## ENVIRONMENT, PLANNING AND DEVELOPMENT LAW

Answer **FOUR** questions.

1. Critically examine the new regime for nature conservation under the Countryside and Rights of Way Act 2000.
2. Climate change is a novel problem that has led to the application of novel regulatory strategies, for example the use of voluntary agreements, being applied. Give your assessment of the appropriateness of such strategies,.
3. Assessments of the environmental effects of development are now commonplace in the development consent system. What impact has environmental assessment had on the balance between environmental protection and development?
4. To what extent has the United Kingdom's Integrated Pollution Control regime been strengthened by the Directive 96/61 on Integrated Pollution Prevention and Control? Assess what further developments could usefully be made in the prevention and control of pollution.
5. Critically analyse the influence of the human rights agenda on planning and environmental law and practice in the United Kingdom.
6. Critically analyse the current administrative arrangements and structures for environmental policy in the United Kingdom. How would you alter these arrangements to further environmental protection?
7. Consider the extent to which international law has influenced the content and direction of United Kingdom environmental law. Use examples from at least **ONE** area of law to illustrate your answer.
8. What is the current state of the sustainable development agenda in environmental law and policy in the United Kingdom? Explore its likely future development.
9. Critically analyse the imposition of criminal sanctions from an environmental protection perspective.
