**DENTAL PUBLIC HEALTH II**

Tuesday 7th June 2005 10.00 to 1.00

Answer THREE questions only.

1. Critically review the evidence linking diet and dental caries.
2. "Periodontal disease is a dental public health problem." Discuss this statement
3. Describe the health promotion strategies that may be implemented to reduce the prevalence of dental caries in the primary dentition.
4. Discuss the possible causes of the decline in caries in many industrialized countries in the last 30 years. What are the policy implications of the declines?
5. Discuss the principles and procedures involved in screening for dental caries in school children.
6. The National Institute of Clinical Excellence (NICE) has recently published guidelines on dental recall intervals. Outline the main recommendations in this review and discuss implications for the delivery of high quality dental care.
