MSc EXAMINATION

FACULTY OF CLINICAL SCIENCE

DENTAL PUBLIC HEALTH I

Monday 6th June 2005 10.00 to 1.00

Answer THREE questions only.

1. What is the epidemiological basis for the Common Risk Factor Approach (CRFA) for preventing chronic diseases? What implications does this approach have for the prevention of oral diseases?
2. What are the principles of the Primary Health Care Approach (PHCA)? Discuss the factors that have hindered the implementation of the PHCA themes applied to oral health.
3. Outline the principal causes of dental trauma in school children.
4. "Cochrane Reviews will have a major impact on the delivery of dental care". Discuss this statement.
5. Describe the types of information that a planner of dental health services would collect in a needs assessment of a population within a local health district.
6. Health motivations are frequently **not** the primary reasons individuals change their behaviour. Discuss this statement highlighting its significance for health promotion strategy development.
