(University College London)

BASIC MEDICAL SCIENCES EXAMINATION PART II 2001
for internal students of University College London

SOCIAL AND INDIVIDUAL BEHAVIOUR

ANSWER TWO QUESTIONS FROM EACH SECTION.
(Please answer each section in a separate book and do not tie together)

SECTION A: PSYCHOLOGY AS APPLIED TO MEDICINE

1. **Discuss the relative contributions of nature and nurture to social and emotional development during early childhood.**
2. **What are the psychological factors in disorders involving the immune system**
3. **How does the gate control theory differ from biomedical models of pain**
4. **Write short notes on two of the following**
 - a) **Aging**
 - b) **Addiction**
 - c) **Stress**
 - d) **Bereavement**

SECTION B: SOCIOLOGY AS APPLIED TO MEDICINE

- 1 **Outline and assess the labelling approach to mental illness.**
- 2 **Discuss the importance of the distinction between 'felt' and 'enacted' stigma. Illustrate by reference to a particular stigmatizing condition.**
3. **How would you account for the decline in mortality from infectious disease in Britain over the last century and a half?**
4. **How might ethnicity affect the use of health services in Britain?**
5. **What do you understand by the terms "Third Age" and "Fourth Age"? How might they be useful in understanding the health of older people?**
