**Health Psychology**  
**May 2002**

**Time allowed: 3 hours**

**Attempt FOUR questions.**

- 1 Write short notes on each of the following:  
a) Panic attacks (25)  
b) Memory for instructions  
c) Symbolism of the foot  
d) Aggressive outbursts  
e) Treatment trials  
f) Placebos
  
- 2 The culture and background of a patient can affect the way they respond to health problems. How could you deal with this in your approach to treatment? (25)
  
- 3 Is foot pain the only thing that will stop people from being victims of shoe fashion? (25)
  
- 4 Outline how you might help patients deal with symptoms of EITHER anxiety OR depression. (25)
  
- 5 How can quality of life be measured, and how might foot problems reduce it? (25)
  
- 6 Describe the main stages of child development. At what stage would you expect a child to be able to follow treatment instructions on their own? (25)

END OF PAPER
