quickly out of my class and headed to his office **with my heart in my mouth**. In the wooden cabinet, I found six canes of various thicknesses, from the girth of one's smallest finger to one's fat thumb. What a decision to make! I remembered I heard from other mischievous boys that the thicker the cane, the less the pain. **So I took a risk**. I walked back to class, stroking the cane which I knew would soon whip my buttocks. But, what I could not guess was : how many strokes would I be given?

20

By the time I returned to class, there were about seven others who had formed a line, all having 'qualified' to experience the magic wand. I was the first invited to take the spot, bend down and touch my toes. Then like a first-rate magician, the principal brought the cane down on my buttocks. I almost fainted. At that very instance, Captain Ambler called, "Next." It was the happiest word I had heard till that moment.

25

I walked back to my desk. When I sat on the hard wooden chair, I shot back up into the air. Instinctively, I pressed my hands on the seat and pretended to sit, remaining in that position till the pain subsided.

30

That one stroke of the magic wand changed my life. All my **extra-curricular activities** in the kampong were put on hold. It was study, study and study almost round the clock. When results of the third term came in, there was nothing in it to make me qualify for another stroke. If Captain Ambler had not used the wand on me, I could have ended up as a dropout and my life would be ruined. Deep in my heart I am totally grateful to him for performing his magic.

71 How did the author perform in the class test for the first term?

72 Describe how principals at that time would assess how well a class was progressing.

73 What was Mr Doraisamy's impression of the author ?

74 From the passage, quote **two** words from different paragraphs that refer to the 'magic wand' (line 17).

75 I stepped quickly out of my class and headed to his office '**with my heart in my mouth**' (line 18-19).
What does this phrase tell us about how the author was feeling?

(Go on to the next page)

76 'So I took a risk.' (line 22) What did the author do and why did he choose to do so?

77 Give two examples from the passage that showed that the pain on the author's buttocks was excruciating.

78 Why was the author elated when Captain Ambler called "Next."?

79 Give two examples of the author's extra-curricular activities (line 34) in the kampong.

80 Explain in **your own words** how the author had changed after he was given that one stroke of the magic wand.
